GARDEN
SEEDS.

1898.

MO. BOT. GARD.
1911.

JAMES CARTER & CO., 237, 238 & 257, HIGH HOLBORN, LONDON.

THE LARGEST ORDER FOR VEGETABLE SEEDS EVER GIVEN.

We had the honour to receive the commands of the Right Honourable Lord George Hamilton, P.C., M.P., Her Majesty's Secretary of State for India in Council, to supply **Two Hundred Tons of Vegetable Seeds** for growing in the districts of Northern India threatened with scarcity. The urgency of the order demanded delivery in Bombay by a certain date, and **only nine days could be allowed for selecting, packing, and shipping.** We have since received the following gratifying notice of His Lordship's appreciation of our services in the matter:—

[COPY.]

INDIA OFFICE, WHITEHALL, S.W.,

17th November, 1896.

Gentlemen,

I am directed by the Secretary of State for India in Council to acknowledge the receipt of your letter of the 6th instant, forwarding invoices for the additional seeds shipped by you on account of the Government of India from London and Marseilles on the 6th instant.

Lord George Hamilton recognises with satisfaction the facilities and assistance you have received in organising these large and unaccustomed shipments from Her Britannic Majesty's Consul at Boulogne, the Customs Authorities at Folkestone, the Directors of the Peninsular and Oriental Company, and the Goods Managers of the South Eastern and Great Eastern Railway Companies.

His Lordship also desires me to convey to you the expression of his appreciation of the promptitude and foresight shown by you in successfully carrying out so large a portion of the order of the Government of India, within the very limited time allowed for its execution.

I am, Gentlemen,

Messrs. F. Carter & Co.,

High Holborn.

Your obedient Servant,

(Signed) A. GODLEY.

"The Times."

We understand that the Secretary of State for India has shipped some thousands of sacks of vegetable seeds suitable for growing in the districts of Northern India that are threatened with scarcity. The selection, packing, and shipping was accomplished by Messrs. Carter, the Queen's seedsmen, London, in the short space of nine days.

"The Standard."

The Secretary of State for India has shipped some thousands of sacks of vegetable seed suitable for cultivation in the northern districts of India. The selection, packing, and shipping of the seed were entrusted to Messrs. Carter, and the last consignment has just left England by steamer for Calcutta.

"Truth."

The Secretary of State for India has entered into an arrangement with Messrs. Carter & Co., the well-known firm of seedsmen, to forward to India about £10,000 worth of root vegetable seeds, in order to avert the coming famine. These seeds are already on their way to India, and they will arrive just in time for sowing. I trust that there will be no hitch in their immediate distribution.

"The Daily Telegraph."

Telegrams from the Viceroy and other official despatches have confirmed rumours that have been gathering for some weeks as to prospects of distress, grave and widespread, in India, and the Indian Government, that great paternal and beneficent entity, which legislates, constructs, irrigates, and even thinks for some 300,000,000 of the most curiously helpless folk in the world, is ready to meet it. This it will do, not only by the funds held in reserve for an emergency, which experience has shown is only too apt to recur at given intervals, and by huge relief works, but in unexpected and unconventional methods, as the distribution of seeds of quickly grown vegetables. For this purpose it placed very recently the most important and, indeed, colossal order ever given to the seed-growing trade, and at the present moment there are some tons of seeds of the quickest matured roots on the high seas on their way to Bombay. This contract was entrusted to Messrs. Carter, of High Holborn, but its execution evolved some diplomacy and discretion, for no business in the world is more sensitive to "scare" than this is, and the knowledge that such unprecedented quantities were required would have sent prices up at a bound, thereby inflicting an indirect tax which would have weighed very hardly upon the English market-gardener and cottager. The seeds will be sent chiefly to the North-West and the Punjab, where extensive systems of irrigation are available for their cultivation, and long miles of canals fed by the Five Rivers will water them.

WE HAVE HAD BUSINESS RELATIONS WITH HER MAJESTY'S INDIAN GOVERNMENT SINCE THE YEAR 1849.

Messrs. Carter beg to state that they give equal attention to an order for a single packet of seeds as to one of a greater extent.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

CARTERS' POPULAR BOXES OF SEEDS.

The Seeds offered in our Collections are of the best re-selected stocks only, taken from the same sacks as general orders given from this Catalogue. We can supply more Seeds for the money when purchased in this form, because we put up these Collections by the hundred, and by such means effect a great saving in labour. They can be despatched immediately, packed in wooden boxes, and sent carriage free to any Railway Station in England and Wales, or Ports in Ireland and Scotland in direct steam communication with London, on receipt of remittance. It is inconvenient to make alterations in these Collections.

1 pkt. Brussels Sprouts , imported.	1 pkt. Cucumber.		

FOR COLLECTIONS OF FLOWER SEEDS, SEE PAGE 69.

GREEN PEAS—JUNE TO NOVEMBER.

A correspondence was raised in the Daily Press last Autumn upon the shortness of the season when Green Peas are available, both in gardens and on the market. In many large establishments a constant succession is grown out in the open from June to November, and there is no reason why the custom should not extend to all private gardens where vegetables are cultivated for home consumption.

We now offer the following as representing the best collection selected from 1024 rows we had under trial this season at Mortlake, calculated to produce Peas for five months, under fair conditions, if sown at varying periods during the Spring and Summer. It would be difficult for us to give precise dates for putting the seed into the ground as so much depends upon soil and situation. Suffice it to say that the last sowings should not be made later than the second week in June.

Successional Sowings of these Peas may be made at any time between the dates named. The above dates are the result of trials at our experimental grounds, Mortlake, Surrey.

The Collection, 1 pint each of 7 varieties, price 12s. 6d. Carriage Free.

The Collection, 1 quart each of 7 varieties, price 22s. 6d. Carriage Free.

OUR WORK AMONGST PEAS.

During the last 25 years quite a revolution has taken place in the Garden Pea, an important vegetable with which we have always been closely identified, our sales last season reaching the enormous output of 40,000 bushels.

Our experiments, having an aim towards its improvement, both in earliness or lateness, size of pod and flavour of pea, commenced in the year 1872, after we had been honoured with two first-class certificates from the Royal Horticultural Society for our initial endeavours to create an advance upon the old-fashioned varieties then in vogue.

Our next important step was the purchase from Mr. Culverwell of that justly celebrated pea raised by him and called *Telegraph*; this was in the year 1876, and from the adoption of this northern blood into our pedigree stock have since sprung the sterling and popular varieties *Telephone*, *Stratagem*, *Pride of the Market*, *Anticipation*, and *Daisy*, all of world-wide repute, whilst there are others that have yet to earn fame.

During the time our experiments in cross breeding have been in progress we have also given a good deal of attention to re-selection, and foremost among the very earliest out-door Peas, for many years was Carters' First Crop; out of this we selected Carters' *Lightning*, and introduced it in 1887, and now well-known. In 1892 we brought out the famous *Daisy* Pea, twice honoured with recognition from the Critical Investigation Committee of the Royal Horticultural Society. This fine Dwarf Marrowfat was illustrated in the GARDENERS' CHRONICLE, with a description by Dr. Masters, F.R.S.

FIRST EARLY MARROWFAT PEAS.

CARTERS' EARLY MORN.

CARTERS' EARLY MORN PEA.

▲ Sweet Marrowfat; as early as Carters' Lightning, with enormous pods like Carters' Daisy.

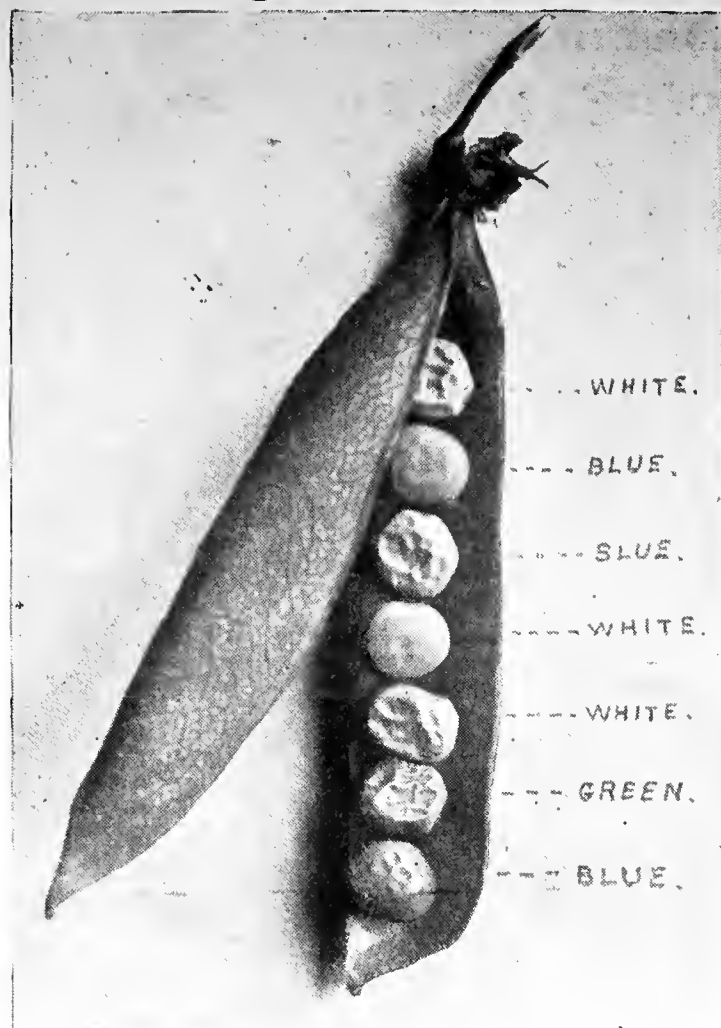

*Photographed from Nature and Copyrighted
by J. C. & Co.*

For full description, see opposite page.

Carters' Early Morn was introduced by us last season for the first time, and its great merits have been already recognised by some of the greatest authorities of the day.

Sold in sealed packets only,
price 2/- per pint, 3/6 per quart.

CARTERS' EARLY MORN PEA.

Photographed at Messrs. Carters' Experimental Grounds and Copyrighted by J. C. & Co.
POD OF CROSS BRED PEA, DAISY X LIGHTNING.
FIRST YEAR'S RESULT.

Unstinted praise has been accorded the introduction of this very fine early Pea. The small quantity that we were able to distribute last season went into the hands of capable and noteworthy gardeners, and the weighty evidence we are enabled to put into print of their experience with it is an enduring proof of its great merits. That it is a Pea which may be taken as a real advance in the first early section is an accomplished fact. Indeed, it is likely to misplace many of the small round-seeded kinds hitherto sown for this purpose. A rigid selection each season of the most approved plants has enabled us to bring the character of its growth into a convenient compass, so that it is now classed in the 3-feet division. The pod, whilst being produced out of doors early in June, is as fine in size as our well-known "Daisy."

THE HISTORY OF CARTERS' EARLY MORN PEA.

In 1887 we first offered Carters' Lightning Pea as the earliest of the White round section in cultivation, an opinion fully confirmed by the testimony given in later Catalogues from some of the best-known gardeners in the country. Since that time we have had in hand many experiments with a view of bringing the sweet-flavoured marrowfat section in a line with Carters' Lightning for earliness.

In 1892 it was our privilege to introduce Carters' Daisy Pea, the result of seven years' patient work. This acquisition was the outcome of Carters' Stratagem crossed with a Giant Marrow, and it is to-day undoubtedly the very best second early large podded marrowfat pea in cultivation. During the first year of its introduction we commenced operations between this variety and Carters' Lightning, with a view to obtain a Pea as early as Lightning with the splendid pods of Daisy, retaining at the same time the sweet marrow flavour, and after five years of careful re-selection we obtained Carters' Early Morn.

The illustration represents an open dried pod gathered from the first season's progeny of Lightning x Daisy. It will be observed that the seeds are not only variously shaped but they were also differently coloured, indeed each seed seemed so distinct that it became necessary to sow all of them the following season in order to discover the plant most likely to develop the characteristics we were seeking.

Price in sealed packets, 2s. per pint; 3s. 6d. per quart.

STOCK VERY LIMITED.

NEW PEA, CARTERS' EARLY MORN.—"In your issue of July 17th, page 436, in speaking of new early peas, your correspondent, Mr. W. A. Cook, refers to this pea in very glowing terms. Having grown it side by side with several new kinds, I can fully bear out all he writes about it, either as an exhibition variety or for general use. I believe it is destined to take a foremost place, and it is most prolific, and remains a long time in good condition; the pods are very handsome, well filled, and the peas of excellent flavour. Another good point in its favour is that it continues to bear for a long season. I exhibited a dish on June 29th at the R.H.S. meeting, and from the same row this day, August 7th, we have picked a fine lot. Considering the long spell of dry weather, and that the variety was grown without any special treatment, this is a good record. I do not hesitate to say that it is the finest marrowfat pea I have ever grown."—EDWIN BECKETT, Aldenham House Gardens, Elstree, in the *Gardeners' Magazine*, August 21st, 1897.

Mr. E. BURRELL, Head Gardener to Her Royal Highness the Duchess of Albany, says:—"A very fine pea, combining size and flavour with earliness, from the latter standpoint a contemporary of the first Earlies."

NEW EARLY PEAS.—"Among the numerous varieties of early peas, I think Carters' Early Morn is entitled to first place as the largest early pea yet sent out. With us it is a marvellous cropper, and produces pods equal to the largest Duke of Albany, and withal of a most excellent marrow flavour. In point of earliness is very little behind its dwarf companions. From a row sown on February 8th, 1897, we gathered on June 15th, and in nine seasons out of ten it would be much earlier, as this season has been one of too many wet and cold nights for early vegetables."—Mr. W. A. COOK, in the *Gardeners' Magazine*.

Mr. J. CRAWFORD, Head Gardener to Colonel Thorpe, Coddington Hall, says:—"No variety of pea, so far as I know, having such fine pods, is fit to pick so soon in the season."

Mr. J. APLIN, The Gardens, Hasfield Court, says:—"Early Morn is the largest early pea that has ever come under my notice. Many of the pods contain ten and eleven peas. This pea is A1."

Mr. H. C. PRINSEP, Head Gardener to the Hon. Mrs. Portman, Buxted Park, says:—"Carters' Early Morn is certainly a first-class early pea, one of the best of the long-podded type."

CARTERS' HAND-PICKED PEAS.

EARLIEST VARIETIES.

A New Winter-forcing Marrow Pea.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Forcing Pea.—Our photograph above represents the true character of this acquisition, which will be found one of the most valuable Peas for under-glass culture. It was selected from many seedlings that have been under trial at our experimental grounds, originating from the same remarkable family as *Carters' Daisy*. Its stocky growth is rarely more than one foot in height, the fine pods are numerously borne, and contain from six to eight large Peas, possessing the true marrow-fat flavour when cooked. This fine Pea will commend itself not only to professional gardeners who produce Peas nearly the year round, but also to amateurs having a greenhouse or vinery, doing practically nothing through the winter months, and who can, with this hardy Pea, raise supplies for their table very early in the year.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

PEAS AT EASTER.

"I decided in January to grow a good batch of Peas in pots, and sowed on January 28th *Carters' Forcing* and *Carters' Dwarf Favourite*, all in 60's sized pots, and placed in the early vinery. When about 4 inches high they were potted into 32-sized pots and placed back. As soon as the vines began to darken them and more light was required, I placed them in a heated pit. They came into bloom on March 20th. I sent the first dish to table Easter Sunday, and my employer said they were equal in size and flavour to any marrowfats grown in the open."—Mr. W. J. EMPSON, The Gardens, Ampthill House, Bedfordshire

ACTUAL SIZE OF POD.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

CARTERS' HAND-PICKED PEAS.—Earliest Varieties.

FIRST EARLY PEAS.

The Cultivation of Peas.—Early round Peas may be sown out of doors any time from November onwards, but the Spring is generally the season when the largest quantities of Second Early and Main Crop Marrow Peas are put in, extending to June for the latest crops. They thrive best in ground that has been deeply trenched and manured for a previous crop; the seeds should be planted from 1½ to 3 inches deep, in either single or double rows, and the taller varieties must be staked when they are from 4 to 6 inches high; the tallest kinds should not be less than 6 feet apart in rows, and the dwarfest varieties half this distance. Peas will stand a good deal of drought if the roots find their way into some nice rich soil. (For full particulars see CARTERS' PRACTICAL GARDENER, price 1s., enclosed with goods, or 1s. 3d. post free.)

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' LIGHTNING.

Carters' "Re-selected Lightning."

Carters' Lightning is the Earliest White Round Pea. This opinion is confirmed by the testimony sent us from time to time by some of the best growers in the country. It is particularly level and neat in habit of growth; it is also more robust in the haulm than any other Early Round Pea, and a prodigious cropper, the pods being long for Peas of this character, usually hanging in pairs, and well filled—distinct both in outline and seed—height about 2½ feet. A great favourite with market gardeners in the Southern Counties, who plant it before Christmas to give their first pickings in the Spring. It is also very useful in gardens where the soil is cold and heavy.

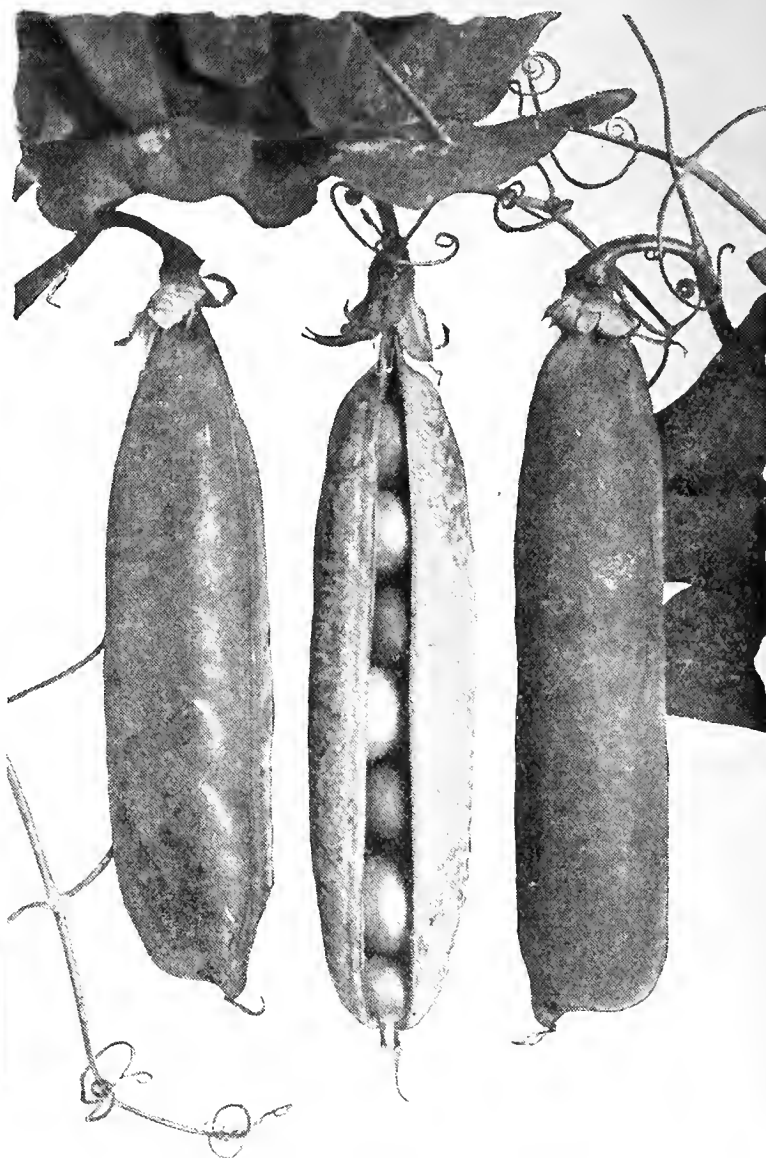

With a view of obtaining a stock from the earliest and most robust plants, we have for several years gathered seed from such selected plants only in our annual crops as have given evidence of their forwardness in reaching maturity. Our stock is very limited.

"EARLY PEAS.—I have this day, June 10th, gathered my first dish of Peas, the variety being *Carters' Lightning*. American Wonder sown on the same date will not be ready for another week; Chelsea Gem will be ten days later still. *Carters' Lightning* is the best early Pea grown, in my estimation."—THOS. COCKERILL, The Gate House.—From *The Gardening World*.

Per quart.

In sealed packets ... per pint, 2s. 2½ feet 3 6

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' SPRINGTIDE.

Carters' Springtide.

—A first early Marrow Pea, introduced by our house. We were certain this fine Pea would please all who grew it, and the reports we print below are from men eminent in the gardening profession. It combines the hardiness and forward character of the round early sorts with the habit and best points of the marrowfat class.

"This Pea I consider quite in the front rank. It is very early—we gathered on June 15th. The pods are well filled, and the Peas are of most excellent flavour. Very prolific bearer, about 2 ft. 6 in. high. One of the very best Peas for early work I have ever grown."

Mr. W. A. Cook, The Gardens, Compton Bassett.

PEA, SPRINGTIDE.—Out of many of the newer early peas I have on trial here this season, none please me so well as Springtide; it is covered with pods almost from the ground upwards."—Mr. J. C. TALLACK.—In *The Garden*.

"I sowed *Carters' Springtide* Pea at the end of February, and gathered the third week in June. I consider this quick work in this district after an unfavourable Spring."—J. C.—In *The Garden*.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

CARTERS' HAND-PICKED PEAS—Earliest Varieties.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Blue "Re-selected Express."

—This fine First Early Pea is a counterpart of Carters' *Lightning*, only that the seed is blue. It is a neat grower and a very productive bearer, the pods well filled, with fine-flavoured Peas of a distinct colour when boiled. One of the largest Essex growers tell us that he gets his first pickings into Covent Garden nearly a week in front of his neighbours, and he purchases several quarters from us every season. (In some localities these blue Peas suit the soil better than white kinds.)

In sealed packets, per pint, 2s. 2½ feet 3 6

Carters' St. Osyth Gem.—We introduced this dwarf wrinkled Pea last season, it having been raised upon our Seed Farm from a cross between *Chelsea Gem* and *Stratagem*, and combining the best qualities of these two fine Peas. Height 1½ feet.

In sealed packets, price 2s. per pint; 3s. 6d. per quart.

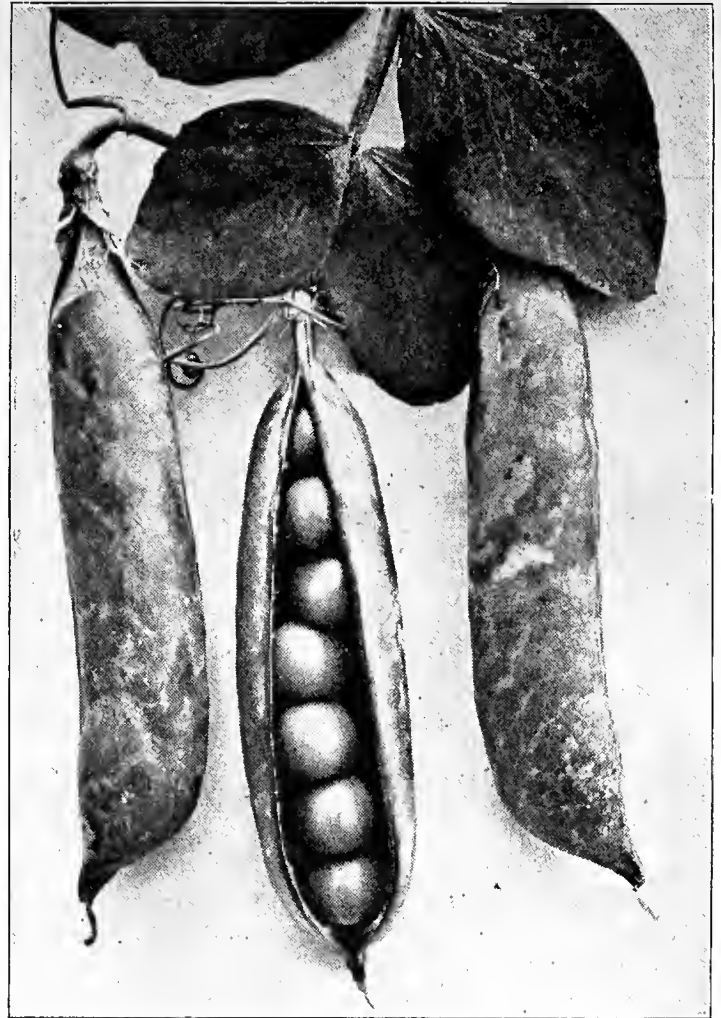

Carters' Dwarf Favourite.—A useful miniature wrinkled Pea, selected from a batch in our Trial Grounds. As illustrated in the photograph above, it bears a profusion of long, curved pods, which contain from six to nine Peas. In height it averages about one foot, and owing to its branching nature, a single plant has been noticed to carry as many as 16 pods fit for gathering. For gardens where space is an object, and for situations requiring a variety that can be quickly cleared, this is the Pea to grow. We have also proved its adaptability for culture under glass.

In sealed packets, price 2s. per pint; 3s. 6d. per quart.

Carters' First Crop or Ringleader.

—An old and popular First Early Pea. "Carters' Peas were exceptionally fine. I commenced pulling Carters' First Crop on the 28th May, and never missed one day until the latter end of September."—Mr. J. T. LINDSAY, Belfast.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

AMERICAN WONDER (Re-selected). Per quart, 1s. 6d.

Carters' First Crop Blue.—A good cropper, and of fine flavour. Awarded a First Class Certificate, R.H.S. ... 2 feet 1 6

CARTERS' EXTRA EARLY PREMIUM GEM.—A great improvement upon Little Gem ... 1 foot 2 0

CARTERS' IMPROVED SANGSTER'S No. 1.—Very superior to the ordinary variety ... 2½ feet 1 3

WILLIAM THE FIRST—(RE-SELECTED).—Long, handsome pods ... 3 feet 1 9

WILLIAM THE FIRST.—Original stock ... 3 feet 1 3

AMERICAN WONDER (RE-SELECTED).—Specially suited for frame use in large gardens, it also forces well; and although a wrinkled Pea, it has proved to be as early as Ringleader ... 1 foot 1 6

AMERICAN WONDER.—Original Stock ... 1 foot 1 0

EARLY SUNRISE.—An early white Marrow; prolific ... 3 feet 0 10

EMERALD GEM.—Pods of a distinct colour ... per pint 1s. 3 feet 1 9

EARLIEST OF ALL.—A remarkably good cropper ... 3 feet 1 6

DICKSON'S FIRST AND BEST.—Very prolific ... 2½ feet 0 10

SANGSTER'S No. 1.—Ordinary variety ... 0 9

KENTISH INVICTA.—Straight, handsome pods ... 2 feet 1 3

ECLIPSE.—An early blue Pea ... 3 feet 1 0

EARLY WILLIAM.—A useful variety with long pods ... 3 feet 1 9

DANIEL O'ROURKE.—A select stock ... 2½ feet 0 9

HARBINGER.—Very early, Peas of fine flavour ... 2½ feet 1 6

ALPHA.—One of the best early Peas ... 3 feet 2 0

LITTLE GEM.—Very dwarf and prolific ... 1½ feet 1 6

McLEAN'S BLUE PETER.—Remarkably dwarf. First Class Certificate, R.H.S. ... 9 inches 1 6

EXONIAN.—A valuable early wrinkled Marrow; very prolific ... 3½ feet —

In sealed packets, per pint, 1s.; per quart, 2s.

GRADUS.—An early wrinkled Marrow ... 4 feet 3 6

LIGHTNING.—Ordinary stock, first early white, per pint, 1s. 3d. 2½ feet 2 0

BLUE EXPRESS.—Ordinary stock, first early blue, per pint, 1s. 3d. 2½ feet 2 0

CARTERS' HAND-PICKED PEAS.—Second Early Varieties.

CARTERS' "DAISY" PEA.

It is a great honour in these days to be known as the raisers of a sterling novelty in Peas, and we feel proud to own such a position in respect to "Daisy," which has now taken a firm hold on public favour. It is interesting to quote the following remarks in relation to this grand introduction from an article on New Peas in the "Gardeners' Chronicle" last winter:—

"So good have been the varieties of Peas recently introduced, that all round hard Peas are practically eliminated from lists, except for very early purposes in fields, for in gardens the dwarfed wrinkled earlier now have the primary place, and there can be absolutely no doubt that in the matter of productiveness a great advance has been made. It is not merely in the length and in the number of pods that we see this, but where cultivation is even fair, we see that these long pods fill well, so that when the best of tests of productiveness is applied, that of the shelled quantity, it is found that pea produce is as remarkable as is that of pod. One of the two best varieties under 24 inches in height was 'CARTERS' DAISY.'"

The fact that on no less than two occasions "Daisy" has been granted the Highest Award of Merit from the Royal Horticultural Society of England stamps it as a real acquisition, and a pleasing return for the seven years' patient work at our experimental grounds in perfecting it. Our illustration is a true photographic picture of this remarkable Pea. Height, 15 to 18 inches.

CARTERS' "DAISY."

Mr. Edwin Beckett, Head Gardener to Lord Aldenham, in an article on New Peas, writes to the "Gardeners' Magazine":—"There are now a host of good exhibition Peas, but amongst the best that I am acquainted with is Carters' 'Daisy,' a splendid Dwarf Pea of the finest quality."

The Editor of the "Journal of Horticulture" says:—

"As a matter of fact there are far too many Peas, some of them introduced as distinct fixed novelties, which are only selections from old ones; they after a season revert to the parental type. It would be advantageous if the list were curtailed, and no matter how hard it would have to be compressed, Carters' "Daisy" would of necessity remain. It is beyond a doubt one of the finest dwarf early marrow-fat Peas in cultivation, and it is one that ought to be grown in every garden whose owner appreciates Peas."

A PLANT IN POT, SHOWING PROLIFIC POD-BEARING CHARACTER.

Photographed from Nature and Copyrighted by J. C. & Co.

The following Extract is taken from a Report made in the "Gardeners' Chronicle" by Dr. Masters, F.R.S., who inspected our crop:—

"The history of the 'Daisy' Pea is as follows:—With the object of filling the somewhat bladder-formed pod of Culverwell's Giant Marrow, Messrs. Carter crossed that variety with 'Stratagem,' the result giving them a distinct-looking Pea. In the following year they again crossed the produce with the first-cross with 'Stratagem,' the result, after another year or two of careful selection, being the present 'Daisy' Pea."

The haulm in an average season grows to a length of 12 to 18 inches, and is practically covered with handsome pods 5 inches in length, containing 8 to 10 deep-coloured Peas, whilst it possesses the most exquisite marrowfat flavour we have ever met with.

"Carters' 'Daisy' Peas were a sight, and counted several points towards gaining the First Garden Prize."—Mr. J. OLIVER, Spittle.

"Carters' 'Daisy' Peas were splendid; for size, flavour, and productiveness we never had their equal."—Mr. H. SANDY, Wandsworth.

In sealed packets, price 2s. per pint; 3s. 6d. per quart.

CARTERS' HAND-PICKED PEAS.

SECOND EARLY AND MID-SEASON VARIETIES.

Carters' Early Favourite.—A selection from Dickson's Favourite, but very superior to that well-known variety in length of pod, extra earliness, productiveness, and quality for table. The pods are quite distinct in shape from any other Pea in cultivation... .. per pint, 1s. 6d. 4 feet 2 6

Carters' Little Wonder (RE-SELECTED). — We introduced this valuable early wrinkled Pea some years since, and offer now a choice selected stock. It is a wrinkled Marrow as early as **Advancer**, and very superior in length and breadth of pods, productiveness, and flavour 2 feet 2 0

Carters' Pride of the Market.—A fine main crop blue marrowfat Pea, belonging to the same family from which our **Stratagem** was selected. Its merits were recognised by the Royal Horticultural Society, who awarded it the highest honours. It is a very heavy cropper, yielding fine long pods, well filled with large green peas. Being a strong grower it requires to be thinly sown. Height, 2½ feet.

In sealed packets, price 1s. 3d. per pint ; 2s. per quart.

Carters' Hundredfold.—Pods large and well filled. An old favourite 4 feet 1 0

ABUNDANCE.—An early dwarf Pea 1½ feet 1 0

PRINCESS ROYAL (RE-SELECTED).—Large, well-filled pods 2½ feet 1 0

CHAMPION OF ENGLAND—An old but popular Pea ... 5 feet 1 0

DR. HOGG.—An early Ne Plus Ultra. Sweet, excellent ... 3 feet 2 0

ADVANCER.—Fine flavour, pods large and numerous ... 2 feet 1 6

PREMIER.—Large, well-filled pods ... 3 feet 1 6

Carters' Seedling.—A superior main crop Marrow Pea, the result of two distinct crossings, its parents being the well-known and valuable **Peas**, **Stratagem**, **Queen**, and **Autocrat**. It somewhat resembles our peerless **Stratagem** in height and general character. The pods are of a rich green colour and well filled with large **Peas**. **Carters' Seedling** is likely to become a popular exhibition Pea. Height, 3 feet. Crop failed.

In sealed packets, price 2s. per pint ; 3s. 6d. per quart.

Carters' Majestic.—A splendid Mid-season Marrowfat Pea—valuable alike for the table and exhibition. It is exceedingly productive, the extra large highly coloured pods containing from eight to eleven fine peas, possessing a sweet and dainty flavour. Height 3 feet.

In sealed packets, price 2s. per pint ; 3s. 6d. per quart.

DICKSON'S FAVOURITE.—Our stock has been carefully re-selected, and is very superior to the ordinary kind in commerce 4 feet - 10

LAXTON'S SUPREME 4 feet 1 0

BISHOP'S LONG-PODDED 1½ feet - 10

LAXTON'S PROLIFIC 5 feet - 10

McLEAN'S BEST OF ALL.—Of fine flavour ; prolific ... 3 feet 1 3

WILLIAM HURST.—A useful early dwarf Pea ... 1 foot 1 9

FORTYFOLD.—A superior type of **Champion of England** ... 4 feet 1 3

CARTERS' WHITE GEM.—Early, pods large and well filled ; prolific, handsome, and dwarf ... per pint, 1s. 6d. 2½ feet 2 6

TELEPHONE.—Original stock (see also page 14) ... 5 feet 2 0

TELEGRAPH.—Original stock (see also page 14) ... 5 feet 1 6

STRATAGEM.—Original stock (see also page 13) ... 2½ feet 2 6

EDIBLE PODDED PEAS.

Whilst such a large share of popularity has been accorded the ordinary shelling Peas in this country, our friends on the Continent have assiduously developed the Edible Podded Pea section, and have thus obtained a delicious vegetable but little known here. The shell of our garden Pea is lined with a tough and stringy membrane rendering it unfit for food ; in the class under notice this membrane is absent, having been converted into a fleshy succulent substance. The pods will thus snap readily, but are generally cooked whole and served to table usually with some plain sauce.

The variety we now offer under the name of **CARTERS' GIANT EDIBLE PODDED PEA** grows about 5 feet high, and bears enormous pods of a sweet and pleasant flavour when cooked.

Price 1/6 per pint, 2/- per quart.

HINTS ON GATHERING AND COOKING.—These Edible Podded Peas should be gathered whilst fleshy. Cut off the top and bottom points, at same time pull away any semblance of back string that may be found ; boil in salt water until a fork goes easily through them. Before serving up to table, cut the pods into three or four pieces, including the Peas, and cover the whole with a sauce made of yolk of egg and cream.

CARTERS' HAND-PICKED PEAS—Main-crop Varieties.

CARTERS' "DANBY STRATAGEM" AND CARTERS' ANTICIPATION PEAS.

Photographed from Nature and Copyrighted by J. C. & Co.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Anticipation.

—A second early Wrinkled Marrow, introduced by us in 1887, and now exceedingly popular. We claim for "Anticipation" (which is the result of a cross between Ne Plus Ultra and an Early Wrinkled Dwarf Pea) complete and distinct individuality. In habit and size, and shape of pod, for its enormous productiveness, and for its delicious flavour, it remains unique. "Anticipation" grows to a height of about 2½ feet, and sown at the usual season it comes into bearing early in July. The foliage is of a medium shade of colour, the habit of the plant being very robust, with immense straight pods, and the seed is very distinct; they are also of an exquisite flavour when cooked.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

Carters' "Danby Stratagem."

—The Danby Stratagem is a distinct improvement on the original Stratagem—having longer, straighter, and broader pods, very freely produced. We originally had the honour to introduce our Stratagem Pea in 1880, which has from the day of its birth maintained the very highest position amongst all that is good in Peas, and when well grown its position even now stands unrivalled on the exhibition board. Its merits have also been recognised in the highest degree by the Vegetable Committee of the Royal Horticultural Society on no less than three occasions. The haulm, of our improved type, is very robust and extends to a height of 2½ feet, bearing a profusion of immense pods, many six inches in length and frequently containing 10 large full-flavoured Marrow Peas.

In sealed packets, price 2s. per pint, 3s. 6d. per quart.

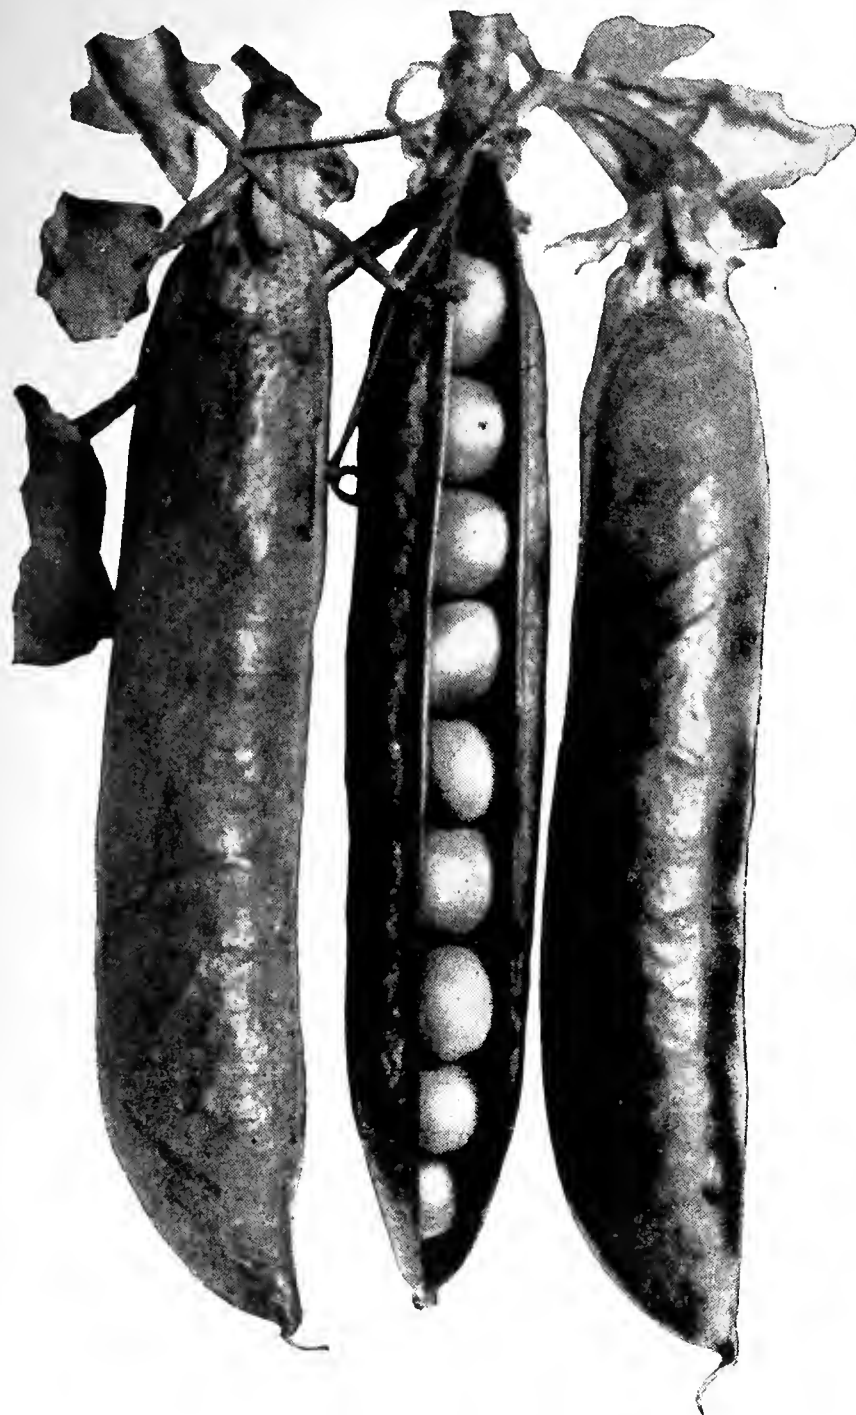

CARTERS'. 237, 238, & 97. HIGH HOLBORN, LONDON.—1898.

Mr. G. Wythes, member of the Vegetable Committee of the Royal Horticultural Society, and Head Gardener to the Right Hon. Earl Percy, writes as follows in "THE GARDEN":—

"PEA DANBY STRATAGEM.—Having for many years grown the older Stratagem, I was curious to test the newcomer against the old, and so grew the two side by side. I have come to the same conclusion as Mr. Crawford, viz., that the newer kind is an excellent selection. As most growers know, unless there is rigid selection of the seed stocks, there is a tendency to go wrong. Stratagem Pea of late years has been excellent, but there appears to be more vigour in the newer kind, and an absence of pale pods. It is a fine early pea, and this is a great gain; it is a splendid cropper, and of first-rate quality. It crops close down to the soil, and the pods are mostly produced in pairs, the haulm of a deep green, strong and vigorous. For years I forced the older variety on account of its cropping, as when gathering commenced it gave quantity in addition to quality. The Danby being earlier will make it more valuable."

CARTERS' HAND-PICKED PEAS.

MAIN CROP VARIETIES.

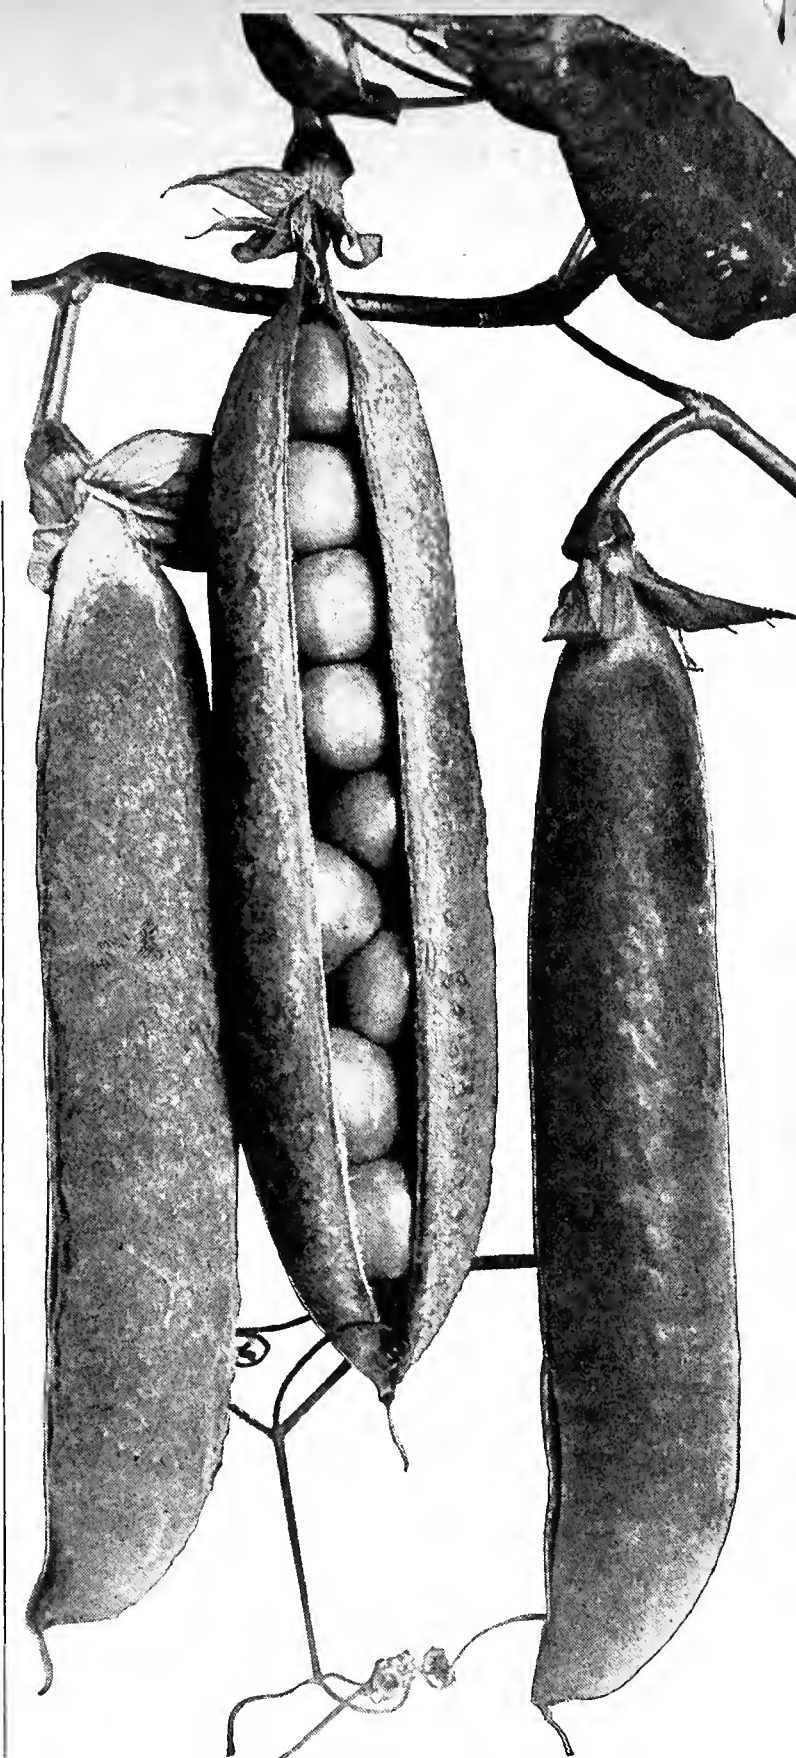

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' MODEL TELEPHONE.

Carters' "Model Telephone"

is a re-selection for robustness and delicacy of flavour from Telephone, as originally introduced by us, and may be described as a main crop, wrinkled, marrow, which bears to-day a world-wide reputation. We regret to state, however, there are many spurious strains about the country, handled and sold by irresponsible dealers for the sake of extra profit. No other Pea extant can claim equal honours with *Carters' Telephone* on the exhibition table. We used to publish a list of such awards gained annually by our customers, but it extended beyond our space and could not be continued. It is in every way a magnificent Pea even to-day, and no other variety has ever obtained such unusual commendation. Peas, wrinkled, 9 to 11 in a pod, delicious when cooked. Height, 5 feet.

In sealed packets, price 2s. per pint; 3s. 6d. per quart.

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' MODEL TELEGRAPH.

Carters' "Model Telegraph"

is a re-selection for size, the seed being saved from the largest pods only. The selection is from our original *Telegraph*, which is well-known. It was our privilege to introduce this famous Main-crop Marrow Pea in the year 1877, and we held the opinion at the time, and which was clearly expressed in our announcement, that it would prove the forerunner of a new race, and this is exactly what has happened. Indeed, the *Gardeners' Chronicle* in an article on Peas so recently as the winter of 1894, says:—"Telegraph may be fairly called the forerunner of nearly all the giant-podded section now so popular," and not only does it hold a leading place in gardens but we also find that to-day it is probably grown to a much larger extent than any other Pea by the market gardeners, who are the first to find out the merits of a new vegetable, as their very livelihood depends upon their crops. It is also valuable as an exhibition Pea, on account of the size and fine colour of the pods. The seed is round and of a deep green colour, which they retain when cooked; the flavour is also of the sweetest. Height 5 feet.

In sealed packets, price 2s. per pint; 3s. 6d. per quart.

CARTERS' HAND-PICKED PEAS FOR SUCCESSION.

MAIN CROP AND LATE MARROWFAT VARIETIES.

Carters' G. F. Wilson.

Per quart—s. d.

—It is now over twenty years since we first introduced this fine Pea, which has been brought into greater prominence than ever this last few years on account of its value in withstanding droughts. To those who like a good standard variety that will be serviceable under adverse circumstances this is the Pea to grow. It was named after a gentleman who now holds a high position in the horticultural world. The stock we offer has been re-selected ... 3 feet —

In sealed packets, price 1s. 6d. per pint; 2s. 6d. per quart.

Carters' Wonder of the World.

—A mammoth white-seeded wrinkled Marrow ... 3 feet 2 0

Carters' Balmoral Castle.

—A splendid Pea, both for Exhibition and table purposes ... 4 feet 1 6

Duke of Albany

(RE-SELECTED).—A handsome

wrinkled pea in the way of Carters' Telephone, with large well-filled pods ... 5 feet 2 6

DUKE OF ALBANY.—Original stock ... — 1 9

Carters' Surprise.

—A blue Marrow, very prolific ... 3 feet 0 10

JAMES' PROLIFIC.—A useful Pea, similar in some respects to President Garfield in quality and general productiveness ... 3 feet 2 0

FILLBASKET.—Large, handsome, highly productive ... 3 feet 1 0

BERKSHIRE CHALLENGE ... 6 feet 1 6

BLISS' EVERBEARING.—A fine-flavoured and productive variety ... — 1 3

PRIZETAKER.—An old favourite ... 4 feet 1 0

BEDMAN'S IMPERIAL ... 4 feet 0 10

DUCHESS OF EDINBURGH.—Broad, handsome pods of a dark-green colour; stands drought well ... 5 feet 2 0

QUEEN.—A distinct and prolific variety, with large deep sea-green pods of large size ... 3 feet 1 6

DOCTOR McLEAN.—Excellent flavour, very productive ... 4 feet 1 9

PRESIDENT GARFIELD.—Pods produced in pairs, very prolific, containing from 8 to 10 peas ... 3 feet 2 0

HUNTINGDONIAN ... 4 feet 1 6

BLUE PRUSSIAN ... 3 feet — 9

STURDY.—A cross between Veitch's Perfection and Ne Plus Ultra, and combines the good qualities of both sorts ... 3 feet 2 6

Carters' Elephant.

Per quart—s. d.

—This Pea produces an abundance of handsome, well-filled, and extremely lengthy pods, the Peas being of very fine quality. It is very superior form of the Supreme type, and useful, both as a Main-crop Market Pea and for garden use ... per pint, 1/3 6 feet 2 6

Ne Plus Ultra

(CARTERS' RE-SELECTED STOCK).

—A splendid Pea for late crops ... per pint, 1/3 6 feet 2 0

NE PLUS ULTRA—Original Stock ... 6 feet 1 3

CULVERWELL'S GIANT MARROW.—Blue wrinkled Marrow ... 6 feet 2 0

ROYAL JUBILEE.—A large podded Pea ... 3-4 feet 3 6

CARTERS' LEVIATHAN ... 6 feet 2 0

LATEST OF ALL ... 3 feet 3 6

SATISFACTION ... 3 feet 2 6

KING OF THE MARROWS ... 6 feet 1 6

OMEGA.—A dwarf Ne Plus Ultra; valuable late variety ... 2½ feet 2 0

WALKER'S PERPETUAL BEARER ... 3 feet 1 9

LORD RAGLAN.—In the way of Hair's Mammoth ... 3 feet 1 6

BRITISH QUEEN.—A well-known and excellent Pea ... 6 feet 1 6

YORKSHIRE GEM ... 3 feet 1 6

JOHN BULL.—In the way of Stratagem ... per pint, 2/- 3 feet —

VEITCH'S PERFECTION.—Fine flavour ... 3 feet 1 6

We offer a choice stock of the true variety.

EAST ANGLIAN.—Prolific masses of well-filled pods ... 3 feet 1 9

ROBERT FENN.—First Class Certificate, R.H.S. Very prolific; broad, straight, well-filled pods ... 2½ feet 2 0

AUTOCRAT.—First Class Certificate, R.H.S. A fine late wrinkled Marrow, with large broad pods ... 4 feet 2 0

TRIUMPH (Sharpe).—A blue wrinkled Marrow of fine flavour; large, curved, well-filled pods ... 3 feet 1 6

EMPRESS.—A late green wrinkled Pea of robust habit; flavour first-class; a heavy bearer ... 5 feet 2 0

CARTERS' VICTORIA.—Very productive, and of excellent quality ... 6 feet 2 0

YORKSHIRE HERO.—A fine Pea, of good flavour ... 3 feet 1 3

EMPEROR OF THE MARROWS ... 6 feet 1 9

PEAS FOR PODDERS AND MARKET GARDENERS.

Being one of the largest Producers of Seed Peas in the country, we are in a position to give very low quotations per

Bushel and Quarter for the best varieties for Field Crops and Market Gardens.

CARTERS' HAND-PICKED PEAS—Latest Variety.

CARTERS' MICHAELMAS PEA.

The only late Pea awarded honours in the Royal Horticultural Society trials, 1896.

Photographed from Nature and Copyrighted by J. C. & Co.

PHOTOGRAPH TAKEN FOUR DAYS AFTER MICHAELMAS.

Carters' Michaelmas Pea.—For many years past we have conducted experiments in our Pea trials, with the object of establishing a stock which shall provide the table with "Green Peas" beyond the period hitherto furnished by the varieties in cultivation, and we have now succeeded in fixing the character of a Pea which quite oversteps the boundary hitherto set by the times and seasons, and offer to the public our Michaelmas Pea as an absolutely distinct Pea. Late varieties of Peas of past fame have been late mainly by reason of their strawy character, and consequent tardy development to maturity, but in Carters' Michaelmas Pea the constitution of the Pea is not run through in straw, but we have fixed a dwarf bushy growth of $2\frac{1}{2}$ feet, which holds back its natural force and throws it into the pods; consequently, while being very prolific, its colour in pod is of the deepest green, and its pods are large and well filled. We have proved this Pea to possess a reserve of strength which will enable it to resist the drought and the mildew to a degree hitherto unknown in a Pea, and to preserve the sweetest flavour in the Peas for table, after other varieties have become hardened, dry, and mealy.

Report upon Carters' Michaelmas Pea, Royal Horticultural Society, 1896.

"CARTERS' MICHAELMAS.—Though the crop was by no means ready a few pods were sufficiently advanced for testing the quality, and the luxuriant green of the plants and their freedom in bearing, lead the Committee to regard this Pea as a late variety of much promise; it was certainly distinct from all others, and had withstood the drought well."—*Journal of Horticulture*.

An eminent cultivator, in Co. Durham, writes:—"Carters' Michaelmas Pea stood the dry weather well. This is a most useful variety, and I am now gathering a second crop, September 14th. It stood the dry weather better than any other Pea in the trial of 20 sorts."

"LATE PEAS.—This season Carters' Michaelmas Pea has again asserted its superiority as a late Pea, and on October 11th we gathered a nice dish. I have had several other late varieties on trial, and treated precisely the same, but these have gone, having given their last supply about the middle of September. On the Michaelmas Pea there were plenty of blooms and pods, until the frost of the 6th and 7th inst. The older varieties, such as Ne Plus Ultra and British Queen, are good, but have not the stamina of the newer varieties. This season, in the month of August, we had a splendid lot of high quality; but with the advent of wet weather, these latter varieties were soon in a state of collapse. The Peas of more modern production are not so tall-growing as the old varieties, and are therefore better able to withstand the variations of weather, and are not so prone to mildew."

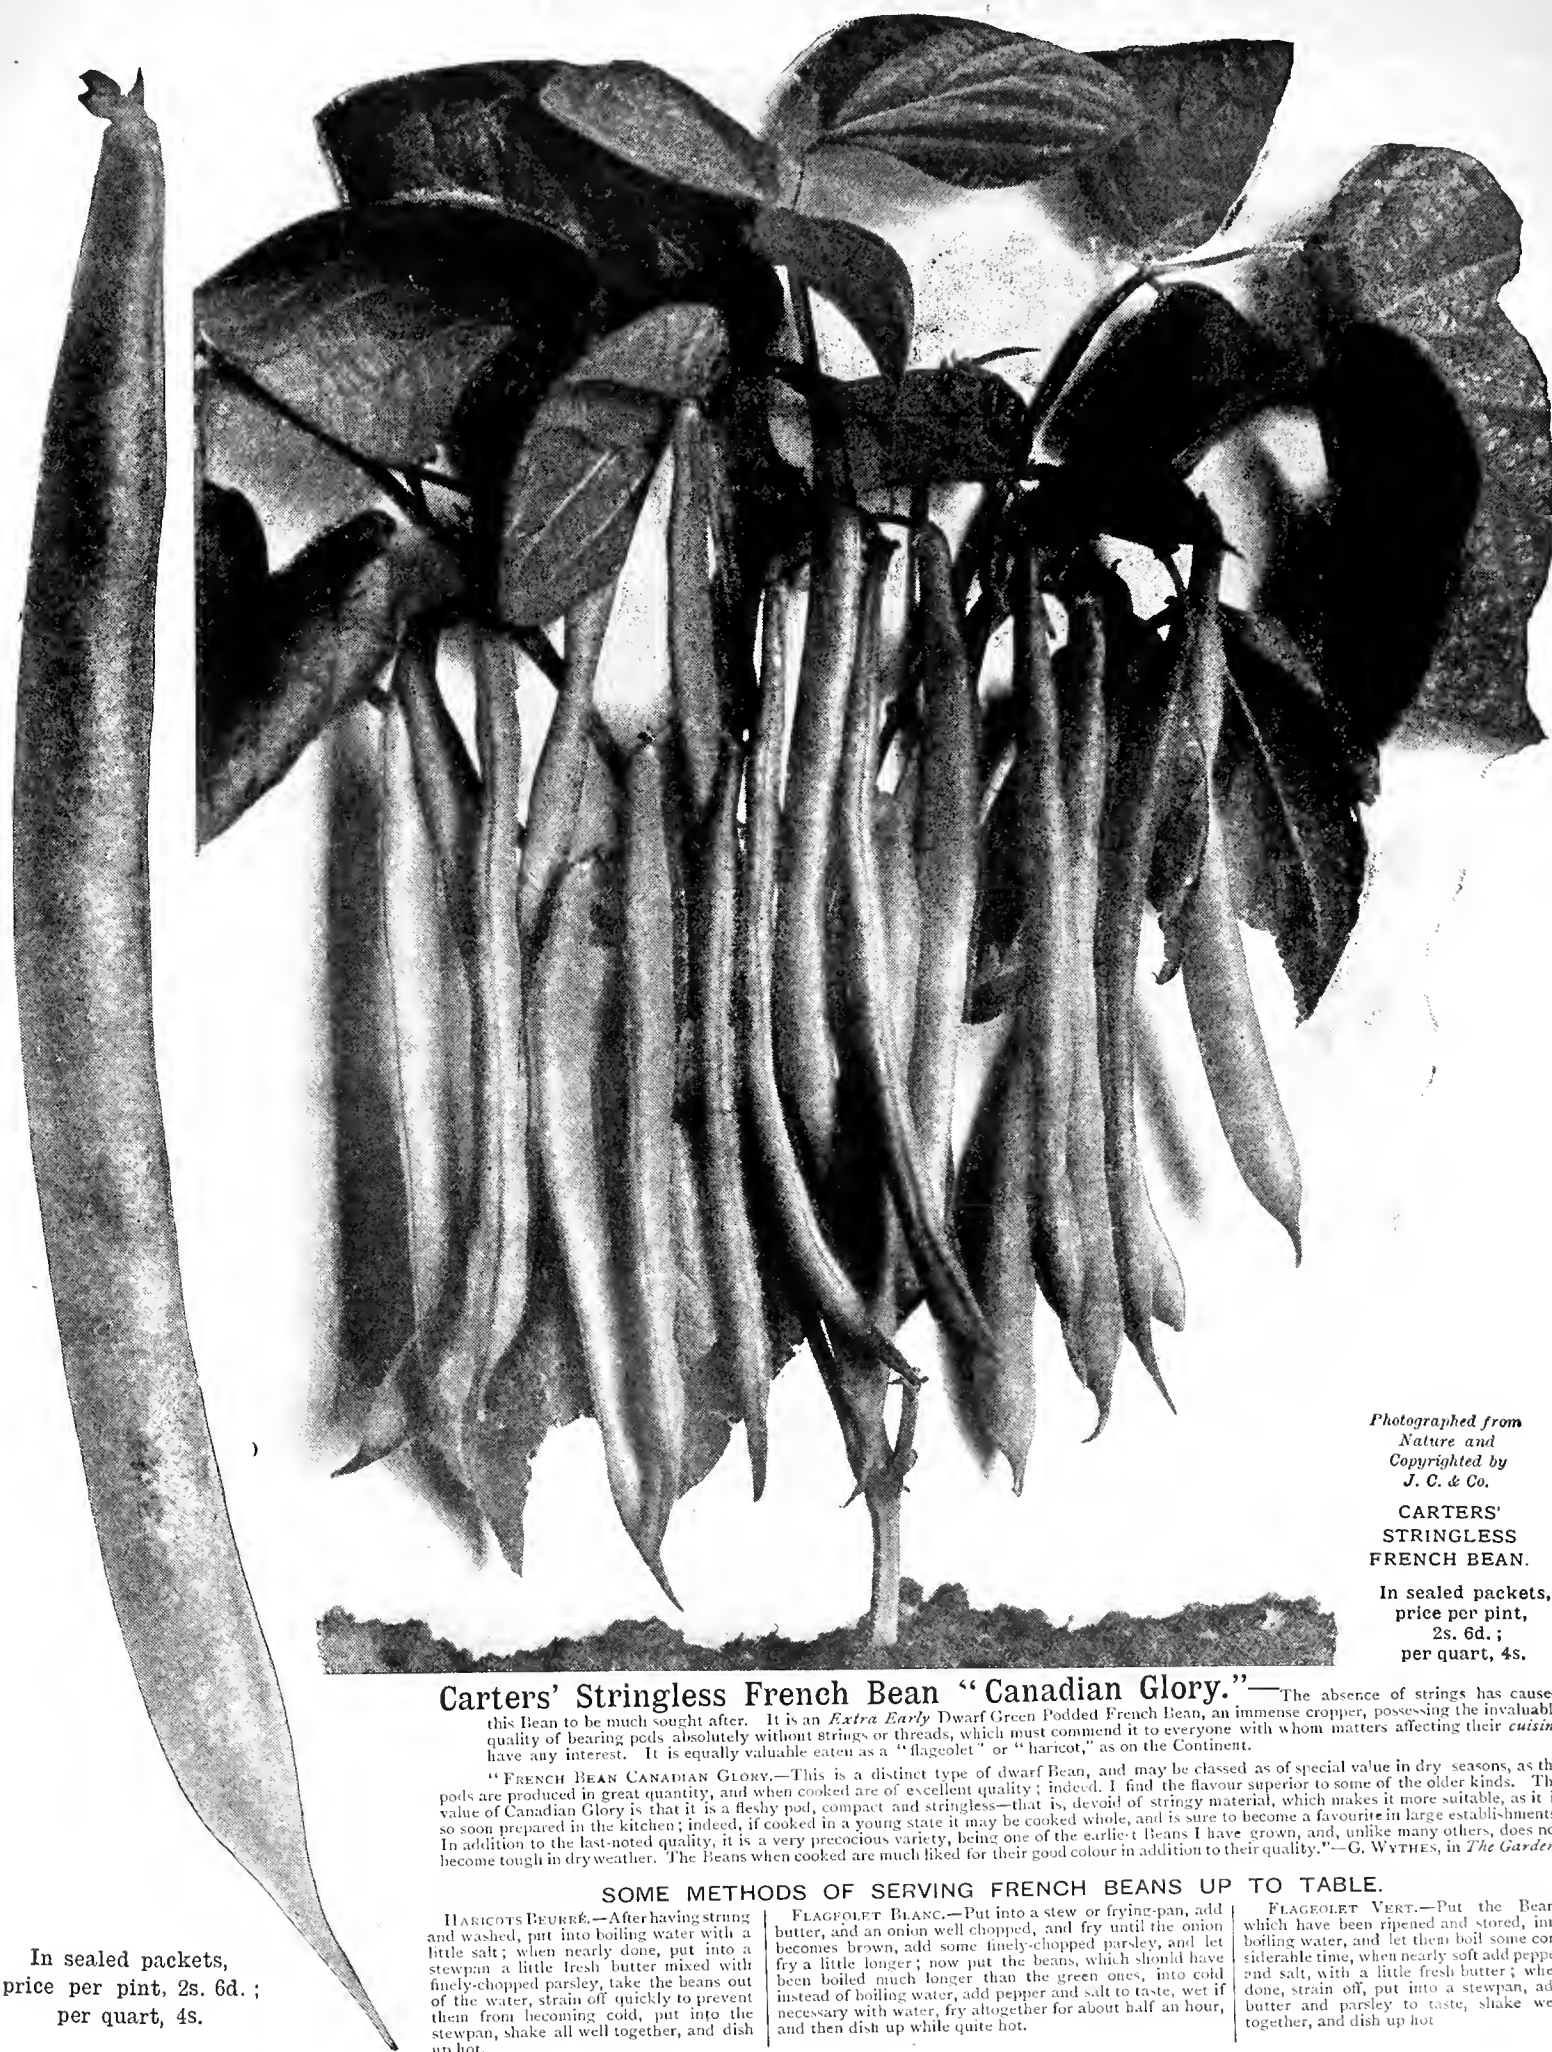

W. A. COOK, Compton Bassett, in the *Gardeners' Magazine*, Oct. 23rd, 1897.

This Pea naturally matures very late in the season, and we had great difficulty in harvesting the seed, consequently our stock is extremely limited.

In sealed packets, price 2s. per pint; 3s. 6d. per quart.

CARTERS' HAND-PICKED DWARF OR FRENCH BEANS.

A BEAN ABSOLUTELY WITHOUT STRINGS.

*Photographed from
Nature and
Copyrighted by
J. C. & Co.*

**CARTERS'
STRINGLESS
FRENCH BEAN.**

In sealed packets,
price per pint,
2s. 6d. ;
per quart, 4s.

Carters' Stringless French Bean "Canadian Glory."—The absence of strings has caused this Bean to be much sought after. It is an *Extra Early Dwarf Green Podded French Bean*, an immense cropper, possessing the invaluable quality of bearing pods absolutely without strings or threads, which must commend it to everyone with whom matters affecting their *cuisine* have any interest. It is equally valuable eaten as a "flageolet" or "haricot," as on the Continent.

"**FRENCH BEAN CANADIAN GLORY.**—This is a distinct type of dwarf Bean, and may be classed as of special value in dry seasons, as the pods are produced in great quantity, and when cooked are of excellent quality; indeed, I find the flavour superior to some of the older kinds. The value of Canadian Glory is that it is a fleshy pod, compact and stringless—that is, devoid of stringy material, which makes it more suitable, as it is so soon prepared in the kitchen; indeed, if cooked in a young state it may be cooked whole, and is sure to become a favourite in large establishments. In addition to the last-noted quality, it is a very precocious variety, being one of the earliest Beans I have grown, and, unlike many others, does not become tough in dry weather. The Beans when cooked are much liked for their good colour in addition to their quality."—G. WYTHES, in *The Garden*.

SOME METHODS OF SERVING FRENCH BEANS UP TO TABLE.

HARICOTS BEURRE.—After having string and washed, put into boiling water with a little salt; when nearly done, put into a stewpan a little fresh butter mixed with finely-chopped parsley, take the beans out of the water, strain off quickly to prevent them from becoming cold, put into the stewpan, shake all well together, and dish up hot.

FLAGEOLET BLANC.—Put into a stew or frying-pan, add butter, and an onion well chopped, and fry until the onion becomes brown, add some finely-chopped parsley, and let fry a little longer; now put the beans, which should have been boiled much longer than the green ones, into cold instead of boiling water, add pepper and salt to taste, wet if necessary with water, fry altogether for about half an hour, and then dish up while quite hot.

FLAGEOLET VERT.—Put the Beans which have been ripened and stored, into boiling water, and let them boil some considerable time, when nearly soft add pepper and salt, with a little fresh butter; when done, strain off, put into a stewpan, add butter and parsley to taste, shake well together, and dish up hot.

In sealed packets,
price per pint, 2s. 6d. ;
per quart, 4s.

CARTERS' HAND-PICKED BEANS. RUNNER BEANS.

The Cultivation of Runner Beans.—Runner Beans should be planted out of doors about the 1st of May, followed by successional sowings at intervals of a fortnight; by this means an abundant supply is provided until the plants are destroyed by the autumn frosts. Care should be taken when planting that sufficient space is allowed between the rows (say 3 feet), and 12 inches from plant to plant in the rows. If slugs are troublesome during the young stage of growth, dust over with soot and lime.

Carters' Jubilee Runner.—(See Illustration page 19.)

This extraordinary Bean was first brought to the notice of our customers in 1888, and it still remains the longest-podded variety in cultivation, and its records on the exhibition table stand unrivalled. It was also the best Runner Bean in the Royal Horticultural Society's Gardens at a recent trial. Carters' Jubilee Runner produces an enormous crop of immense pods, which are thick, of marvellous length, and unusually fleshy, the flavour being all that is desired. We had some pods sent us measuring 14 inches long; they were exhibited in our Establishment and caused quite a furore.

In sealed packets, 2s. 6d. per pint.

"Carters' Jubilee Runner gave great satisfaction. It was a mass of white flowers. We cut bundles of flowers for decoration, and then had an enormous crop of Beans."—Mr. PALMER, West Winch.

"This Bean I grew in large pots forced, and it produced enormous crops. Equally prolific in the open, and of splendid quality."

Mr. G. WYTHES, Head Gardener to Earl Percy.

Carters' Holborn Masterpiece.—One of the earliest and finest-flavoured Beans we have met with.

In sealed packets, price 2s. per pint.

Carters' Champion Scarlet Runner.

—A great improvement upon the old Scarlet Runner, and very popular in many well-regulated gardens... per pint, 1/9; per quart 2 6

The true variety should be obtained direct from us.

Carters' Elephant Runner.—(See Illustration, page 19.)

In sealed packets, 2s. per pint packet.

"Many of the runner Beans are too large and coarse, and find little favour in the kitchen, but though the above variety is long in the pod, it is neither thick, stringy, nor ill-shaped. As an exhibition sort it should take high rank."—*The Garden*.

"I have for two successional years taken first prize here in our Annual Vegetable Show, &c., with your 'Elephant' Runner."—Sergt. O. G. BUSH, Forton.

	Per quart—s. d.

DWARF, OR FRENCH BEANS.

The Cultivation of French Beans.—Sow in pots under glass for forcing from December to April, and about May 1st in the open borders, followed by two or three successional sowings at intervals of a fortnight. The rows ought to be from 2 feet to 2 feet 6 inches apart; the plants thinned to about 1 foot apart.

CLIMBING FRENCH BEAN.—(See Illustration below.)

In sealed packets, price 1s. 9d. per quart.

Photographed from Nature and Copyrighted by J. C. & Co.

CLIMBING FRENCH BEAN.

This novel type was first introduced to public notice by Mr. H. W. Ward, the late well-known gardener at Longford Castle. It has all the characteristics of the *Dwarf Canadian Wonder*, from which it was probably obtained, and the fact of its climbing habit is considered by some to induce greater productiveness; at any rate the Royal Horticultural Society granted it their leading honour chiefly on account of this feature.

In sealed packets, price 1s. 9d. per quart.

Carters' New Stringless.—(See page 17.)

Carters' Canadian Wonder.

—We were one of the first to make the merits of this fine dwarf Flageolet Bean known, and its popularity to-day is probably unequalled by any other variety. It is a robust and healthy Bean, and seems to withstand the vicissitudes of our uncertain climate better than others. The pods are of great length and good for exhibition. This is a reselected stock, of which we have only a limited quantity 2 0

CANADIAN WONDER (ordinary variety) 1 0

Carters' Longsword.—One of the best and most distinct dwarf Beans for forcing; likewise a useful garden variety.

In sealed packets, price 2s. per pint.

Carters' White Advancer.—At the Chiswick

Trials of French Beans this variety was specially rewarded with a *First Class Certificate* for its great productiveness, earliness, and longpods 2 0

CARTERS' HAND-PICKED BROAD BEANS.

**CARTERS'
LEVIATHAN,**

price per pint, 1s. 9d.;
per quart, 3s.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

Carters' Leviathan.—We offer a carefully re-selected stock of this the longest podded and finest Broad Bean in cultivation, producing enormous pods, measuring 13 to 21 inches in length; most prolific, and specially recommended for exhibition.

Since the introduction by us of this fine Bean, many so-called longer podded varieties have been brought forward, but none have proved superior, and it stands to-day as the greatest acquisition in its class.

Carters' Leviathan has been awarded the most Important Prizes in all the Great Competitions, and is almost invariably the variety of Broad Beans staged in Prize Collections of Vegetables, notably at the Exhibitions of the Royal Horticultural Society, and at Manchester, Edinburgh, Glasgow, Reading, and other Important Provincial Shows. It formed a conspicuous dish in the Collection of Vegetables exhibited by one of our customers at the meeting of the Royal Horticultural Society, July 13th, 1897, and to which a Gold Medal was awarded.

In sealed packets, per pint, 1s 9d.; per quart, 3s.

PODS SIXTEEN INCHES LONG.

"Carters' Leviathan Broad Bean is the finest I ever saw grown. I had some myself 16 inches long."—Mr. E. HAMMOND, Knighton.

EIGHT BEANS IN A POD.

"I have grown Carters' Leviathan Bean two Seasons and think it is a grand Bean. I have had a splendid crop this year, plenty of pods containing 8 Beans, which were pronounced at table to be of delicious flavour, and admired by all who have seen them."

Mr. W. EDWARDS, The Gardens, Grove Lodge.

BEST IN EIGHT PARISHES.

"It may interest you to know that, at the Bawdsay and District Show (open to eight Parishes, and held at Hollesley), I took First Prize with Carters' Leviathan Longpod Beans."

Mr. J. CHAPLIN, Ramsholt.

TWO FIRST PRIZES.

"I have taken two or three First Prizes with your well-known 'Leviathan' Broad Bean at the Cannington Flower Show."—Mr. H. CAPLE, Cannington.

IMMENSE PODS.

"We did well with your Leviathan Broad Beans. They were wonderfully prolific, producing immense pods which were admired by many people."—Mr. F. H. HANCOCK, Frome.

IMPORTANT NOTICE.

The unparalleled success of this Bean upon the Exhibition Table has led to inferior sorts being offered as Carters' Leviathan. None are genuine, as sent out by us, unless in our sealed packages.

CARTERS' HAND-PICKED BROAD BEANS.

The Cultivation of Broad Beans.—Early Mazagan and Dwarf Fan Beans should be planted in November, and a second sowing made in February, the rows being about 15 inches apart; to be followed by the Long-podded and Windsor varieties to secure a succession. The later sorts should be about 6 inches from plant to plant, and 3 feet from row to row. This crop succeeds best on rich soil in an exposed position. On light and dry soils it generally gets attacked by the black blight and spoils. (See CARTERS' PRACTICAL GARDENER, price 1s.; post free, 1s. 3d.)

Per quart—s. d.

Carters' Harlington Green Windsor.

(RE-SELECTED)—A distinct and valuable Green selection from an old favourite variety. These Green Beans are preferred by many on account of their colour when sent to table. (See Illustration) ... 2 6

"A very fine flavoured Bean, superior to the old Green Windsor."

Mr. H. C. WILLIAMS, Head Gardener to the Earl of Lisburn.

"We find it to be very superior in quality to any other we have grown."
Mr. T. ORMISTON,

Head Gardener to the Earl of Mar and Kellie, Alloa Park.

"A superior strain of this very fine Bean."—Mr. R. P. BROTHERSTON,
Head Gardener to Rt. Hon. Earl of Haddington, Tynninghame.

Carters' Improved Windsor.

—Large and productive, bushy habit, well podded from top to bottom of stem; the best of all the White Windsor Beans ... 1 3

Seville Giant Longpod.

—Distinct and handsome, 18 inches high, with pods often 12 inches in length. Awarded a First-Class Certificate by the Royal Horticultural Society ... 1 6

Carters' Mammoth Longpod.

(See Illustration.) A decided improvement upon the Early Longpod. Sent out originally by us. The dry Seed of this Bean is smaller than many others, but it is certain to produce the longest and best-filled pods in its section ... 2 6

Carters' Masterpiece Longpod.

—An exhibition Green Longpod Bean. It combines the earliness of the Seville, partakes of the length of pod of the Aquadulce; and possesses the fine quality and flavour of the Green over the White Bean. It is most prolific, a great part of the pods hanging in pairs ... 2 0

"A grand cropper; pods long and well filled; quality excellent."

Mr. J. APLIN, The Gardens, Hasfield Court.

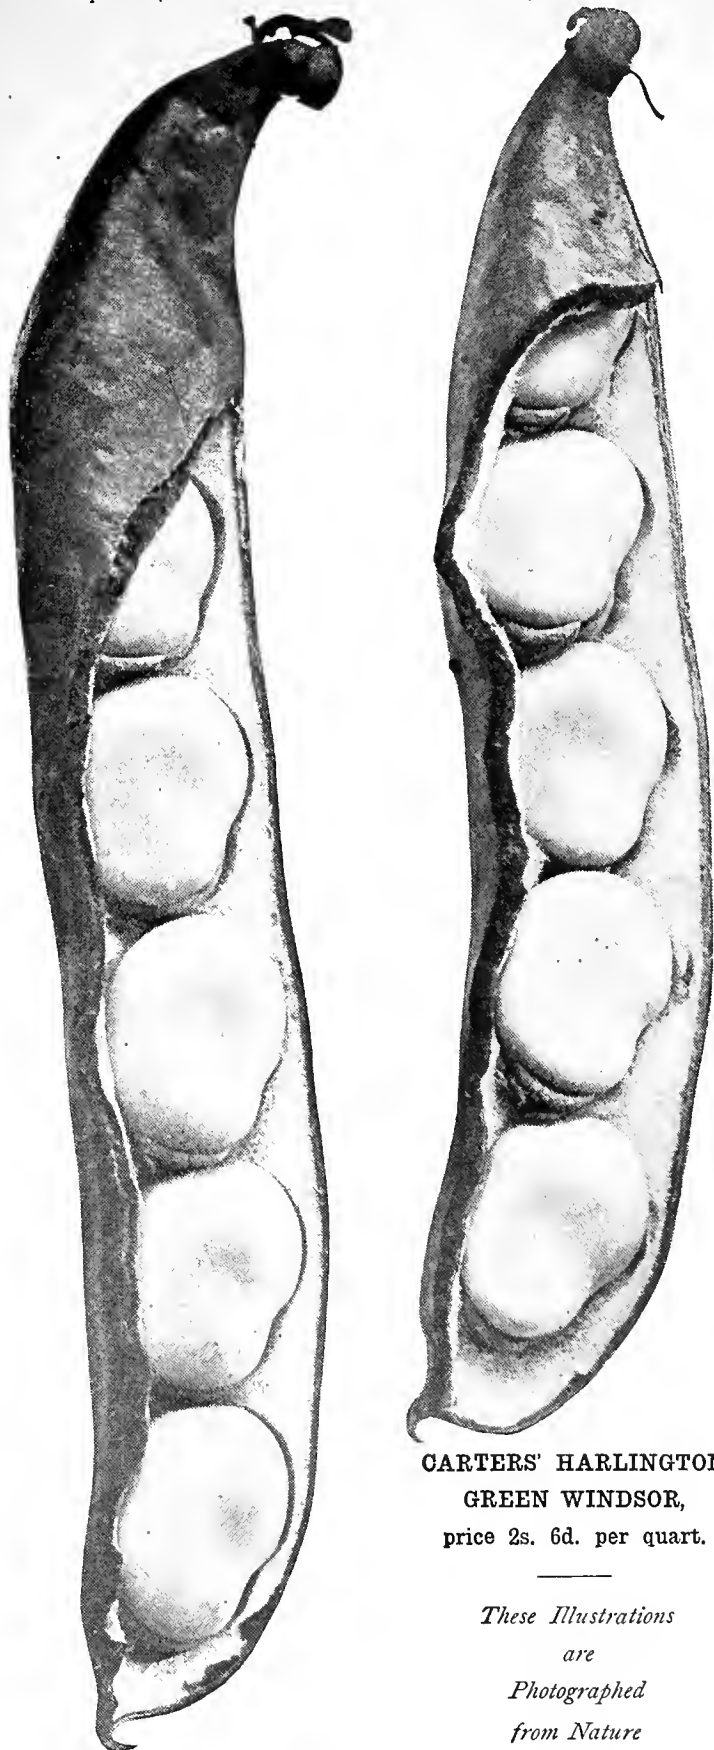

"This is certainly one of the heaviest cropping varieties I have grown. The pods are well filled with Beans of a Dark Green colour, which, when cooked, resemble those of the Green Windsor."

Mr. H. C. PRINSEP, The Gardens, Buxted Park.

BRUSSELS SPROUTS.

The Cultivation of Brussels Sprouts.—Sow the seed early in March for first crop, and again late in April for succession; transplant into good ground made thoroughly firm, when the plants are large enough to handle. (See CARTERS' PRACTICAL GARDENER, price 1s.; post free, 1s. 3d.)

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' HOLBORN EXHIBITION.

In sealed packets, price 1s. each; 1s. 9d. per ounce.

Carters' Holborn Exhibition.—(See Illustration.)

A very fine strain, the result of many years careful selection. Its points for size, colour, and productiveness are good all round, and it is a special favourite with many of our best-known market growers. In Mr. Empson's Gold Medal Collection of Vegetables, Potatoes, &c., at the meeting of the Royal Horticultural Society in October, 1896, Carters' Holborn Exhibition Brussels Sprouts were prominently staged and generally admired for their close texture and colour.

In sealed packets, price 1s. each; 1s. 9d. per ounce.

ADVANTAGE OF GROWING THE BEST.

Important Testimonial from one of the largest Market Growers in Essex.

“December 30th.

“I enclose cheque for £50. The few pounds of Holborn Exhibition Brussels Sprouts have proved every word you have said about them, they are large, solid, and a splendid colour. I have seven acres, and have been picking this last ten weeks and shall keep on right up to March next; the Sprouts average about 800 pecks per acre. I am well pleased with them, for they are the best I ever grew.”

(Signed) E. J. STEWARD.

“Please send another ounce of your fine Sprouts; I think they are called *Exhibition*. They were certainly the best I have ever grown.”—Mr. D. McDONALD Head Gardener to Sir Charles Nicholson, Bart.

“Carters' Holborn Exhibition Brussels Sprouts stand 2 ft. 6 in. high, and are covered with buttons from top to bottom. I have never seen any to equal them.”—Mr. J. CHILDS, Herts.

In our large exhibit at the Royal Aquarium Show, November 4th to 6th, 1896, our Holborn Exhibition Brussels Sprouts were pronounced to be the best ever seen, and largely contributed to the Silver Medal that was awarded our House.

CARTERS' DWARF EXTRA CURLED KALE.

In sealed packets, price 1s. 6d. and 1s. each.

Carters' Welsh Kale. (See Illustration.)

Very distinct and superior, the leaves exquisitely fringed and curled to a degree hitherto unknown in this useful Winter Vegetable. The general appearance of the plant is most striking and pleasing. The rich glaucous green colour, the delicate fringe of the leaves, and the dainty flavour when cooked, place this novelty in the front rank.

"Carters' Welsh Kale is delicious, and it looks so well when cooked."—Mr. G. BURTON, Essex.

In sealed packets, 1s. 6d. and 1s.

Carters' Purple Plume Kale.

Leaves of a rich purple, very handsome; a useful vegetable as a winter dish or for garnishing.

In sealed packets, 1s. 6d. and 1s.

Carters' Dwarf Extra Curled Kale.

(See Illustration.)

This is a Re-selected form of the Curly Kale so popular in the North. It will resist the most intense frost, and makes a delicious winter dish.

In sealed packets, 1s. 6d. and 1s.

Carters' Phoenix Kale.

Introduced to general notice by us for an important firm in the North. It is a valuable addition to the mid-winter group of garden vegetables, being most prolific, and the colder the weather the more delicate and tender are its sprouts.

PHOENIX KALE.—"G. W. R." writes from Stockport: "I have some plants of Phoenix Kale which have been supplying us with greens since April. The plants are big bushes now, although they have been cut down several times. It is a good, useful vegetable, and should be grown by all who have a garden."—*Amateur Gardening*.

In sealed packets, 1s. 6d. and 1s.

Carters' Improved Garnishing.

This is not only a valuable Winter vegetable, but also produces a variety of distinct and beautiful shades of colour in its various tinted leaves that are useful for many decorative purposes.

"The Variegated Garnishing Kale I had of you last season has turned out truly beautiful. I have grown it well in good loamy soil, and the different colours are very handsome. Many people have enquired where I obtained it, and its use. Its eating quality also is splendid."—Mr. W. KNIGHT, Isleworth.

In sealed packets, 1s. 6d. and 1s.

Carters' Thousand-headed (Re-selected).

This garden selection withstands the most severe frost. It is remarkably tender when cooked after a hard frost.

PRIZES.

We have for a number of years offered a large sum of money for competition amongst our customers, at various Horticultural Exhibitions throughout the country, mostly for the best Collection of Vegetables. It has sometimes been found difficult to clearly understand what Vegetables should or should not be included, and the point has led to discussion, and often disappointment.

In view of this, we propose to offer these Cash Prizes during the coming season under a new system, which we hope will have general approval, both from the managers of Shows as well as the exhibitors. Our offer will take the following form:—

MESSRS. CARTERS' CASH PRIZES FOR 1898.

JAMES CARTER & CO., The Queen's Seedsmen, of 237, 238, 246, & 97, High Holborn, London, undertake, upon being furnished with authentic evidence from the Manager or Secretary of any of the Horticultural Societies mentioned below, to duplicate all First, Second, or Third Money Awards made to Exhibitors who show the products of Seeds, Potatoes, or Bulbs, from purchases above 10s. in value made direct from Messrs. Carters' establishment during the twelve months ending June 30th, 1898. These said products to be of the Exhibitor's own growth, and in case of any dispute the copy of Invoice may be required. Otherwise the goods are to be staged in accordance with the regulations of the Society, and only in those classes that are open. Special prizes offered by Firms and individuals will not be considered.

Customers' intending to claim the advantages of these Special Prizes must notify the fact to us a fortnight before the day of the Show, stating the variety or varieties of Vegetables, Potatoes, or Flowers they intend to exhibit, when we will send neatly printed cards which must be exposed to view on the exhibit during the whole time of the Exhibition. No other placards except the official cards of the Society will be permitted.

If this offer does not appear in the Prize Schedules of the Horticultural Shows mentioned below, our offer must be considered cancelled, unless some special arrangements are made direct between us and our customer two weeks before the exhibit is staged.

EXAMPLE.—If 20s., 10s., and 5s. are offered by the Society as Prizes for, say, the best dish of Peas, James Carter & Co. will award an equal amount if their customer gains one or other of them, and has carried out the above conditions.

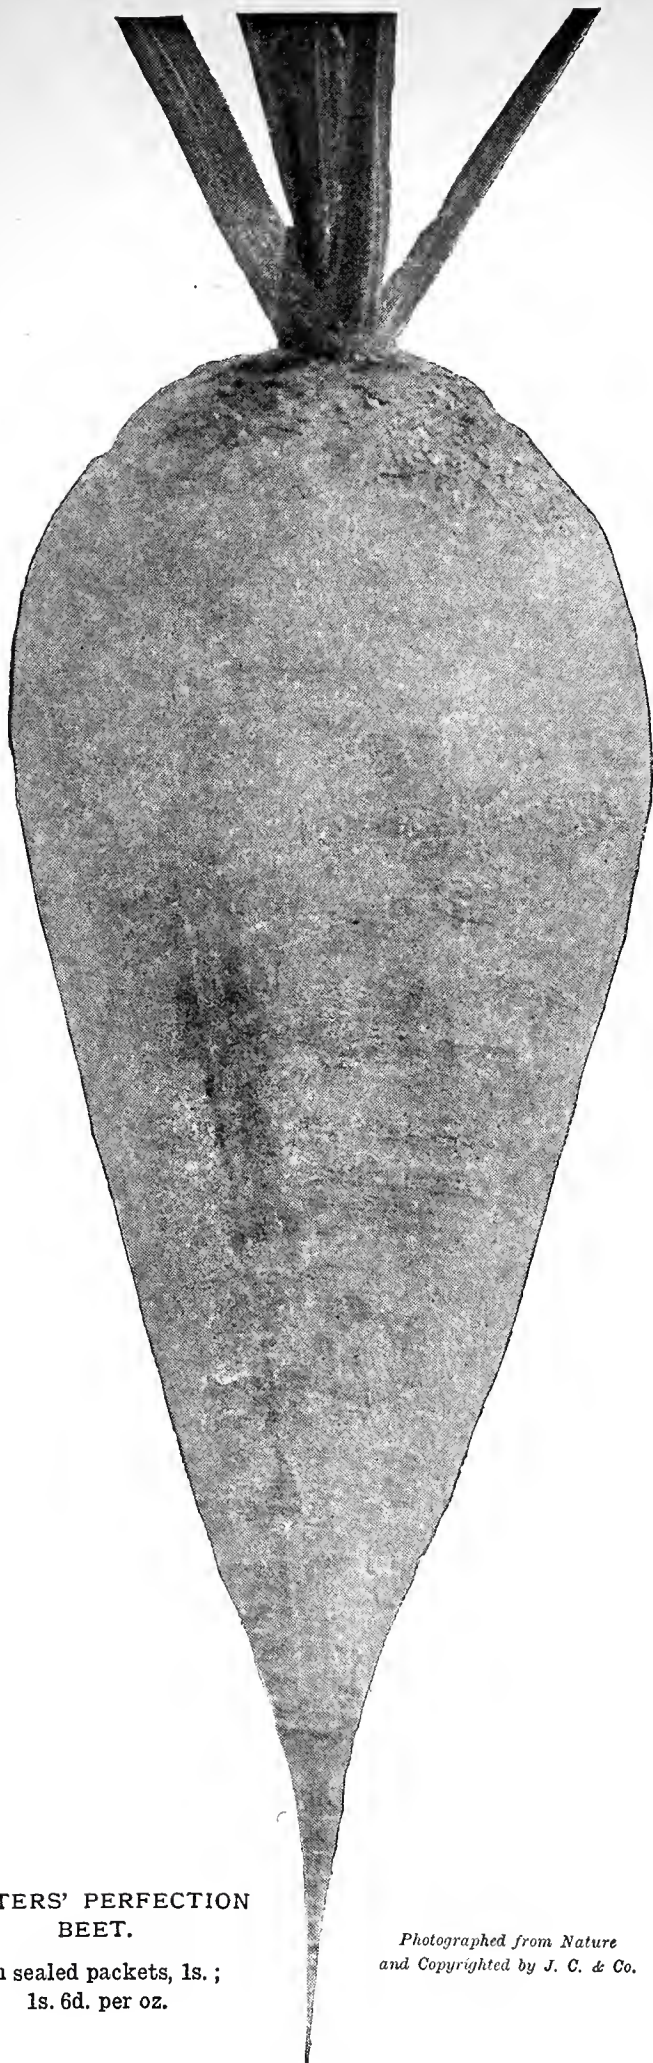

These Prizes are open to Amateurs and Gentlemen's Gardeners *only*, Market Gardeners, Seedsmen's Agents, &c., not eligible.

WE HAVE MADE THIS OFFER TO THE FOLLOWING SOCIETIES:—

BEET.

The Cultivation of Beet.—The seed should be sown the last week in April, on ground that has been well trenched and manured. Let the rows be about 18 inches apart, thin them to allow about 9 inches between the plants, and keep the soil well-stirred with the hoe during Summer.

**CARTERS' PERFECTION
BEET.**

In sealed packets, 1s. ;
1s. 6d. per oz.

Carters' Crimson Ball.—An extra early Summer Beet.

Awarded a Special First Class Certificate at the Vegetable Conference of the Royal Horticultural Society; also included in our customer's Gold Medal Group of Vegetables, &c., Royal Horticultural Society, October 1896.

This is a great acquisition to our list of round Beets, having a fine small top, *very sweet, flesh firm, and bright blood colour.* It is valuable alike for private gardens and for market gardeners, on account of its extreme earliness, as well as its numerous other good qualities.

"Those who require early Beetroot will find this a very fine type for early Spring sowing. Last season I had it ready for table the last week in May."

Mr. G. WYTHES, Head Gardener to Earl Percy, in the *Garden.*

"I should like to direct attention to Carters' Crimson Ball as an early Beet of great value. It turns in quickly, and the roots are bright in colour and delicate in flavour. Sown in April, the roots are fit for use at the end of June, and enable the cultivator to bridge over a season of scarcity."—W. COLEMAN, Eastnor Castle, in the *Gardeners' Magazine.*

In sealed packets, 1s. and 1s. 6d. per packet.

Carters' Perfection.

The best long Beet in cultivation; medium size, rich crimson lake colour, and splendid flavour; foliage shining and dark. Pronounced by the Royal Horticultural Society to be "perfection." In addition to its great value as a table root, we have had many records of First Prizes being awarded to our Customers.

In sealed packets, price 1s. 1s. 6d. per ounce.

BROCCOLI.

The Cultivation of Broccoli—For the earliest crop a sowing is requisite the beginning of March, and a little protection may be necessary for the seed-beds. Successional sowings should follow from March to June. Prick out into a prepared bed when strong enough, and when thoroughly established in summer transplant to permanent quarters, the earliest kinds first, to produce a constant supply of heads, until Cauliflowers are ready in July the following season. The soil should be well manured, and in good tilth and firm before transplanting.

FOR CUTTING FROM SEPTEMBER TO DECEMBER.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' SANDRINGHAM WINTER WHITE.

In sealed packets, price 2s. and 3s. each.

Carters' Autumn Broccoli.—This is the earliest white close-headed variety we know of. Its fine heads will come into use after the Early Cauliflower and before the winter Broccoli is ready—will succeed where late Cauliflower fails.

In sealed packets, price 1s. 6d. each.

Carters' Sandringham Winter White.

—(See Illustration.) We offer a choice re-selected stock of Snow's Broccoli. It is well known that a reliable strain of this popular Early Broccoli is difficult to procure, and all who wish to grow a really first-rate Vegetable should order it from us. It is distinct in growth, leaf, and flower.

In sealed packets, 2s. and 3s. per packet.

FOR CUTTING FROM JANUARY TO APRIL.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' MAMMOTH SPRING WHITE.

In sealed packets, price 1s. 6d.; per ounce. 2s. 6d.

Carters' Improved Early Purple Sprouting.

—A select market gardener's stock; much earlier than the ordinary Sprouting; a delicious vegetable, producing fine sprouts of a beautiful green colour when boiled; remarkably hardy

Per packet, 1s.

Carters' Pyramid.—The habit of the plant is pyramidal, with myriads of bunches or sprouts much larger than are to be found in any variety already in commerce, and borne in such profusion as to suggest one large head of Broccoli when seen from a little distance. It will stand a severe Winter unharmed, and is of the most delicious flavour when cooked.

In sealed packets, 1s. 6d. and 2s. 6d. per packet.

Carters' Mammoth Spring White.

—(See Illustration.) One of the largest and best late Winter Broccolis; immense white heads, well protected by the leaves, and flavour most excellent; highly recommended.

Price, in sealed packets, per packet, 1s. 6d. 2 6

BROCCOLI.

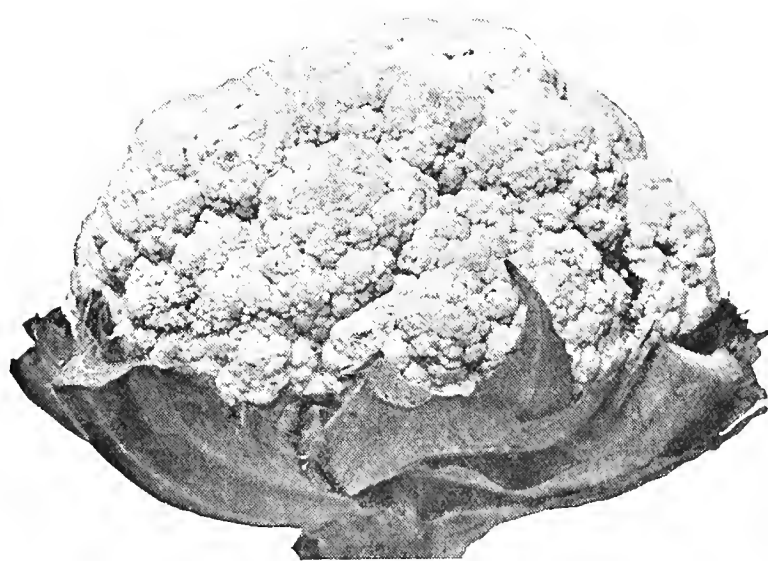

FOR CUTTING FROM APRIL TO JULY.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' SUMMER.

In sealed packets, price 1s.; per oz., 1s. 9d.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' UNIVERSAL PROTECTING.

In sealed packets, price 2s.

Carters' Summer.—(See Illustration.) Long recognised as one of the latest and best Broccoli. It is very distinct in seed, foliage, and head from all other sorts, and cannot be too highly recommended. This Broccoli resists the most intense frosts,

In sealed packets, per packet, 1s. ; per oz. 1s. 9d.

Carters' Champion.—An old-established favourite, but still one of the best for early summer use. It carries a very white head, and is altogether a superior variety.

In sealed packets, per packet, 1s. ; per oz., 1s. 9d.

JUNE MONARCH.—A large late variety of high quality, very popular in the North of England ... Per packet 1 6 —

PERFECTION LATE WHITE

In sealed packets, per packet, 1s. & 1s. 6d. —

CATTELL'S ECLIPSE ... 1 3

VEITCH'S MODEL.—Perfect in form, compact white heads ... 1 3

EVESHAM GIANT.—Largely grown for the Birmingham market... 1 6

LATE QUEEN.—Recommended ... Per packet, 1s. 6d. & 2s. 6d. —

Carters' Universal Protecting.—(See Illustration.)

This is between a Broccoli and a Cauliflower, coming in after the latest Broccoli and before the earliest Autumn Cauliflower. It produces large heads, compact and pure white. Its leaves envelop the head very closely, similar to an Autumn Protecting Cauliflower, and keep it in a tender state until July. Even in the hottest summer it has withstood the natural tendency to throw out its seed-stalks, and we have found difficulty in harvesting the seed. It has also resisted the late cold winters when placed in the most exposed situation on our farms. No matter what the winter or what the summer is, this Broccoli will prove itself as the surest-heading late Broccoli yet offered, and a decided acquisition to growers.

In sealed packets, per packet, 2s.

Carters' Universal Broccoli.—"I noted some time ago that this was the only hearting Broccoli that had come safely out of the winter ordeal. It is not only the one sort that did not succumb, but is also a valuable late variety, and has overlapped early Cauliflower by a few weeks.

Journal of Horticulture, June 27th, 1895.

"I grew several different sorts of Broccoli, but Carters' Universal stood the severe winter best, and is very useful because of its lateness. It is the best I have ever grown."

Mr. W. N. THURSTON, Head Gardener to Right Hon. Lord Wodehouse

The following varieties can also be supplied:—

"I have pleasure in advising you that during the 18 years I have dealt with your firm I have secured a very large number of prizes at various shows. I secured 21 prizes at the late show at Ashby-de-la-Zouch in July last, and although the season has been so dry my crops have been excellent."—Mr. T. PALING, Nuneaton.

"I hope the seeds will turn out as well as last year. They greatly helped me to win 33 prizes at one show—19 being first prizes. I cannot wish for better."

Mr. T. KING, Bromham.

CARTERS' SELECTED CABBAGE.

AWARDED SILVER MEDAL,

ROYAL HORTICULTURAL SOCIETY, OCTOBER 12th, 1897.

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' EARLY HEARTWELL CABBAGE.

In sealed packets, price 1s. per packet, 1s. 6d. per ounce.

The Cultivation of Cabbage, Colewort, etc.—By a little careful arrangement Cabbages can be had almost all the year round. An early variety sown in the Spring will come into use in the Summer; a main crop variety sown in the Spring will come in during late Summer or Autumn. Sowings made during July of an early kind will come into use during October and November, whilst sowings made towards the end of August will be fit for cutting in the Spring. Cabbages require a rich deeply dug and well-drained soil; when planted out from the seed-bed they should stand 15 to 30 inches apart, according to habit and growth of the variety.

Carters' Early Heartwell.—(See Illustration.) The finest early Cabbage in cultivation. Very distinct, indispensable both for the gentleman's garden and for market purposes. The heads are extremely firm, weighing from 4 to 6 lbs. Sown in Spring, it will be fit to cut during Summer; sown in August, it may be expected to be ready during April and May.

In sealed packets, price 1s. per packet 1s. 6d. per ounce.

"I may state I have cut some splendid Cabbage of your 'Heartwell Marrow,' commencing the first week in May, some 5½ lbs., 4 lbs., 3 lbs., &c. Cabbages not leaves.—Mr. W. T. WRAY, Newland Trough.

Carters' Mammoth Beefheart.—(See Illustration.) The best main-crop Garden Cabbage in cultivation; very large firm heads of exquisite flavour, few outside leaves, and does not readily run. The largest Summer Cabbage grown, and invaluable both for table and exhibition.

"I took first prize with Carters' Mammoth Beefheart. Some of them weighed 30 pounds." Mr. W. ALEXANDER, Co. Down.

In sealed packets, price 1s. per packet, 1s. 6d. per ounce.

Carters' White Prizetaker.—Close short leaves and white heart, a heavy producer, and comes in early.

In sealed packets, 1s. per packet —

Carters' Early.—A good Cabbage. It possesses a robust constitution, and will be found useful in cold situations.

Price per packet, 1s.

Carters' Model.—(See Illustration.) This is a very distinct and early variety. It grows very close to the ground, heads firm and compact. The quality is exceedingly good, flavour delicate and marrowlike. As a Summer Cabbage it will also be found invaluable.

In sealed packets, 1s. per packet 1 6

Carters' Winningstadt.—A select Cabbage. Recommended where a hardy variety is required - 8

EARLY YORK.—A useful early variety; very popular in some parts of the country - 8

CARTERS' SELECTED CABBAGE.

AWARDED SILVER MEDAL, ROYAL HORTICULTURAL
SOCIETY, OCTOBER 12th, 1897.

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' MINIATURE DRUMHEAD.

Carters' Miniature Drumhead *(See Illustration).*

—A small, early, globular-shaped Garden Cabbage of delicate flavour and good colour. Although called Drumhead from its shape, it is quite distinct from the Field Cabbage; valuable for small gardens, where only one sort is grown. The plants may be set very close together.

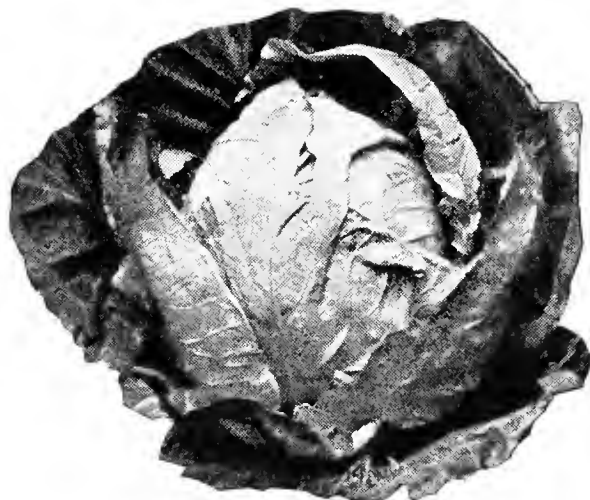

Price 1s. per packet, 1s. 6d. per ounce.

Carters' Little Pixie.—In size somewhat resembling a cricket ball; the hearts are compact and very firm; it is invaluable where the space devoted to vegetable-growing is restricted. Re-selected quality.

Price 1s. per ounce.

Carters' Red Pickling.—A greatly improved and hard-heading form of this popular Cabbage, selected for high colour and tender leaf. Undoubtedly the best pickler in cultivation.

Price 1s. per packet, 1s. 6d. per ounce.

Photographed from Nature and Copyrighted by J. C. & Co.
HARDY GREEN COLEWORT.

COLEWORT.

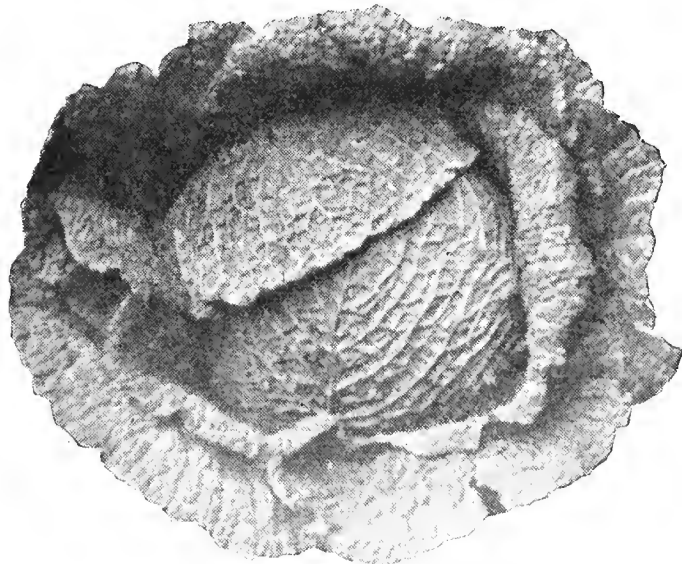

This small form of the Cabbage family is very useful in the Autumn. The plants can be grown much closer than ordinary cabbages, an advantage in gardens of limited extent.

	Per oz.—s. d.
HARDY GREEN.—Very useful	6
ROSETTE.—Neat habit	1 0

We were awarded a Silver Medal by the Royal Horticultural Society of England for a fine collection of Cabbages, Colewort, and Savoy, October 12th, 1897.

SAVOY AND CHOU DE MILAN.

The Cultivation of Savoy.—Sow in March in a seed-bed, transplant when large enough in Summer, and expect to cut during Autumn and Winter.

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' GIANT GREEN.

Carters' Giant Green *(See Illustration).*—A new selection with crimped foliage; the individual leaves are very large, but retain their tender properties longer than any other variety.

In sealed packets, price 1s.; per ounce, 1s. 6d.

Carters' Early Dwarf Ulm.—A fine re-selected stock of this popular Savoy. Early, good-flavoured, and very hardy.

In sealed packets, price 1s.

	Per oz.—s. d.

GREEN CURLED.—Original Stock	6
DWARF GREEN CURLED.—A very fine-selected stock	10
SPROUTING ULM.—Dwarf and hardy	9

CARROT.

The Cultivation of Carrot.—For early forcing sow in January in frames, in February on warm border. Make successional and main crop sowings during March and April in deep well-conditioned soil to which manure has not been recently applied, cover the seed very lightly in $\frac{1}{2}$ -inch drills, and as soon as the plants are strong enough to handle, thin out from 4 to 8 inches. Further sowings may be made up to the end of June.

Some marvellous examples of these fine Carrots were exhibited at the Meeting of the Royal Horticultural Society, October 13, 1896, by one of our customers, whose collection gained a Gold Medal.

Carters' Long Forcing.

A handsome long Carrot, with the same depth of colour and firmness of texture in its earliest stages as other Carrots possess in their later growths.

The Garden says of Carters' Long Forcing Carrot: "When it becomes better known it will be in considerable demand, as it commands great earliness, fine quality, and a desirable shape. Most of the early Carrots are of the Scarlet Horn type, but the above is more after the Intermediate class, and for that reason will be in favour on many gentlemen's tables. It grows as quickly as the earliest varieties, and is a decided acquisition to those gardeners who are expected to supply long tender roots about the size of a rat's tail for as long a season as possible."

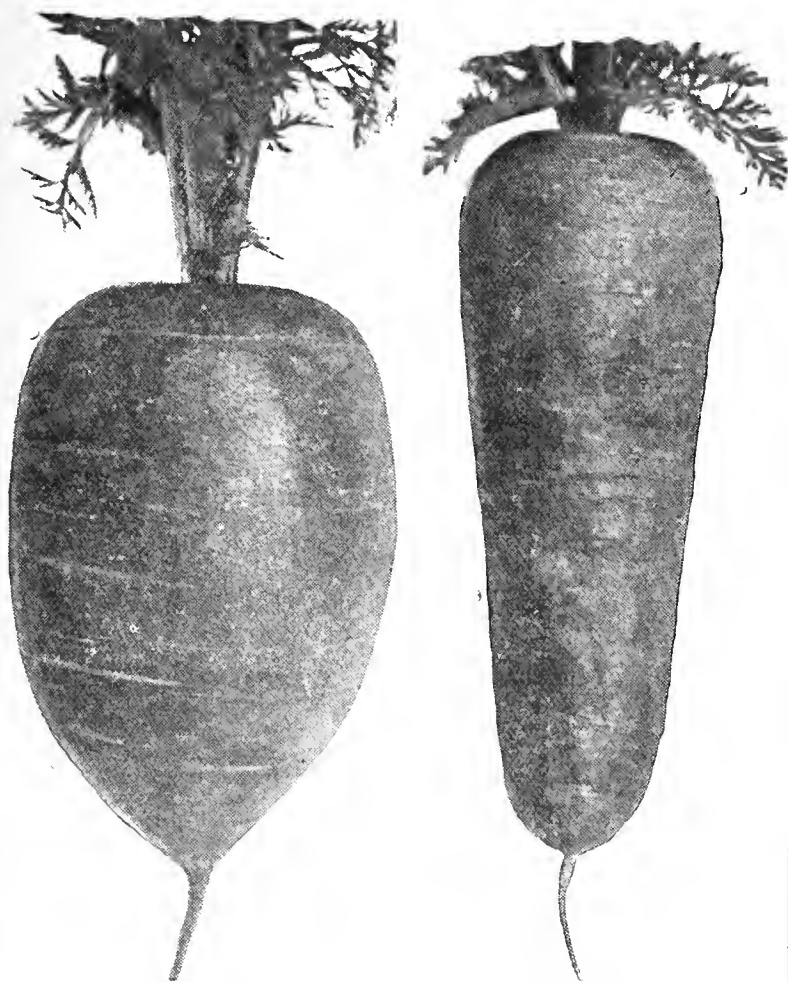

"Quite a new type, and will be largely grown when better known."

Mr. J. APLIN, The Gardens, Hasfield Court.

"One of the best I have ever seen, being clean and straight. Where good early Carrots are required this is a great acquisition."

Mr. G. H. MAYCOCK, The Gardens, Luton Hoo.

In sealed packets, price 1s. 6d.

NATURAL SIZE.

TWO-THIRDS NATURAL SIZE.

CARTERS' GOLDEN BALL.

CARTERS' IMPROVED EARLY HORN.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' GOLDEN BALL.—A most distinct and very early variety, specially adapted for forcing and frame work. The roots are almost as round as a turnip, flavour excellent and melting per packet 1 0

CARTERS' IMPROVED EARLY HORN.—A very distinct and useful variety ... per oz. 1 3

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

Carters' Red Elephant.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' RED ELEPHANT CARROT.

First Prize, Newbury, 1897

First Prize, Rochester, 1897.

First Prize, Ashbourne, 1897.

It is some years since we introduced those fine Carrots—Carters' Summer Favourite, still the highest type in the early garden class—and Carters' Scarlet Perfection, the best type of the Intermediate section. The present novelty is a veritable giant, both in length and rotundity, so much so that we have only been able to find room for a photograph of the top portion of the root in this Catalogue. Specimens we have exhibited at our establishment measured two feet and a half in length (30 inches). It has been brought to this high standard of perfection by one of the best professional gardeners, and from whom we have acquired the whole stock. It is a remarkable variety, and one which will become prominent in all first-class gardens and on the exhibition table.

In sealed packets, price 1s. 6d. per packet.

CARTERS'
IMPROVED
TYPES.

**CARTERS'
SCARLET
PERFECTION.**

MUCH REDUCED IN SIZE.

*Photographed from Nature and
Copyrighted by J. C. & Co.*

**Awarded a Special Certificate of Merit at the Vegetable
Conference of the Royal Horticultural Society.**

As shown in the Photograph, we offer a distinct and greatly improved form of Garden Carrot. It is midway in length between the Long Surrey and the well-known Intermediate, with the bright vermilion-scarlet colour of the Surrey. The flesh is solid, crisp, and fine flavoured. Invaluable alike for table, exhibition, and market purposes.

"The Carrots which I produced from your Seed have taken no less than nine First Prizes; in fact, they have taken First wherever I have sent them. The variety was 'Scarlet Perfection.'"—Mr. J. A. WATKINS, Bromesbury Heath.

CARTERS' SCARLET PERFECTION CARROT.—As its name implies its colour is perfect, and this is not its only good quality, for its shape and flavour when cooked are first rate. W. S., in "THE GARDEN."

In sealed packets, price 1s. 6d. per ounce.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

**CARTERS'
SUMMER
FAVOURITE.**

NATURAL SIZE

*Photographed from Nature and
Copyrighted by J. C. & Co.*

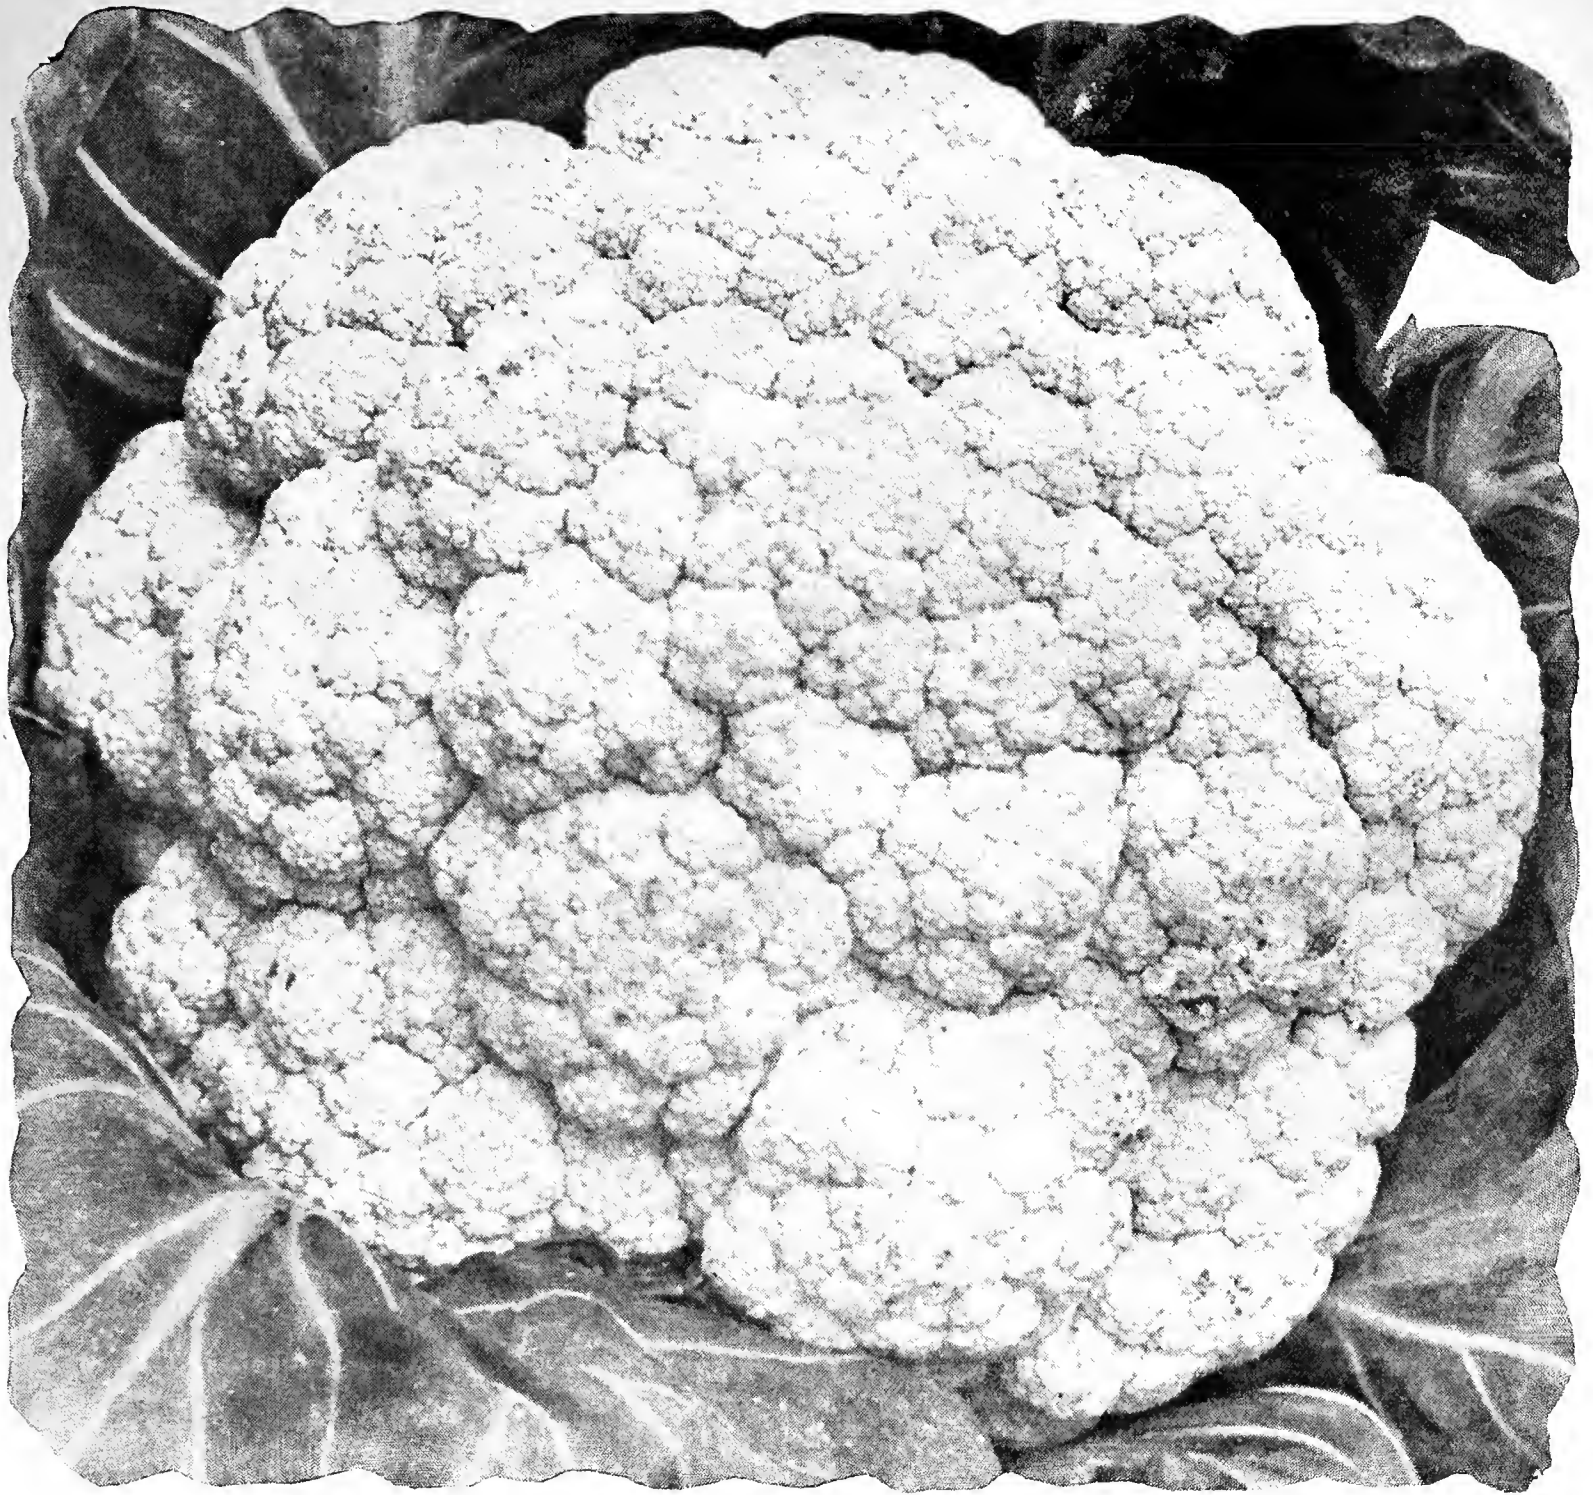

Awarded Royal Horticultural Society's Silver Medal.

A great acquisition, producing handsome, well-grown, bright cochineal-scarlet Carrots, very early in the season. The Photograph represents approximately its natural size, having been taken from a specimen grown in our experimental grounds. The quality is superb, and as an Exhibition variety coming into use early it will be found invaluable for showing in the summer months. This fine early Carrot is largely grown by the market gardeners around Sandy in Bedfordshire, the best district in the country for this vegetable.

CARROT SUMMER FAVOURITE.—I had this superb variety on trial this season, and am very pleased with the quality and the way this root matures, as it is superior to the Short Horn, to which type it belongs, but is of a thicker build, without much top, and is a splendid summer variety in gardens where quality and quantity are needed. The colour of Summer Favourite is distinct from most others—bright cochineal-scarlet—with a very small core for the size of root, and few Carrots are more shapely. For exhibition purposes it will take a leading position on account of its size, shape and colour.—THE GARDEN.

In sealed packets, price 1s. 6d. per ounce.

CAULIFLOWER.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Extra Early Autumn Giant.

This magnificent Cauliflower—specimens of which, weighing upwards of 14 lbs. each, were exhibited by us at the National Chrysanthemum Society's Show recently—is more dwarf, considerably earlier, and in every respect better than the old Autumn Giant. It produces enormous snow-white heads, and at the present time is admitted to be the largest, the earliest of the giant forms, of such value during September and October, and the most reliable Cauliflower, either for market use or for the private Garden.

"Carters' Extra Early Cauliflower turned out grand. I have never seen anything to equal it."—Mr. W. H. GRIFFITHS, Llanbadain Fawr.

"I took First Prize at Montgomery Show last year with two of Carters' Autumn Giant Cauliflowers. I had the four best in the show."—Mr. C. PRICE, Pentrenant.

In sealed packets, price 2s. per packet.

CAULIFLOWER.

The Cultivation of Cauliflower.—Sow in pans on a gentle heat in February and March, to be pricked out in April on a warm border. Sow in the open in April and May for succession, and again in August for Winter and Spring use under glass. (See CARTERS' PRACTICAL GARDENER, price 1s., post free 1s. 3d.)

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Defiance Forcing.

A very pretty and useful variety. In perfection during July and August—a season when a scarcity exists in vegetables of this description.

A very distinct and valuable Cauliflower. It is much earlier than any other variety, producing beautiful white heads about the size of a cricket ball. For forcing it is unequalled. Very dwarf and compact habit.

In sealed packets, 2s. per packet.

MARKET GARDEN NOTES.—We planted three kinds side by side—these were Carters' Extra Early Defiance, Extra Early, and Early Snowball—and in all points of merit they stand as I have placed them here. Carters' variety came in first, and its heads were the most compact of the lot, as well as the largest."—*The Garden*.

"I was greatly pleased with the seeds obtained from you last year. Carters Cauliflowers were the most extraordinary I have ever seen.

"Mr. G. HEREFORD, New Malden."

"The Cauliflowers from your seed are the best for miles around—in fact, every one that saw them said that they never saw anything like them for shape and enormous size.—Mr. T. HOCKINGS, Ludgershall."

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Mont Blanc.

Magnificent snow-white heads, well protected by the leaves; one of the best for soils of a heavy or retentive nature.

In sealed packets, 1s. 6d. per packet.

"CARTERS' MONT BLANC CAULIFLOWER.—This has the merit of being distinct. The plants are strikingly compact in habit, and the heads are large. It is a summer sort, and those who grow half-a-dozen varieties of Cauliflower and do not include this may rest assured that they are without one good one at least. Some Cauliflowers only succeed in certain soils, but I have noticed that this one does well in all, and its good constitution and robust style of growth indicates it as a variety that will prove remunerative."—*Journal of Horticulture*.

"There was nothing at our Show like Carters'. An old gardener, who had grown Cauliflowers for 52 years, said he had never seen the like before.

"Mr. M. ALEXANDER, Hay Park House."

"Out of 22 exhibits staged by me at our local Show I took 20 prizes, including 8 firsts, 6 seconds, and 6 thirds and I must say the whole of the seeds supplied by you gave me the greatest satisfaction.—Mr. CHAS. LITCHFIELD, Market Harboro'."

"I have exhibited Vegetables produced by Carters' seeds at the local Shows with very great success, and have had more prizes awarded me than any other exhibitor. I have also obtained a medal for the quality of my exhibitions.

"Mr. T. HANCOCK, Morebath."

CELERY.

The Cultivation of Celery.—Sow in February on a mild hot-bed for earliest crop, to be pricked out on bottom-heat when ready, and transferred to trenches in June. Sow in March for main, and in April for late crop. The trenches should be bottomed with rich soil, and the plants liberally watered; saline manure is beneficial.

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' SOLID IVORY WHITE CELERY.
In sealed packets, price 1s. 6d. per packet.

Carters' Solid Ivory.—(See Illustration.)—One of the most remarkable features of Carters' Solid Ivory Celery is its extreme dwarf compact habit, and beautiful white colour. It may be planted upon the surface of the ground instead of in trenches, and all that is necessary in the way of earthing up can be done in a very simple manner by the hand, or with an ordinary draw-hoe, a little care being taken to bring the stalks close together, and thus assist in its complete bleaching. If the heads are also tied with a little rough matting, the same as with Cos Lettuces, it will assist not only in keeping the Celery perfect, but also to exclude superabundant moisture. As a Celery for the use of Hotels and other large establishments it is unequalled, there being scarcely any waste in dressing it for table. As the name signifies, Carters' Solid Ivory Celery has been proved, after repeated trials, to be the most solid, crisp-eating, and delicious-flavoured variety in use—the peculiar filbert-nut taste being most marked.

"I was very much pleased with your Celery (Carters' Ivory). I cannot find any to compare with it, and it is rightly named 'Solid Ivory.'"—MR. REES DAVIS, Llangennech.

A customer writes in October:—"The only Celery which at the break up of the intense frost we found to be still good was Carters' Solid Ivory White."

"Carters' 'Solid Ivory' Celery is without doubt the best Celery grown, both for Main Crop and also for Exhibition purposes."—MR. R. MILNER, The Gardens, Penrice Castle.

We have records of no less than 36 First Prizes awarded this variety.

In sealed packets, price 1s. 6d. per packet.

Carters' Incomparable Crimson.—A dwarf growing, rich-coloured Celery, very crisp eating, and of delicious flavour. In some important Celery trials at the Royal Horticultural Society's Gardens, a few years since Carters' Incomparable was pronounced to be the best Dwarf Red variety.

"Carters' Incomparable Crimson is excellent in every way for the latest crops, unsurpassed for crispness and nutty flavour, and the latest in 'running' of any variety I am acquainted with. I unhesitatingly recommend it as a sterling late variety."—*The Garden*, March 9th, 1895.

In sealed packets, price 1s. 6d. per packet.

The Standard-Bearer.—This is the finest type of the giant Red Celery that has come under our notice for many years. It is the result of a cross between a light red variety and Major Clarke's.

"Messrs. James Carter & Co. have sent us a head of the Standard-bearer Celery, a variety of which they have recently become the possessors. It is a red Celery, very fine indeed, containing much stalk in proportion to foliage. It is remarkably solid and heavy, the sample before us being such as is coveted in private gardens and markets."—*Journal of Horticulture*.

"At the Shrewsbury Show I was placed first in the open class for Celery, which was Carters' Standard-Bearer, beating 27 competitors."—MR. H. TAYLOR, Whitchurch.

In sealed packets, price 1s. 6d. per packet.

"Carters' Celery cannot be beaten in this quarter. We have taken many first prizes all over the local shows. I was first last year with Carters' Red, and second with White."—MR. A. BROWN, Dinnington Colliery.

"I am pleased with Carters' 'Standard Bearer' Celery. I consider it the best, and grow over 2,000 heads of it every year."—MR. PALMER, West Winch.

"This time the 'Solid Ivory' White Celery is the only Celery that we have had that has stood the wet."—C. A. LA TROBE, Esq.

CRESS.

The Cultivation of Cress.—Sow Plain Cress once a week all the Summer in shallow boxes, filled up about three parts of the way with nice rich soil; when this is pressed down and watered, sow the seed an hour afterwards rather thickly over it, and merely press it into the soil. Cover with a double sheet of paper from 9 to 4 p.m. during the Summer, and sprinkle every evening. When the young seedlings reach an inch above the level of the top of the box they may be cut off with a sharp knife, and washed before being sent to table. American Cress should be sown the end of August to stand the Winter. Watercress may be successfully grown from seed, if sown in a shady border, and well watered. (See also CARTERS' PRACTICAL GARDENER, price 1s., post free 1s. 3d.)

A GOLD MEDAL AWARD.

We have the pleasure to announce that at the Shrewsbury Horticultural Society—the largest annual gathering of Horticulturists and high-class products in the country—our House was awarded this special and important honour for a unique exhibit of Vegetables and Flowers, of which the Photograph we give illustrates but a very poor idea. It was certainly the greatest attraction in the show, and we are glad to be able to illustrate it in these pages.

FACSIMILE
OF THE
GOLD MEDAL.

Photographed from Nature and Copyrighted by J. C. & Co.

Messrs. CARTERS' GOLD MEDAL EXHIBIT AT THE SHREWSBURY HORTICULTURAL SOCIETY, 1897.

THIS FINE EXHIBIT, arranged as a trophy in commemoration of Her Majesty's Jubilee, **WAS ALSO AWARDED A SILVER CUP** at the Great Temple Show of the Royal Horticultural Society; also the **HIGHEST AWARD** Richmond Horticultural Society, Surrey, 1897.

CARTERS' MODEL CUCUMBER.

INVALUABLE FOR TABLE OR EXHIBITION. In sealed packets, 2s. 6d. and 3s. 6d. per packet.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Model Cucumber, growing at our Crystal Palace Nurseries, for Seed.

CARTERS' MODEL CUCUMBER is the handsomest Cucumber grown, embodying the fine form and general characteristics of Tender and True with the prolific habit and strong constitution of the Telegraph. Perfect in outline, with scarcely any neck, and of fine flavour, this variety has become popular, both for exhibition and table purposes.

"Carters' Model Cucumber is the best I ever grew."—Mr. FINCH, Elmore Court Gardens

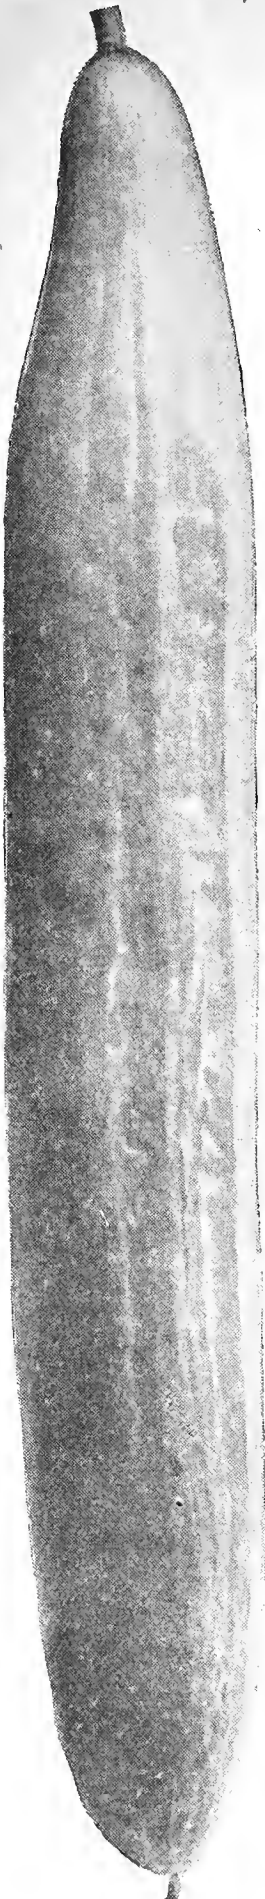

"I take the opportunity of expressing my satisfaction with your Model Cucumber, which is the best I have ever grown."—Mr. A. J. PHILPOT, Hornbridge Hill.

"CARTERS' MODEL CUCUMBER.—There are so many good Cucumbers that one hardly knows which to select, but those who want a handsome sort, and at the same time a good cropper, cannot make a mistake in giving preference to the above-named variety."—*Gardener's Magazine*.

Carters' Model Cucumber, price, in sealed packets, 2/6 and 3/6.

FRAME CUCUMBER.

We conducted an important trial of Cucumbers during the past season and could not find anything superior in either shape or colour to the leading kinds we now offer.

The Cultivation of Frame Cucumber.—Sow in a pot or pan during March in heat for Summer use, keeping the seed-pan shaded from strong lights until the seedlings appear, then transplant to well-prepared hot-bed, or other position, when the plants are sufficiently established. Sow again in September for winter use. (See also CARTERS' PRACTICAL GARDENER for full information on the culture of Cucumbers; price 1s., post free 1s. 3d.)

Carters' Earliest of All.—After conducting a careful trial of all the best known varieties of Cucumber, we have proved this to be by far the quickest finishing variety. It produced perfect fruit nine days in advance of all others. It is of good colour, handsome form, and fine quality on the table.

In sealed packets, 2s. 6d. per packet.

Carters' Cardiff Castle.—Awarded a Cultural Commendation by the Royal Horticultural Society. It has taken First Prizes in all parts of the country, and is invaluable either for Summer or Winter work. The fruit is of a rich emerald colour, perfect in form, growing to a length of about 18 inches. It is remarkably free-bearing, producing three to four fruits at a single joint. It is wonderfully hardy, and not liable to disease. A Correspondent in *The Garden* describes it as the best Cucumber raised since Telegraph.

In sealed packets, 2s. 6d. per packet.

Carters' Improved Telegraph.—(See Illustration.)—Unquestionably one of the most prolific and best Winter Cucumbers; indispensable for forcing.

"You cannot praise up your Telegraph Cucumber too highly. All that have seen it say they never saw better."

Mr. J. BARRFIELD, The Gardens, Bromesborough Rectory

In sealed packets, 1s. 6d. and 2s. 6d. per packet.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

ENDIVE.

CARTERS' MODEL ENDIVE.
In sealed packets, 1s. 6d. per packet.

The Cultivation of Endive.—Sow for early crops in middle of May, and for succession to beginning of August; transplant from the seed-bed into warm situations, and give protection to the late crops required for Spring use.

Carters' Model.—(See Illustration.)—The most beautiful and perfect form of Curled Endive yet introduced; for salads it will be found particularly valuable. It is exceedingly ornamental, of a distinct colour, bleaches admirably, and is far superior in fineness of fimbriation to ordinary Curled Endives.

In sealed packets, 1s. 6d. per packet.

Carters' Oval Leaved.—The plain leaved Endives are preferred by connoisseurs, and we recommend this fine selection as of the highest class. Its leaves are delicate in texture, very tender, and palatable.

In sealed packets, price 1s. 6d. per packet.

HERB SEEDS and ROOTS, see pages 62 and 63.

LEEK.

The Cultivation of Leek.—Sow in February to April, and transplant into trenches of well-manured soil, say 1 foot in depth, and 20 inches between the plants. In warm weather liberal dressings of liquid manure will be of service, and the plants should be afterwards carefully earthed up to blanch the stems. For Exhibition, sow in January in boxes under glass, and transplant early into rich soil.

Carters' Holborn Model.—The best both for exhibition and table. It is the largest variety we know of, the stems, as shown in the Illustration, are remarkably thick, of the clearest white colour, whilst the flavour is exceedingly delicate. Unquestionably the finest Leek in cultivation.

“Carters' Holborn Model Leek is the finest grown about here. It quite took the Staffordshire Leek growers down. I obtained 1st and 2nd prizes with it.”

Mr. A. R. POWELL, The Gardens, Monckton Grange.

“I took the First Prize with Carters' Leeks at the Whissendine Show, and they were considered the best in the Show.”

Mr. G. DAWSON, Whissendine.

“Carters' Holborn Model Leeks are the best we have ever had. They have stood the hard weather well—in fact, they are the only Leeks to be seen about.”

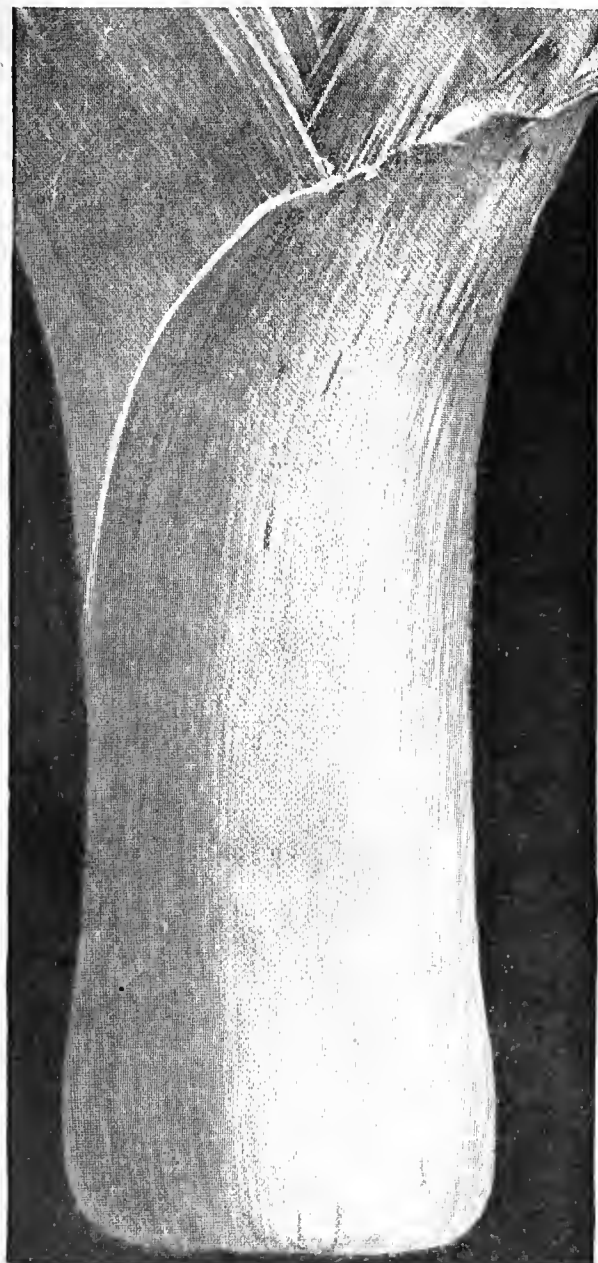

Mr. J. PICTON, Port Talbot.

In sealed packets, 2s. per packet.

CARTERS' HOLBORN MODEL LEEK.
Photographed from Nature and Copyrighted by J. C. & Co.

KOHL RABI, or KNOL KOHL.

CARTERS' EARLIEST WHITE.

CARTERS' EARLIEST PURPLE.

Photographed from Nature and Copyrighted by J. C. & Co.
GREATLY REDUCED IN SIZE.

These highly-bred strains of Kohl Rabi represent a plant that is largely used on some parts of the Continent as a vegetable. In this country, however, they have never seemed to take the public fancy, and yet they make a most delicious dish, and are of the greatest service in hot summers when turnips are hardly fit to eat. Throughout Austria and some other Eastern Countries, they are a standing dish, and their curious nutty flavour imparts a pleasant zest. The seed is sown in spring, and the edible portion—which is really a globular swelling in the stem just above the ground—is fit for use towards the end of summer.

We were awarded a Special First-Class Certificate at the Vegetable Conference of the Royal Horticultural Society for our select garden stocks of this plant, and these varieties were used as the representative types by our customer in his Gold Medal Collection of Vegetables, &c., at the Royal Horticultural Society's Meeting, October, 1896.

Each in sealed packets, price 1s. per packet.

CELERIC.

COS LETTUCE.

The Cultivation of the Lettuce.—Sow in pans on a gentle heat in February, and prick out into a well-manured and warm border. Sow again during March in a protected situation out of doors for early use, and in succession to the end of August for the general and late crops. Young and tender plants may be grown in boxes or frames, and pulled and eaten when small; in this form they make a delicate salad. Water liberally in dry and warm weather.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Giant White Cos.

This has long been admitted to be the largest, most delicious, and best Summer Cos Lettuce in cultivation; indispensable in every garden. No tying required; heads very solid and crisp-eating; slow to seed.

In sealed packets, 1s. 6d. per packet, 2s. 6d. per oz.

"I have taken First Prize two years in succession with Carters' Giant White Cos Lettuce.—Mr. BRAZIER, The Gardens, Phoenix House.

"I have taken First Prize three years in succession with Carters' Giant White Cos Lettuce. I gave young plants to four friends, all of whom got prizes at local Shows."—Rev. A. CLARKE, Yorkshire.

"I exhibited four lots of Carters' Giant White Cos Lettuce, and was awarded three Firsts and one Second Prize. It is the largest and best Lettuce in this district."—Mr. J. BUSHELL, Cambridge.

"From one ounce of Carters' Giant Cos I grew 9,000 saleable Lettuce, which turned in, most of them without tying, and were off the ground 21 days from starting them."—Mr. D. A. CLARK, Shorne.

Carters' Jumbo Cos.

A distinct Summer Lettuce of enormous size, raised by a celebrated French grower. During the hottest period of summer we saw this Lettuce standing as firm as a rock growing within fifty miles of Paris, and many Lettuces when fit to eat weighed from 5 to 6 lbs. each. It is a shy seeder, because it does not bolt with the hot weather.

In sealed packets, price 1s. 6d. per packet, 2s. 6d. per oz.

"Carters' Jumbo Cos Lettuce is the best I ever grew. They are an immense size, very crisp, and, although we have had a very dry season, there is no sign of their running to seed."—Mr. H. W. SEYMOUR, The Gardens, Amblecote.

Dunnett's Giant Winter Cos.—Very hardy and crisp ... 2 0 1 0

Carters' Giant Bath Cos.—Most useful for early consumption ... 2 0 1 0

Carters' Baldwin Cos.—A splendid broad-leaved, crisp-eating, pale green, self-heating Cos Lettuce, of exquisite flavour. It grows to a mammoth size, and is equally valuable alike for exhibition or for table purposes. It is slow to run to seed in hot weather. In sealed packets, price ... 1 0

KINGSHOLM COS.—Paris Cos type, withstands Summer heat for a long time ... 1 0

SUGARLOAF COS.—Very distinct and desirable; remarkably hardy, self-heating ... 1 0

BUNNEY'S INCOMPARABLE GREEN COS.—An early Winter variety ... 1 0

LONDON WHITE COS.—An excellent Lettuce for general purposes ... 1 6

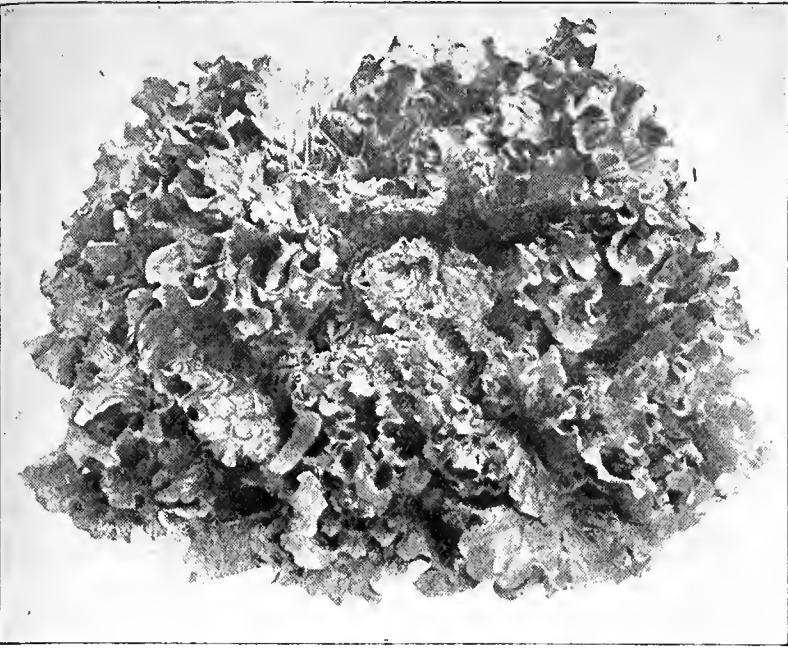

HARDY'S NORTHERN KING COS.—Stands the hardest Winter ... 1 6

HICKS' HARDY WINTER WHITE COS.—A popular London market variety ... 2 6 1 0

CABBAGE LETTUCE.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Harbinger Forcing.

A valuable and distinct addition to the class of early salading varieties. It was exhibited in splendid condition at the Royal Horticultural Society's Show in May by one of our customers, and was reported upon as follows:—

"At the Temple Exhibition this Lettuce was finely staged by Mr. H. W. Ward, and largely contributed to the Silver Medal awarded for the display."

In sealed packets, price 1s. 6d. ; 2s. 6d. per ounce.

"Lettuce Harbinger.—I have grown this variety for two seasons and am much pleased with it for early sowing. Those who have salads to supply in variety would do well to sow it several times during the summer on account of its crested leafage and sweet crisp hearts. Given plenty of room it attains a large size, and, though an early kind, does not run in a dry season so soon as some. I find it most valuable for sowing in cold frames early in February. The plants, if freely exposed in fine weather, are very good for spring supplies, the thinnings, if pricked out at the foot of a south wall, forming a good succession."—S. H. B. in THE GARDEN.

Carters' Longstander.

From its peculiar habit of growth, as shown in the Illustration below, it is less liable to decay and damage than other cabbage varieties. The colour of the leaf is pale lemon-green; it is prettily fringed, and of most delicious flavour. We exhibited perfect specimens a few seasons back, at the Royal Horticultural Society's monthly meeting in August, grown from seeds sown on April 5th.

In sealed packets, price 1s. 6d. ; 2s. 6d. per ounce.

"Carters' Longstander Lettuce has turned out splendid. I have been cutting a large number of very fine Lettuces, while other varieties have run away, owing to the dry weather."—Mr. T. RATLEY, Sussex.

"Carters' Longstander Lettuce, sown in April, stood without running to seed until August 15th."—Rev. J. C. V. BASTOW, Lutterworth.

MELON, CARTERS' BLENHEIM ORANGE.

The Cultivation of Melon.—Sow for first crop in January, and plant when ready into pits or on slabs filled with good maiden loam and well-rotted manure, adding a dressing of fine soil to the surface, and bringing the plants as near the light and glass as possible. It is essential that a regular temperature be secured rather than a high degree of heat. Give air freely when fruit is ripening, to develop flavour. (See also CARTERS' PRACTICAL GARDENER, price 1s., post free 1s. 3d.)

Carters' Blenheim Orange Melon.

THE FINEST FLAVOURED SCARLET-FLESH MELON IN CULTIVATION.

We again offer the stock of New Seed, saved specially for us. This Melon is remarkably prolific, has a grand constitution, is a very fine setter, and may be described as a Perpetual Bearer, ripening in a short space of time. The fruit is superbly netted, and a special and distinctive feature is the evenly-defined and thin rind.

In sealed packets, price 2s. 6d. per packet.

"I have grown your Blenheim Orange Melon now for some years and consider it one of the finest scarlet-fleshed Melons in existence and merits all you claim for it. It is of splendid constitution and if I were obliged to confine myself to one scarlet-fleshed variety, Blenheim Orange would be my selection."

Mr. J. J. CRAVEN, The Gardens, Allerton Priory.

"I may say that out of several varieties of Melons grown here last season, we consider your "Blenheim Orange" and "Emerald Gem" the two best, being of good flavour, very fine in setting fruit, and short jointed."—Mr. W. F. WOODS, The Gardens, Llanfrehifa.

Carters' Holborn Favourite.—The raiser of this splendid Melon is Mr. A. Pettigrew, of Cardiff Castle Gardens, who describes it as follows:—"Fruit of the largest size, roundish ovate; rind, lemon colour, heavily netted; flesh, greenish-white; flavour, sweet, melting, and juicy; habit of plant, strong and vigorous; a free setter and a great bearer. It is one of the handsomest and best-flavoured Melons in cultivation, and was greatly admired by all who have seen it growing here." We fully endorse the raiser's recommendation.

In sealed packets, 2s. 6d. per packet.

The Cassaba Melon.—The popular Melon in the Smyrna and other Eastern markets. Its high credentials induce us to offer it to growers of hardy Melons, it being adapted for cultivation where more tender and higher-bred varieties do not succeed.

In sealed packets, 1s. 6d. per packet.

Carters' Amberwood Beauty.—A very handsome Melon, the result of a cross between Hero of Lockinge and Read's Scarlet Flesh. Mr. Garner, the raiser, says:—"It is a strong grower, free in setting its fruit, which swell to a good size without the aid of any manure; it is beautifully netted, and the best green-flesh Melon that can be grown."

In sealed packets, 2s. 6d. per packet.

Carters' Emerald Gem—Green Flesh.

The late Head Gardener at a Royal Establishment writes:—"It is the best green-flesh Melon I have ever grown, both for flavour and constitution. I have cut this season the third crop, weighing four to five pounds each. It wants no improving as a Melon, for, when well grown, you cannot beat it. It is a very black green till ripening, when it colours up like a pine or a ball of gold."

In sealed packets, 2s. 6d. per packet.

The following sorts can also be supplied:—

	Per packet—s. d.
CARTERS' GREEN GAGE. —A "perfect" green-flesh Melon; flavour delicious In sealed packets, 1s. 6d. 2 6	
MONRO'S LITTLE HEATH. —Hardy scarlet flesh 6d. & 1 0	
HERO OF LOCKINGE. —A popular pale-flesh variety 1 6	
A 1. —Large, round, scarlet flesh 1 6	
BEST OF ALL. —Pale green; free setter 1 6

MELON, CARTERS' EARL'S FAVOURITE.

THE FINEST FLAVOURED GREEN-FLESHED MELON IN CULTIVATION.
Awarded the unique distinction of a First Class Certificate, Royal Horticultural Society of England.

Photographed from Nature and

[Copyrighted by J. C. & Co.

TWIN FRUITS REPRODUCED BY PHOTOGRAPHY FROM THE ACTUAL SPECIMENS. ABOUT $\frac{3}{4}$ SCALE.
GROWN BY Mr. C. E. MARTIN, HEAD GARDENER TO HIS EXCELLENCY LORD HAMPDEN.

EXTRACT FROM LETTER.—I am sending two Melons which I think you will consider quite novel. They are twins, and you will observe the two fruits are grown on one shoot, and in size and shape they are what I should call perfection. I have grown some splendid fruits of Carters' Earl's Favourite Melon this season and consider it the finest-flavoured Melon in cultivation. I never saw a Melon produce two fruits on one shoot, both to swell to the same size and finish perfectly. Some of our fruits weigh 7 to 8 lbs.

"On the 1st February, you sent me with other seeds a $\frac{2}{6}$ packet of Earl's Favourite Melon, which I have grown and am pleased to inform you I consider it the finest Green-fleshed Melon I have ever seen or grown, and I have grown for the last 35 years all descriptions. — F. A. DAVIS, Esq., Malmesbury.
I had Earl's Favourite from you last year. It was much admired by all who saw it growing and highly appreciated in the dining room. — Mr. J. Wivrock, Head Gardener to the Right Hon. Earl Fitzwilliam, Coolatten Gardens.
"MELON.—EARL'S FAVOURITE. —Visitors to the great Fruit Show at the Crystal Palace during the autumn of 1895 will

do doubtless remember the splendid exhibit of fruits of this melon. It was there I became enamoured with it, and procured seed of it last year. Some of the seed I gave to an eminent melon grower, who is also a raiser of no mean order. His testimony to Earl's Favourite is corroborative of mine, viz., 'the strongest grower, the finest setter, and moreover, the best-flavoured melon he has ever grown or tasted.' he is also of the opinion that it can be grown as large as one likes. I would advise all requiring a green-fleshed melon to grow this variety, and they will not be disappointed, for it certainly cannot be improved upon in any way. — R. WELLS, Glenstal, in the *Gardener's Magazine*.

THE GARDENERS' CHRONICLE says:—"It is so seldom we meet with a first-class Melon that the Earl's Favourite deserves note."

In sealed packets, price 2s. 6d. and 3s. 6d. each.

ONION.

The Cultivation of Onion.—The ground cannot well be too rich for this crop, nor the soil in too fine a condition. February and March are the chief seasons for sowing. The soil must be made firm before the operation is undertaken in either beds or drills. The seed should be sown thinly and covered lightly, the drills 12 inches apart, and the young onions thinned out to about 6 inches apart according to the variety. In very dry weather a good watering is very beneficial. Growers of Onions for exhibition generally transplant, and this is also a sure means of preventing the onion grub so troublesome in some districts. The Italian varieties are generally sown in Autumn and transplanted in Spring; when under fair conditions enormous exhibition specimens are obtained.

Carters' Record Onion.

This fine Onion increases in flavour each season, and is likely to become exceedingly popular when better known. It can be sown either in the Autumn or Spring; but if large Bulbs are desired, Autumn sowing is recommended. It will be remembered that a specimen, illustrated in the "Gardening World," turned the scale at 4½ lbs.

"ONION RECORD.—This is one of the most telling of the newer kinds, owing to its fine shape and bright golden skin. It was one of the varieties which figured so prominently at the large vegetable show of the National Chrysanthemum Society last November, and it was also shown in the leading collections, making a strong dish in most cases. It is equally good grown in the ordinary way. I have excellent bulbs without special culture of any kind, and at the date I write, the second week in March, the bulbs are solid and good. I am not a lover of the large bulbs grown for show, but I value this for its good keeping and well doing in a poor soil."—G. W., in *The Garden*.

"I have grown Carters' 'Record' Onion for three years, and during that time have shown it five times and have taken five First Prizes."—S. W. FENN, Esq., Nassington.

"Carters' 'Record' Onion was sown in February, and on the 11th of August they turned the scale at 1½ lbs., and were 16 and 17 inches in circumference. I am pleased to say I took First Prize at our local Show."—Mr. C. BARRETT, Charlton-all-Saints.

"I had a packet of Carters' 'Record' Onion two years ago, and I sowed part of it then and the rest of it last Autumn, and I had some splendid Onions. I took First and Second Prizes last week at our Show."—Mr. C. BRACKPOOL, Sedlescombe.

"In the Spring I had a packet of Carters' 'Record' Onion and made a bed of three rows of it beside three rows of another Onion. The 'Record' has passed every thing during all this hot dry weather—only rain twice in two months. It stands splendid; nothing to equal it in scores of Onion beds on a ten-acre allotment field. It is the admiration of all."—Mr. R. KERRAGE, Bury St Edmunds.

In sealed packets, price 2s. per packet.

CARTERS'**SELECTED****ONIONS.**

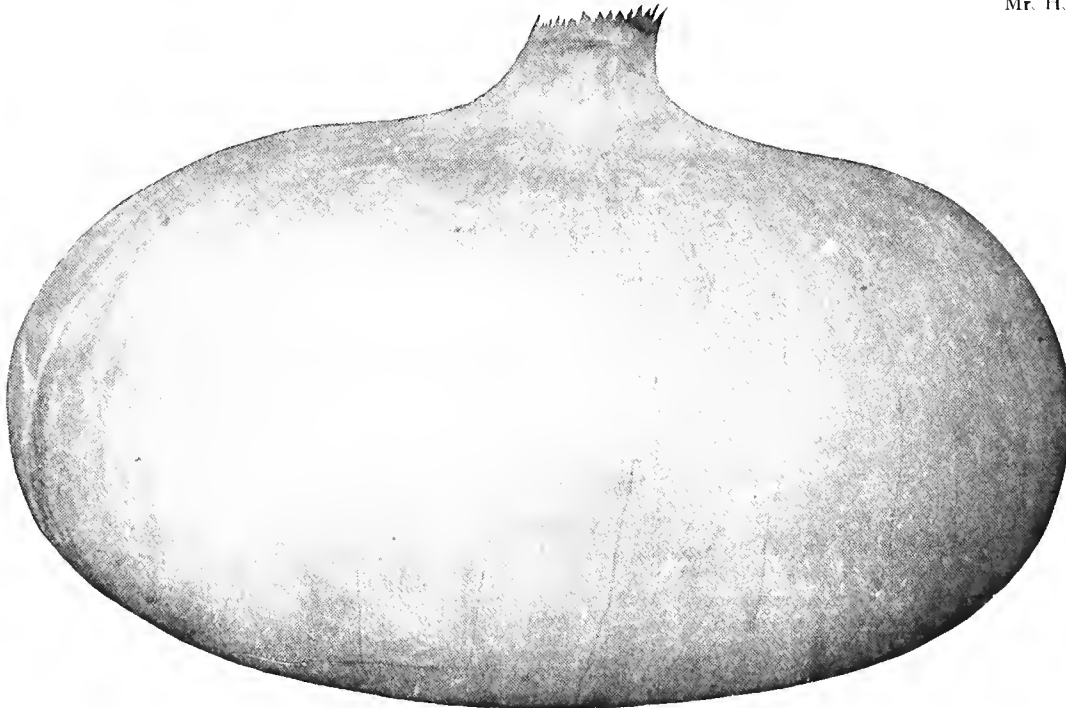

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Holborn is equally valuable for exhibition and for table purposes. Perfect in shape, it grows to a large size, and is distinct in colour of skin from other Globe varieties. It is a capital keeper, and the delicate flavour nearly approaches that of the imported Spanish Onions sold by Grocers and Fruiterers.

In sealed packets, 1s. 6d. per packet.

"Carter's 'Holborn' Onion is a perfect model. I have grown dozens of them weighing 2 lbs. and upwards, and they are much admired."

Mr. H. SHOEBRIDGE, The Gardens, The Limes, Carshalton.

Carters' White Emperor.

Unquestionably the finest form of flat Onion in cultivation, with *silvery-white skin* and *flesh* of a most agreeable *mild flavour*. It reaches a larger size than any of the flat white varieties, sometimes measuring *twenty inches* in circumference.

In sealed packets, 1s. 6d. per packet.

"I am pleased to inform you of my success in obtaining a prize with your White Emperor Onion. They grew to an enormous size and weight, and considering the dry season and poorness of our soil, we were extremely pleased with them."

Mr. J. YOUNG, Bechnam.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Pearl Pickler.—This is the genuine miniature Onion that is preserved in white vinegar, and found on the tables at the leading hotels.

In sealed packets, 1s. 6d. per packet.

Carters' Long Keeper.—Will remain sound the year round if properly kept.

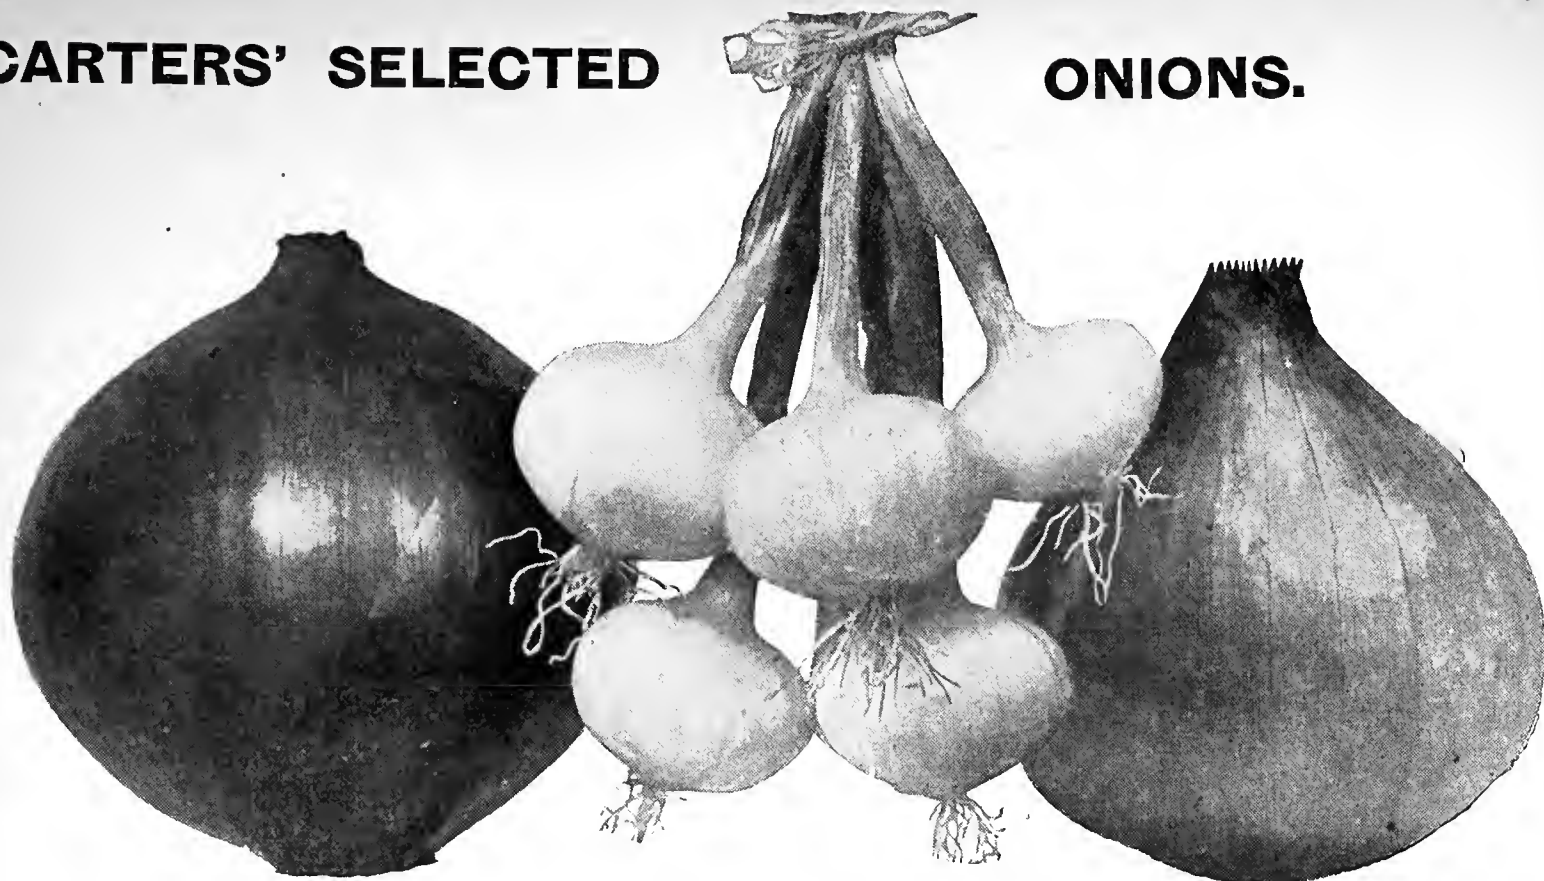

In sealed packets, price 1s. 6d. per packet.

Carters' White Spanish.—A Re-selected Stock.

A perfect form of the Banbury type. It grows to a great size, is very even, and of good flavour

CARTERS' SELECTED**ONIONS.**

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Tennis Ball.—This

magnificent Onion is specially adapted for early sowing; the flavour is mild and delicate, and as an Exhibition variety in Summer it is invaluable.

In sealed packets, 1s. 6d. per packet.

Carters' Golden Queen.—

A perfect miniature model. The Onions vary from an inch to an inch-and-a-half in diameter. Skin of a delicate transparent golden-straw colour.

In sealed packets, 1s. 6d. per packet.

Carters' Silver Ball.

—A pretty, medium-sized white Onion of fine texture and mild flavour. It makes a nice contrast on the exhibition table.

In sealed packets, price 1s. 6d. per packet.

Carters' Golden Globe Tripoli.—A large variety, similar in

size to the Giant Rocca; it stands our uncertain climate quite as well as the English types, and the flavour is excellent. The skin is of a transparent golden-straw colour, and it will be found invaluable in Exhibition collections. Suitable both for Autumn and Spring sowing.

In sealed packets, 1s. 6d. per packet.

"My *Tripoli* Onions now growing from Carters' Seeds are the finest in the neighbourhood."

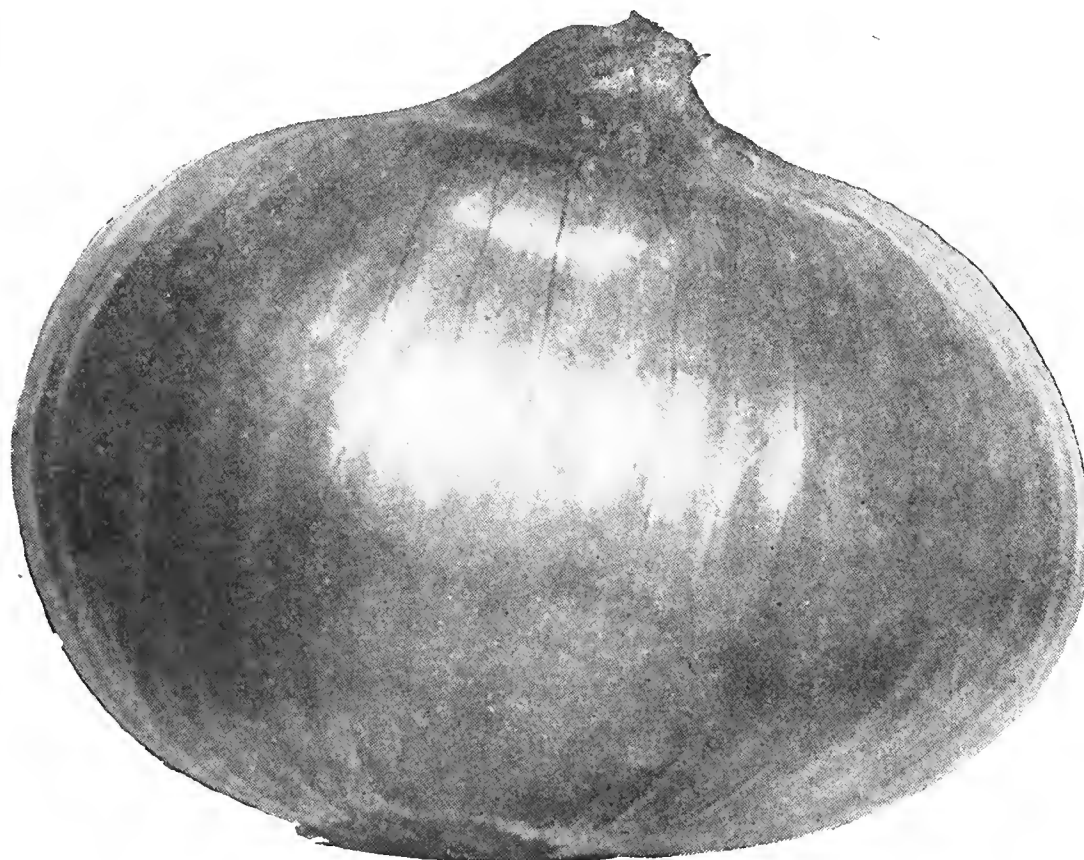

Mr. S. JENNER, Mayfield.

"I am pleased to inform you that I have gained the 1st prize at our annual Show. The Onions measured 15 inches in circumference."

Mr. H. J. GRAY, Sheldwick.

GOLD MEDAL.

Carters' Golden Globe Tripoli Onion was one of the most prominent varieties in the Gold Medal Collection of Vegetables, exhibited before the Royal Horticultural Society, October 13th, 1896.

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' GOLDEN GLOBE TRIPOLI.

AILSA CRAIG ONION.

CARTERS' RE-SELECTED STRAIN.

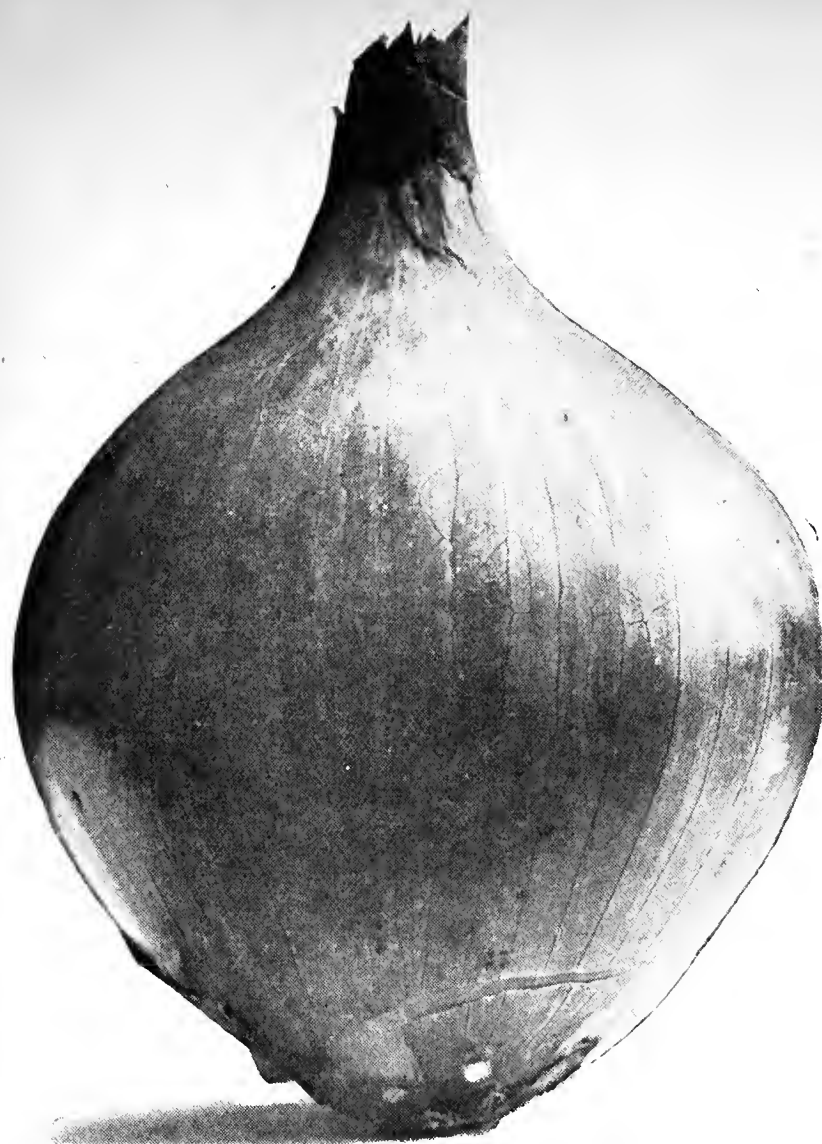

We offer a very fine strain of this popular Onion, which, on account of its distinct shape, is in great demand amongst exhibitors of Vegetables.

It is a good keeper, and to those who like an Onion raw, we recommend it on account of its acceptable pungent flavour.

"The bed of Ailsa Craig Onion grown from seed supplied by you was the admiration of all who saw them, many of them weighing over 2½ lbs."

Mr. R. MILNER, The Gardens, Penrice Castle.

In sealed packets, price 2s. 6d. per packet.

SPINACH.

The Cultivation of Spinach.—Sow Round Spinach in succession from January to June, and Prickly or Winter Spinach the first week in August to stand the Winter. Sow New Zealand Spinach in March in heat, and transplant about the end of May, setting the plants about 3 feet apart.

Photographed from Nature and Copyrighted by J. C. & Co.

The Carter Spinach.—This fine Spinach, originally discovered by one of our travellers on the Continent, was sent for trial to the Gardens of the Royal Horticultural Society, and was given an *Award of Merit* at the Committee Meeting on June 11th, 1895. Our photograph illustrates in a remarkable manner the solid substance of the leaves; and the whole plant, which is very dark in colour, is of far greater duration than ordinary Spinach.

IMPORTANT TESTIMONY FROM RELIABLE MEN.

"THE CARTER SPINACH.—This variety stands out so prominent from others that I am pleased to refer to its good winter qualities and its superiority over older forms. It was one of the few which stood the test at Chiswick and received an award. I consider it quite distinct."—G. WYTHES, in *The Garden*.

"I was pleased to see Mr. Wythes' note on this fine Spinach, which deserves extended cultivation. I have proved it to be excellent both for winter and summer work. Victoria failed me as a winter variety, and never came away so strongly as the Carter."—J. C. TALLACK, in *The Garden*.

"I wish to bear testimony to the excellence of your new Spinach *The Carter*. It is a great advance on *Summer Favourite* and other good kinds, for, notwithstanding the very dry weather, I have been able to pick leaves nearly a foot long and broad in proportion."—Mr. E. TYLER, The Gardens, Monkshatch.

"The best Spinach in cultivation, and quite distinct from all others."—Mr. A. PETTIGREW, The Gardens, Cardiff Castle.

In sealed packets, price 2s. 6d. per pint; 6d. per ounce.

Carters' Giant-leaved Winter.—A large thick-leaved form of the hardy prickly Spinach ... per pint 2s. 6d. - 6
Useful on cold backward soils.

CARTERS' EXPRESS RADISH

Carters' Express Radish.—Quite distinct in form and colour, being very much brighter than Wood's Frame or Long Scarlet. It is a cross between the former and Scarlet Olive. In appearance it is altogether better, and the crispness and flavour put it a long way ahead of any other variety. It will prove to be a great acquisition for *earliest* market work.

"Excellent in every way. A splendid frame Radish, and equal in quality to its earliness. Of splendid colour, and one of the best I ever grew under glass, and grand for first crops in open.—Mr. G. WYTHES, The Gardens, Syon House.

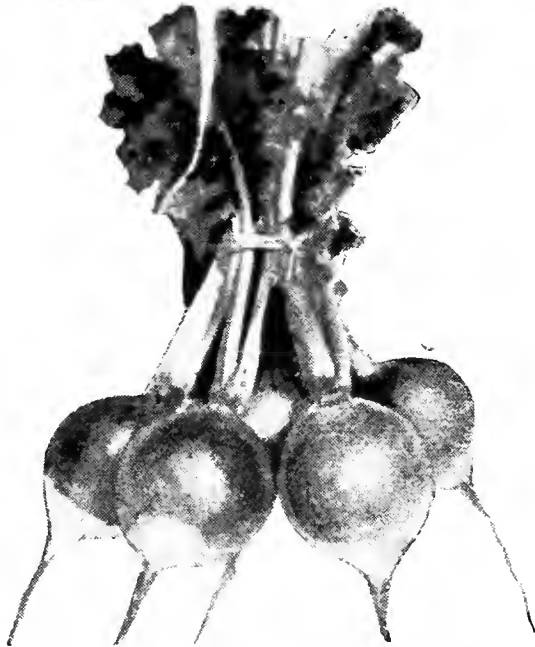

In sealed packets, price 3s. 6d. per pint, 8d. per ounce.

Photographed from Nature and Copyrighted by J. C. & Co.
CARTERS' DELICATESSE.

Carters' Delicatesse.—The latest type of the well-known French Breakfast Radish introduced by our House many years ago. We gave it this name on account of the great favour in which it has always been held as an appetising salad upon the breakfast table in France. It is not only an attractive dish, but its crisp flesh and nutty flavour gives our new selection a distinct advantage. Suitable for forcing.

In sealed packets, price 3s. 6d. per pint, 8d. per ounce.

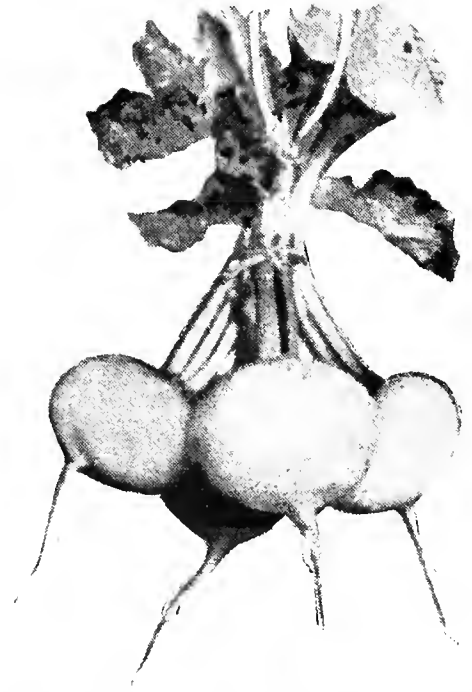

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Round White Tipped Radish (EARLIEST STRAIN).

These are the quickest growing forms of round Radishes, clean in growth, with short tops, and make very pretty dishes on the table early in the season, but they can also be grown in successional crops all through the Spring and Summer. The flesh is crisp and sweet eating.

Each, price 3s. 6d. per pint, 8d. per ounce.

CARTERS' KNICKERBOCKER RADISH.

Carters' "Knickerbocker."—A veritable giant, frequently growing to a length of 8 inches, and half an inch in thickness, whilst the quality is superb, the flesh crisp, melting, and juicy. For Exhibition purposes it is invaluable.

Price, 2s. 6d. per pint, 6d. per ounce.

SUMMER VARIETIES.

Per oz.—s. d.

- Carters' Crimson Marble.**—A choice selection, symmetrical in form, flesh white, crisp, and solid; colour rich vermilion-crimson; fine mouse-tail root ... per pint, 2s. 6d. - 6
- GOLDEN BALL.**—A round yellow radish, very distinct and pretty. ... per pint, 2s. 6d. - 6
- BECK'S SUPERB LONG SCARLET,** per quart, 3s.; per pint, 1s. 9d. - 3
- LONG SALMON SCARLET** ... per quart, 3s.; per pint, 1s. 9d. - 3

WINTER VARIETIES.

TURNIP-SHAPED CHINA.—A scarlet variety of the China Rose Winter Radish. It may be sown at intervals from Spring until Autumn, and the roots obtained from late sowings can be kept in store for winter consumption. The root is round, of a fine scarlet colour, $2\frac{1}{2}$ to 3 inches in diameter; flesh pure white, of an agreeable and mild flavour.

Price, in sealed packets, 1s. per packet.

The Cultivation of Radish.—Sow on a moderate hot-bed in January, February, and March; also every month during summer in well-prepared places in the open. A sowing in frame, or on a warm border in October, is desirable for winter use. Water early in the morning during hot weather.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

CARTERS' DUKE OF YORK TOMATO.

REDUCED IN SIZE

FIRST PRIZE,
CHESTER,
1897.

Carters' Duke of York.

—One of the grandest Tomatoes yet introduced, colour rich scarlet, splendid cropper, almost globular in shape, flesh very firm, fine flavour. A leading feature of this superb variety is that it ripens its fruit more uniformly than any known kind, whilst the profusion of clusters, averaging eight and ten large evenly-formed fruit each, makes it conspicuously handsome. Invaluable as an Exhibition variety as for private growers and market purposes.

Photographed from Nature and

CARTERS' DUKE OF YORK TOMATO.

[Copyrighted by J. C. & Co.]

Has been awarded the First Class Certificate of the Royal Horticultural Society, and Four Silver Medals in addition to many diplomas. Whatever Exhibition one went to during the past season, Duke of York invariably secured the First Prize. At the important Exhibition held at Chester it was shown in grand form, whilst our Customer, COLONEL CUTHELL, writes:—"We won the FIRST PRIZE from 15 other Competitors." Our stock is specially re-selected by the raiser each season, and as we purchase all he saves, our supplies are the best obtainable.

In sealed packets, price 2s. 6d. and 3s. 6d. per packet.

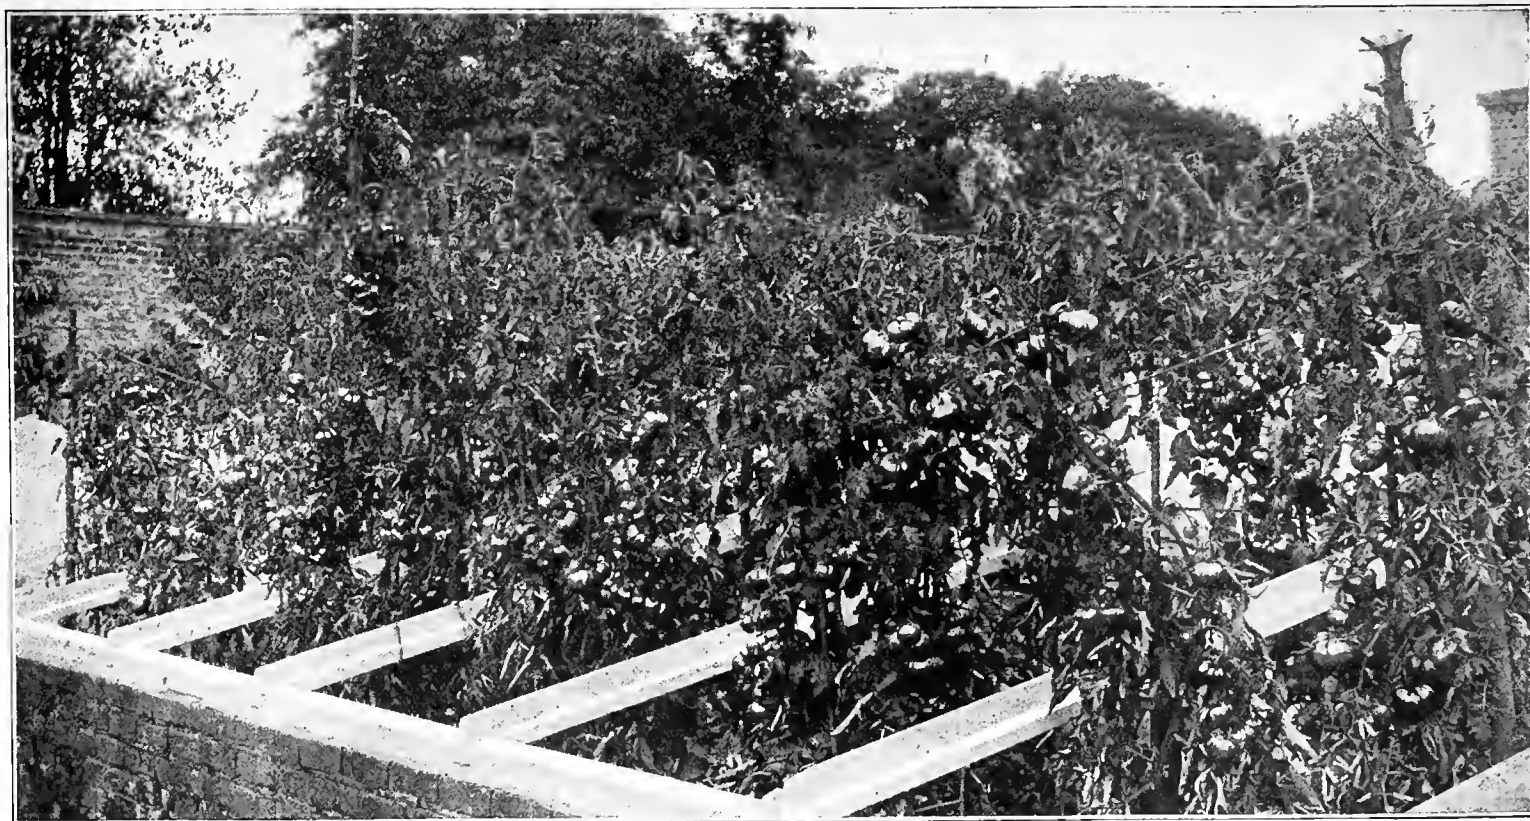

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

"Last season a friend gave me about 100 seeds of *Duke of York* which he got from you, and I must say I never grew a finer kind; they are a beautiful colour. I had a grand crop from them, the largest fruit weighing 1½ lbs."

Mr. J. K. ALLEN,
St. Aubins.

TOMATO.

Cultivation.—Sow seed in February and March, and transplant into pots to harden off, afterwards plant out against a warm south wall in good and well-manured soil; or they may be planted in a warm border, and carefully staked to keep the plants and fruit from straggling on the earth. If cultivated in pots the treatment should be the same, with the addition that liberal waterings of manure and rain-water daily will be found necessary, especially during the hottest part of the summer. (*See also CARTERS' PRACTICAL GARDENER, price 1s.; post free, 1s. 3d.*)

CARTERS' OUTDOOR TOMATO, as grown by Mr. E. Burrell, Head Gardener to H.R.H. The Duchess of Albany.

Carters' Outdoor Tomato.—We recently made an important trial in our Experimental Ground at Mortlake of all the varieties of Tomatoes recommended in one direction and another, for culture, in the open air, and we found our own speciality a long way ahead of others in its suitability for this purpose. It was not only the most robust in habit, but was the first to come into flower—the first to bear ripe fruit. The annexed photograph will give a good idea of its prolific character, together with the very fine appearance of the individual fruits.

One of the largest Kent Tomato Growers says this is the best type of early out-door Tomato he has ever had.

OUTDOOR EARLY TOMATOES.—"On July 3rd I gathered a good dish of Tomatoes from plants put out on a south border, and trained up a stake just as we grow Dahlias. I have put out several well-known varieties and all are doing well, but first and foremost are Carters' Outdoor, the earliest and best Tomato for growing outside I have ever seen. The plants were raised from seed sown in pots, and placed in frames in the beginning of March. Subsequently they were potted off singly and grown in frames till the third week in May, when on the 24th they were planted out on a border in front of a greenhouse, and they are growing and fruiting well."—Mr. W. A. COOK, in the *Gardeners' Magazine*.

"I have grown Carters' Outdoor Tomato this summer, besides other kinds, but it has beaten them all."—Mr. J. PIKE, Woolacombe Bay Hotel.

In sealed packets, price 2s. 6d. per packet.

Carters' Blenheim Orange.—A curious cross between the red and yellow Tomato; one of the best-flavoured varieties ever raised.

"In a house of Tomatoes a grand show is made by their large red and yellow fruited variety, Blenheim Orange. This is the Queen of Tomatoes, and we must look amongst the red varieties for the king."

The late Mr. SHIRLEY HIBBERD, in the *Gardeners' Magazine*.

In sealed packets, price 2s. 6d. per packet.

Carters' Dedham Favourite.—A well-known and deservedly popular variety.

In sealed packets, price 2s. per packet.

"I was very pleased with Carters' Tomato seed. I took six first and four second prizes with Carters' Dedham Favourite. I cut one weighing 1 lb. 10 ozs."—Mr. W. TOPLISS, Burton-on-Trent.

Carters' Perfection.—Quite distinct from, and immeasurably superior to, any other variety named Perfection already in commerce. It is very handsome in form, somewhat resembling Dedham Favourite, but very distinct in colour and of exquisite flavour.

"I have great pleasure in testifying to the grand quality of your seeds, for the Tomato seed supplied to me by you last year were splendid. The fruit was firm, of good colour, and pronounced by all who tasted them of exquisite flavour. The variety was your Improved 'Perfection.'"—E. AUSTIN, Esq., New Cross Gate.

In sealed packets, price 2s. per packet.

Carters' Sandwich Island.—A most distinct variety, unique in form, colouring, and general character. As a Tomato for long journeys or rough handling it is unequalled, the skin being so remarkably firm that it may be packed with far greater ease and security than the general run of market Tomatoes.

In sealed packets, price 1s. 6d. per packet.

Carters' Market Favourite.—A variety very much needed in the market, being very early, of medium size, good shape and colour. It possesses remarkably free setting properties. First Prize, Newbury, 1897.

In sealed packets, price 2s. per packet.

Carters' Greengage.—Introduced by us, and the first of the yellow section of any value. The rich golden-coloured, semi-transparent fruit so nearly represent Plums as to be frequently mistaken for the latter at the exhibitions. Awarded a First-Class Certificate by the Royal Horticultural Society.

In sealed packets, price 1s. 6d. per packet.

The following varieties of Tomatoes can also be supplied, price 6d. and 1s. per packet, according to sorts:—

Ham Green Favourite.	Chiswick Red.	Vick's Criterion.
The Conference.	Trophy.	Peach.
Golden Gem.	Large Red.	Hathaway's Excelsior.
Horsford's Prelude.	Orangefield.	Scarlet Pear-Shaped.
Holborn Ruby.	Aeme.	Carters' Grapeshot.
King Humbert.	The Mikado.	Carters' Red Currant.
Lorillard.	Large Yellow.	Hackwood Park
Harefield Gem.	Tree Tomato.	Prolific.

MUSHROOM SPAWN.

CARTERS' SPECIAL "MILLTRACK" BRAND.

Photographed from Nature and Copyrighted by J. C. & Co.

HOW TO GROW MUSHROOMS WITH LITTLE EXPENSE.

Preparation of Material.—This is the most essential point to be studied to ensure success. Procure fresh stable manure, which should consist of half droppings and half short litter; this must be thoroughly turned over every other day for about a fortnight. Manure obtained from unhealthy cattle, or from those that have been fed on green food or carrots, should not be used for this purpose.

For Making Outdoor Beds.—The material should be put into a heap, the measurement of which should be, when made up, 2 ft. 6 in. at bottom, 2 ft. 6 in. high, and 6 in. wide at the top, and to any length required, the whole to be firmly put together. After making the bed put stakes down the centre by which to gauge the heat, and cover all with long litter; after three or four days pull out the stakes, and when the temperature is at about 80° the bed is ready for spawning; break the bricks of spawn into pieces about the size of a hen's egg, and put into the bed about 8 inches apart; cover the whole with fresh fibrous loam, and beat it well, making the surface quite firm, lightly water and smooth the surface with the back of a spade, finally cover up with long litter and Russian mats to keep away light and excessive moisture.

Mushrooms may also be grown in any shed or cellar where the temperature does not fall below 45°; the best site for a bed is a hard dry floor. A moderate size bed would measure 5 ft. 6 in. × 4 ft. 6 in. × 1 ft. When made up and well pressed down, in about six weeks Mushrooms should show, and the bed should then have a light watering with tepid water about every ten days, as success depends upon maintaining an even temperature.

Another and very easy mode of providing a supply of Mushrooms in the autumn and early winter months is to insert lumps of spawn, in August, in the beds that are devoted to Cucumbers and Melons. By that time the heat of the fermenting materials has declined to the proper temperature for the spawn to "run" freely; and just when the Cucumber, etc., are ready for removal, large quantities of Mushrooms are often seen breaking through the soil, and with protection in the form of hay coverings, the supply is continued for a long time. The spawn should be inserted rather deeply—four or five inches. It is not in every case that good crops follow this practice; but the trouble is so slight and the cost of spawn so trifling, whilst at the same time the results are often so satisfactory, that this simple plan is worthy of more general adoption.

For further particulars see "CARTERS' PRACTICAL GARDENER," Price 1s., Post Free, 1s. 3d.

"The last lot of Mushroom Spawn I had gave me excellent results; not only that, but kept cropping on for months. I may say I never had a crop of Mushrooms until I gave your Special Mushroom Spawn a trial."—Mr. K. McHARDY, Gardener to Mrs. Ken, Gallowhill.

"The Mushroom Spawn you sent me some months ago has come on splendidly, and I got a nice supply of Mushrooms."—Mr. G. WADDINGTON, Northam.

"We have had grand crops of Mushroom Spawn from the last supply—some as large as saucers."—Mr. J. SMITH, Ballikinnairn Castle.

"The four bricks Mushroom Spawn gave every satisfaction. I think I had quite two bushels from them."—Mr. H. J. FISCHER, Tring.

"The last Mushroom Spawn had from Carters' far exceeded my expectations. I have had several measuring 7 to 8 inches across and weighing 1 lb."—Mr. J. W. BULL, Godmanchester.

"I had some Mushroom Spawn from Carters', and have never had such a fine crop before. The Mushrooms made their appearance in five weeks from the time of spawning the bed."—Major-Gen. ANDERSON, Camberley.

Carters' Special Mushroom Spawn. Prices:

 We are only able to pay carriage on Mushroom Spawn when ordered with other goods.

The Cultivation of Vegetable Marrow.—Sow in heat during April, and transplant into highly-manured bed when ready and all chances of frost are past; or sow under a hand-glass in May upon a richly-manured border.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' Trailing White.

—One of the quickest growing varieties we know of; the fruit will extend to a great length whilst retaining all the tenderness of small young Marrows.

CARTERS' TRAILING WHITE.

In sealed packets, price 1s. 6d. and 1s.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' LONG GREEN STRIPED.

Carters' Long Green Striped.

—A giant prolific variety, the very best for gardens that lie in a bleak and exposed position.

In sealed packets, price 1s. and 6d.

MUIR'S PROLIFIC.—A distinct variety, with small globular fruit, creamy-white in colour with thick flesh.

In sealed packets, price 1s.

PEN-Y-BYD (The best in the World).—A round fruiting Marrow, creamy-white in colour—very superior.

In sealed packets, price 1s.

TURNIP.

The Cultivation of Turnip.—Sow Carters' Jersey Lily for early use the first week in March on a gentle hot-bed under glass, and later in a warm situation in the open border. For main succession crops, sow every three weeks in the open ground until the beginning of July. For Winter use, sow early in August and again in September. The yellow fleshed kinds are best adapted for the August sowings.

Carters' Jersey Lily.—(See *Illustration opposite*.)—The most perfect in outline, and the earliest White Garden Turnip grown; in shape as round as an orange, of exquisite flavour, with single tap-root, and very distinct small top. The best White Turnip in the Royal Horticultural Society's trials, 1896.

First Prize, Alresford.
First Prize, Shipston-on-Stour.
First Prize, Stoney Stratford.

First Prize, Rocester.
First Prize, Ashbourne.

In sealed packets, price 1s.

Carters' Cardinal.—(See *Illustration opposite*.)—A flat early garden Turnip of fine quality, quite distinct in colour from all other Turnips.

Price in sealed packets, 1s. 6d.

"A very distinct variety, with a deep red skin; good quality; very early, and very nice appearance. One of the best I have ever grown on hot dry land."

Mr. G. WYTHES, Head Gardener to Earl Percy.

Carters' White Swan's Egg.—(See *Illustration opposite*.) A very distinct and symmetrical Garden Turnip. It comes to the size of a Lemon, is of rapid growth, the top remarkably fine, short, and very compact; the flesh is of fine texture, and the flavour particularly delicate and melting.

In sealed packets, 1s. per ounce.

"I am very pleased with Carters' White Swan's Egg Turnips. It is not only of first-class quality, but I pulled turnips over a fortnight before anyone near here, and what is far more to the purpose, nearly twice the size of any other sort I saw."—Mr. E. A. HEATHER, Chichester.

Carters' Purple Top Strapleaf.—(See *Illustration opposite*.)—A variety with plain strap-like leaves and flesh of fine texture, colour of top of root a rich reddish purple. A perfect model in form, and highly valuable for early use as well as for exhibition.

In sealed packets, 6d. per ounce; per pint, 2s. 6d.

Carters' Golden Rose.—One of the hardiest and best Winter Turnips; flesh of a rich golden-yellow colour, with single tap-root; flavour most delicate and melting.

CARTERS' DISEASE-RESISTING SEED POTATOES.

Our Potatoes are carefully hand-sorted, and all misshapen and damaged tubers discarded.

GOLD MEDAL.

Twenty dishes of Potatoes were included in the fine collection of produce exhibited by one of our customers at the Birmingham Jubilee Exhibition, November 9th, 10th, and 11th, 1897.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' FIRST CROP KIDNEY POTATOE.

EARLY POTATOES.

GOLD MEDAL.

Twenty dishes of Potatoes were included in the fine collection of produce exhibited by one of our customers at the Birmingham Jubilee Exhibition, November 9th, 10th, and 11th, 1897.

Carters' First Crop.—*See Illustration above.*—A perfect type of forcing Kidney Potatoe for the Gentleman's Garden. The haulm is compact, and the tubers come in remarkably quick. They are beautifully shaped, the flesh is of a pale canary colour; a nice cooker, and handsome on the table.

Price, per peck of 14 lbs., 5s. Trial Box, 1s. 6d.

Carters' Lilywhite.—*A white Kidney.* Very like our First Crop in appearance, whilst the flesh is much whiter. Likely to become popular on light and medium soils.

Price, per peck of 14 lbs., 5s. Trial Box, 1s. 6d.

Carters' Advancer.—*Pebble shaped, smooth skin, white flesh, medium haulm.*—In the trials of the Royal Horticultural Society in 1895 this variety was one of the very few that were selected as of fine appearance and good cropping qualities. It is a seedling raised in our trial grounds, and will be found a heavy producer on all good garden soils.

Price, per peck of 14 lbs., 6s. Trial Box, 1s. 6d.

Carters' Early Favourite.—*An oval-shaped, white fleshed, smooth skinned Potatoe, with a medium haulm.*—Yields heavily without waste. Very free from disease and a first-class cooker when grown on light and medium soils. A very useful Potatoe where space is limited, for it can be dug in an ordinary season during June.

Price, per peck of 14 lbs., 5s. Trial Box, 1s. 6d.

	Per Bush. or 1/4 Cwt.	Per Peck (14 lb.)	Per Trial Box.
CARTERS' CHAMPION. — <i>White skin, yellow flesh.</i> —An old and popular early Kidney	5	01	6
CARTERS' IMPROVED EARLY ASHLEAF. — <i>White Kidney, yellow flesh, small top.</i> —The best selection of the type. Suitable for all soils	12	03	61 3
RIVER'S ROYAL ASHLEAF	10	63	01 0
MYATT'S EARLY PROLIFIC ASHLEAF	8	62	61 0
VEITCH'S ASHLEAF	12	03	61 3
RINGLEADER. — <i>An early white Kidney</i>	5	01	6

EARLY ROSE.—*Oval shape, pink skin, white flesh, and medium haulm.*—We were one of the first to bring this fine American Potatoe to notice, and still hold the same stock as originally imported. The dry Summers of the past few years has brought it into prominence again, and we have a limited quantity to offer for light and medium soils

EARLY PURITAN.—*White fleshed American Kidney* that thrives best upon medium soils. It does not grow a lengthy haulm and is a good cropper

VICTOR (SHARPE).—We offer the true yellow-fleshed variety of this early short-top Kidney

Per Bush. or 1/4 cwt.	Per Peck (14 lb.)	Per Trial Box.

FIRST PRIZE CARTERS' SNOWBALL Class 34, 9 entries.
FIRST PRIZE CARTERS' SNOWBALL Class 40, 7 entries.

FIRST PRIZE CARTERS' SNOWBALL Class 36, 8 entries.
FIRST PRIZE, NEWBURY, 1897.

THESE PRIZES WERE OFFERED FOR THE BEST NEW VARIETIES OF POTATOE.

In an important trial of new Potatoes made in Sussex this year, the report says:—"Amongst the new varieties grown the palm must be given to Carters' Snowball."

CARTERS' SNOWBALL.—In the Royal Horticultural Society's trials of new Potatoes in 1895, no less than 67 sorts were sent from all parts of the country, with the result that only five were considered of sufficient merit to be given the highest honours. One of these good things was sent in by a Customer of ours, and under the name of Cockerill's Seedling received the Three Crosses for cropping and cooking properties. We have acquired the whole of the stock, and are now offering it under the name of "Snowball," a description that seems to well bear out its qualifications. The following is the Raiser's description:—"A cross between 'Schoolmaster' and 'The Canon,' almost round in shape, rough skin, white flesh, mid-season variety with a medium haulm, free from disease, and a very heavy cropper on all soils."

Price 7/6 per peck of 14 lbs. Trial Box, 2/6.

CARTERS' ASHTOP FLUKE.—*White Kidney.*—Of beautiful form with a level surface. This is the best type of the Lapstone section. For light and medium soils...

CARTERS' COSMOPOLITAN.

First-Class Certificate, Royal Horticultural Society.

Cosmopolitan is an excellent white oval, producing heavy crops of tubers, which are remarkably handsome and of very fine quality.

CARTERS' SURPRISE.

This distinct Potatoe possesses qualities that must make it a public favourite, whether for exhibition or for the table. It is a very handsome pebble-kidney in form, the result of a cross between **Magnum Bonum** and **Myatt's Prolific Ashleaf Kidney**; skin white and rough, with eyes level with the surface, and is distinct from any other sort in cultivation. Succeeds on all soils...

CARTERS' DISEASE-RESISTING SEED POTATOES.

MID-SEASON AND MAIN CROP POTATOES.

NEW VARIETY.
CARTERS'
MONARCH.

FIRST PRIZE, BATH,
1894, 1895, 1897,
In large Competitions.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' MONARCH.

We have the pleasure to offer a new Potatoe, another of the very select few honoured with the highest credentials from the Royal Horticultural Society after critical trial both for cropping, shape, and cooking properties.

It was raised by Mr. W. J. Stokes, near Trowbridge, in a district famous for good potatoes, and is described by him as a cross between *Sharpe's Victor* and *Schoolmaster*, a parentage surely of sufficient merit to stamp it a first-class variety. In shape it varies somewhat, as we have found both round and oval-shaped tubers upon a single root.

It was exhibited by the raiser at the great BATH SHOW, and in a large competition easily secured the FIRST PRIZE.

We offer a limited quantity. Price 7s. 6d. per peck of 14 lbs.; 2s. 6d. per trial box.

CARTERS' GOLDFINDER.—*White Oval.*—A grand Potatoe for winter and spring use on all soils. Handsome in shape, very shallow eyes, absolutely no waste, flesh fine in texture, floury white, and quality superb. We introduced this Potatoe a few seasons since, and it seems to have borne out its reputation ...

MUCH REDUCED IN SIZE.

CARTERS' KING OF THE RUSSETS POTATOE. *For description see below.*

Per bushel of $\frac{1}{2}$ -cwt., 14s.; per peck of 14 lbs., 4s. 6d.; per trial box, 1s. 3d.

CARTERS' KING OF THE RUSSETS.—

A very popular Round Potatoe on the Exhibition Table in the Red Classes. Awarded Two Certificates of Merit at the Vegetable Conference of the Royal Horticultural Society; Twenty-two First Prizes have also been reported to us by our Customers. A heavy cropper and good keeper. Can be grown on any soil and boils like balls of flour.

"King of Russets does remarkably well with me, and the crop has this year averaged a little over 12 tons to the acre, the tubers large, clean, and shapely, and the percentage of seed size only about one in 11 bushels.

"Mr. E. BURRELL, Head Gardener to H.R.H. The Duchess of Albany."

JEANIE DEANS.—A useful white pebble-shaped Potatoe. Heavy cropper, a good keeper, cooking very firm and floury for six months after lifting. Does well on all soils. The tubers boil well when lifted quite young

IMPERATOR (Re-selected).—*White Oval*.—A large-keeping Potatoe and a heavy cropper on all soils

UP-TO-DATE.—This is a robust growing Scotch Potatoe, best adapted for cultivation in large areas where the consumption is great

LAWNS MADE FROM SEED.

CARTERS' INVICTA GRASS SEEDS, specially prepared for Suburban and Country Lawns, as supplied to H.M. The Queen at Buckingham Palace, H.R.H. The Prince of Wales at Sandringham, Royal Parks of London, Crystal Palace, &c., &c.

WITHOUT CLOVER.—Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.; 1s. per packet.

WITH CLOVER.—Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.; 1s. per packet.

One lb. of seed will sow one rod of new ground (6 yards by 5), or 4 bushels will sow 1 acre of new ground; one-fourth to one-half this quantity is sufficient for repairing a worn Lawn.

Our prescriptions are composed only of the greatest wear-resisting species of fine growth.

For Sowing under Trees or in Shady Places.

We are frequently asked for a prescription of Grass Seeds that will produce herbage likely to thrive in situations generally denuded of growth, such as under Trees or on Lawns that are in a confined space, and upon which the sun and air cannot exert their influences. It would be presumption on our part to lead our customers to believe that we can cover such spots with a close velvety turf such as exists in the more exposed portion of their Lawn. At the same time, there is no getting away from the fact that certain grasses will thrive in shaded situations, as witness the close under-growth in old copses, along green drives, and under established plantations, where is frequently to be found quite a verdant carpet; and it is these self-same species of grasses that we use in our prescriptions. The soil under over-shadowing trees is generally of the poorest description, the roots having taken all the nourishment out of it. Consequently, before sowing, it is necessary to loosen the surface and rake it smooth, sprinkle manure, then roll. Next scratch the surface lightly with a rake, sow the seed thickly, rake again in an opposite direction, then well roll down the whole. If dry weather prevails, a good soaking of water is essential, and more if the hot weather continues. Constant dripping from the branches is very detrimental to grass under trees as it rots their fibrous roots, and the growth wilts away.

Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.; 1s. per packet.

For Pleasure and Recreation Grounds.

"LADY WATKIN WILLIAMS hopes for the same success she enjoyed with the grass seed two years ago, which was perfectly green within two months of sowing, and has been continually admired since."—*Pinner*.

Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.; 1s. per packet.

For Tennis, Croquet, and Bowling Greens.

SPECIALLY PRESCRIBED TO SUIT ALL SOILS.

Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.

To form a new Tennis Lawn of the regulation size (78 feet by 36 feet), with a margin for running back, 1 bushel of seed is required.

For mending a worn ground, one-fourth to one-half this quantity of seed is desirable.

"Carters' Grass Seeds only have been used on All England Tennis Ground, Wimbledon, for the last eight years, and they have given every satisfaction."—(Signed) T. COLEMAN, September 12th, 1894.

For Cricket Grounds.

SPECIALLY PRESCRIBED TO SUIT ALL SOILS.

Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.

The seed may be sown on a new ground at the rate of 4 bushels per acre, as soon as we are in touch with spring—after the March winds have spent their force. Under the showers of April the young grass will grow with amazing rapidity, and with careful mowing and attention the ground should be fit for play in June or July. On a worn ground, where the grass is thin, the seed may be sown during February or March, at the rate of 1 to 2 bushels per acre, and the pitch should be ready to play on as soon as the season opens.

USED AT LORD'S.

"Lord's Cricket Ground has been marvellously improved for many years by the use of Carters' fine Grass Seeds, as specially prepared, and I can strongly recommend its use to secretaries and others interested in the game. We use no other seeds but Carters'."—(Signed) PERCY PEARCE, Superintendent.

USED AT THE OVAL.

"Carters' Grass Seeds only have been used on the Surrey Cricket Ground, Kennington Oval, during the last seven years."

(Signed) C. W. ALCOCK, Secretary.

For Golf Links and Football Grounds.

SPECIALLY PRESCRIBED TO SUIT ALL SOILS

GOLF LINKS.—The old and ancient game of Golf has of late years taken fast hold of the land, and important Clubs are springing up in all directions. Almost all the old battle grounds of Golf are of natural formation, generally situated near the sea shore where certain fine species of Grasses have speared through the sand and formed in the run of ages a close, short turf. These little oases lying here and there between natural hazards make the best of Putting Greens; again Golf is played upon many old time-open spaces, where the herbage has for generations been kept down by the constant tread of man or well-grazed by animals. Grass in long and short growth is king on a Golf Course, whether in covering artificial hazards, hillocks, or bunkers; amongst bushes, in ditches or cunningly concealing the holes and giving a freshness to the neatly-trimmed Putting Greens. It must be there in its full beauty, adding sport to the game and enjoyment to the players.

TOM DUNN, the Celebrated Professional Golf Player, says:—"I have used Carters' Grass Seeds for the last twenty years at Tooting Bee Golf Links, and on various other Golf Links, and can confidently recommend them. Within the last few months I have had sown at the Bournemouth Corporation Golf Links over 200 bushels, which have produced excellent results."

CARTERS' INVICTA GRASS SEEDS,

Specially prepared for Putting Greens.

Price 25s. per bushel; 3s. 3d. per gallon; 1s. 3d. per lb.

CARTERS' GRASS SEEDS,

Specially prepared for Golf Links and Football Grounds.

Price 20s. per bushel; 3s. per gallon; 1s. per lb.

Manures for Stimulating Grass.

Grass that is kept constantly under the influence of the Mower requires stimulating at intervals, or it will weaken and become thin. The following special prescriptions are based upon many years' experience, and are most useful for the purpose of imparting vigour, closeness, and colour.

CARTERS' LAWN MANURE, No. 1.

1s., 2s., and 3s. per box; 14 lbs., 4s.; 28 lbs., 7s.; 56 lbs., 10s.; 112 lbs., 18s.

DIRECTIONS FOR USING CARTERS' LAWN MANURE.—For putting down a new lawn, it should be sown as soon as the ground is thoroughly prepared for the seed, and raked in, care being taken to distribute it as evenly as possible, as the appearance of the Lawn will be materially affected by this. For top dressing, it should be sown immediately after cutting the grass, and, if possible, just before a shower of rain. If the weather is dry, water the Lawn after top dressing. For renovating, it may be sown with the seed. This manure will be found very effective and lasting. It should not be exposed to a hot sun when stored, or kept in a damp place.

A 14-lb. bag will dress 1,000 sq. ft.

A 3s. box will dress 500 sq. ft.

A 2s. box will dress 200 sq. ft.

A 1s. box will dress 70 sq. ft.

CARTERS' SPECIAL GRASS MANURE, No. 2.

CARTERS' SPECIAL GRASS MANURE discourages the growth of all weeds, stimulates and improves the growth of the grass, and produces a sward of a rich emerald green colour. Apply at the rate of 2 oz. to the square yard. A 2s. 6d. Box will dress 60 square yards; a 50-lb. bag will dress a tennis court or a cricket pitch. We recommend our customers to purchase only sufficient for immediate wants as it is liable to deteriorate if kept for any length of time.

Used with great success at the "Oval" during the past season.

In sealed bags, 14 lbs., 5s. 6d.; 28 lbs., 9s. 6d.; 56 lbs., 15s. 6d.;

112 lbs., 25s. Trial boxes, 2s. 6d. Sow 4 cwt. per acre.

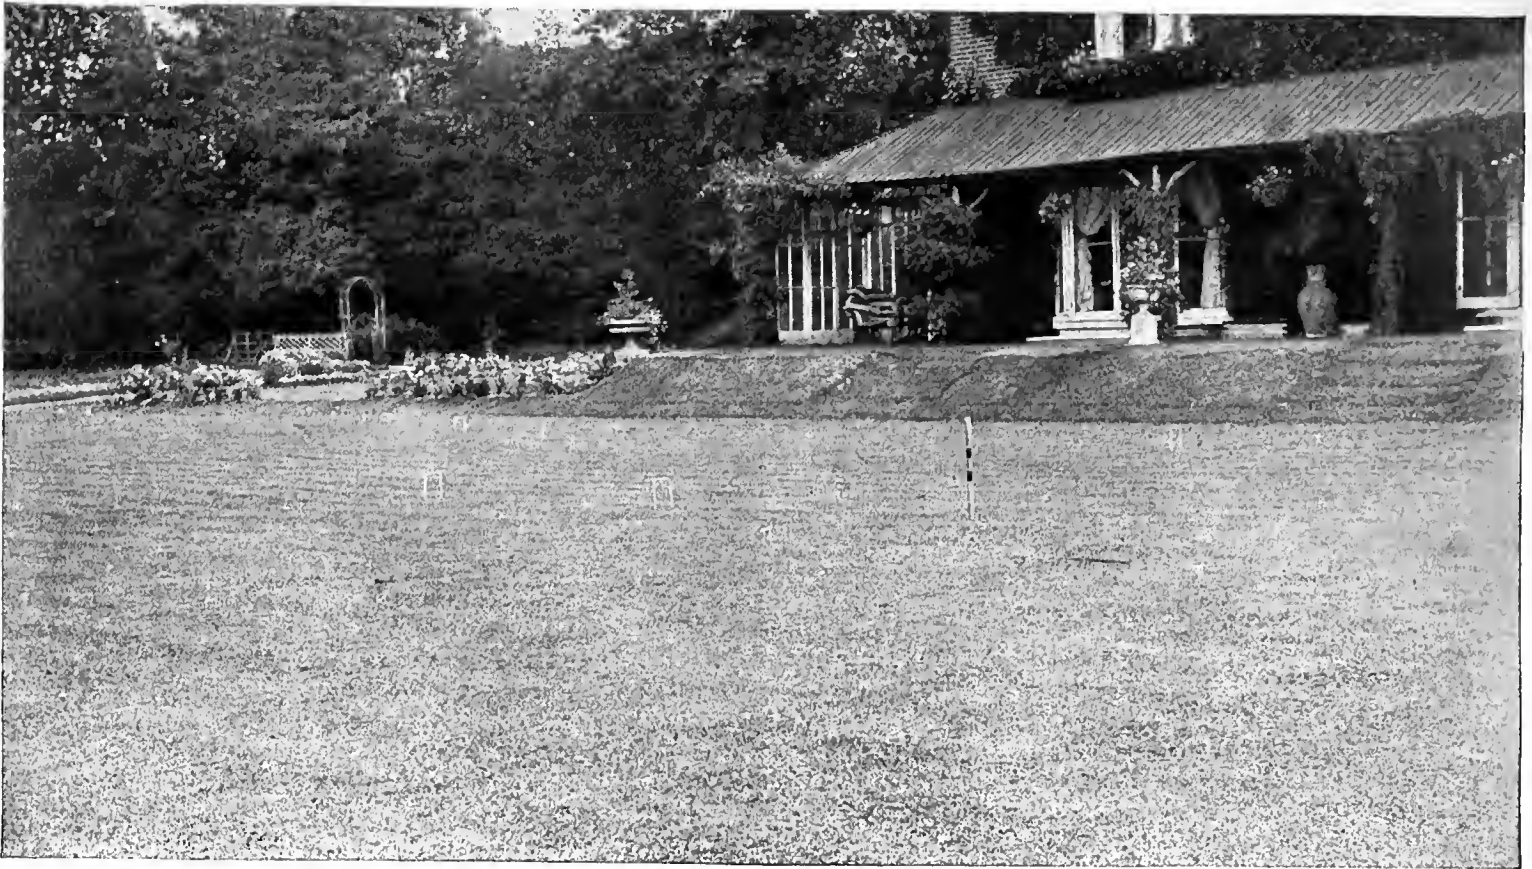

One Acre can be thoroughly well produced with our Seed at a Cost of about £5.

A LAWN OF ONE ACRE FORMED OF LAID TURF WOULD COST £50 AT LEAST FOR THE TURF ALONE.

USEFUL CULTURAL DIRECTIONS ARE SENT WITH EVERY PARCEL. ALL CARRIAGE FREE.

CARTERS', 287, 288, & 97, HIGH HOLBORN, LONDON.—1898.

A LAWN IN SIX WEEKS FROM CARTERS' INVICTA GRASS SEEDS.

M. C. SAPTE, Esq., Fittleworth, Sussex, writes June 8, 1897:—"It may interest you to learn that a lawn here, sown with your Grass Seeds in the latter part of April (about the 20th), was mown with a machine on Saturday last, the 5th inst., having been previously cut with a sickle. The turf is thick, firm, and rich, and looks as if it had been down for months. Everyone about here is amazed at such a result having been obtained in so short a time."

"I am delighted with Carters' Grass Seeds, the growth wanted cutting in less than three weeks."
A. HALFORD, Esq., Frodsham.

"The lawn produced from Carters' Seeds has been a very great success and much admired."
Dr. GOODMAN, Croft Lodge.

A Customer at Bournemouth writes:—"I am more than surprised at the result of sowing a lawn on the poor and arid soil here. My gardener laughed when I suggested the idea; he cannot now sufficiently praise you. Any local customer can see my lawn on your introduction."

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

CARTERS' NOVELTIES AND SPECIALITIES FOR 1898.

Double Scabious, "The Pompadour."

Photographed from Nature and Copyrighted by J. C. & Co.

REDUCED IN SIZE.

A good improvement upon the old garden favourite Scabious. The individual florets are increased in size and variety and intensity of colours. An excellent border plant, and first class as a cut flower for decorative purposes.

No. 1330. Price, in sealed packets, 1s. each.

Giant Pæony Poppy, "Nankeen."

Photographed from Nature and Copyrighted by J. C. & Co.

REDUCED IN SIZE.

This is an entirely new colour in our grand strain of Pæony Poppies. A pale lemon, affording a pleasing contrast to others of a more vivid hue. The form and substance of the blossom is superb and majestic.

No. 1332. Price, in sealed packets, 1s. each.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

Lobelia ramosa, "Heavenly Blue."

Photographed from Nature and Copyrighted by J. C. & Co.

The *Lobelia ramosa* of Australia is an old favourite for pot or basket work, and this variety presents an entirely new colour, viz., celestial blue, after the *Myosotis* pattern, and cannot fail to be of interest to the many lovers of this class of flower.

No. 1331. Price, in sealed packets, 1s. each.

Giant Pæony Poppy, "Snowball."

Photographed from Nature and Copyrighted by J. C. & Co.

REDUCED IN SIZE.

A New Zealand variety of enormous size and matchless beauty, and a fitting companion to the much-admired *White Swan*. For stately effect in the mixed border, this Poppy would be hard to beat, and it cannot fail to give satisfaction.

No. 1333. Price, in sealed packets, 1s. each.

CARTERS' NOVELTIES AND SPECIALITIES FOR 1898.

Godetia, "Gloriosa."

Photographed from Nature and Copyrighted by J. C. & Co.

This is one of the grandest Annuals ever introduced. All the Godetias are free bloomers, and this variety accentuates the excellence. Colour, intense vivid crimson. Habit excellent. Height, 1 foot. Altogether a NOVELTY OF SURPASSING MERIT. Strongly recommended.

No. 1334. Price, in sealed packets, 1s. and 2s. 6d. each.

Chrysanthemum, "Golden Button."

Photographed from Nature and Copyrighted by J. C. & Co.

This charming flower is singularly attractive from its elegant neatness of habit and the chaste beauty of its numerous small blossoms of pale gold colour. A perfect gem for dwarf borders or in pots, we anticipate a great future for this plant.

No. 1336. Price, in sealed packets, 1s. and 2s. 6d. each.

CARTERS', 237, 238, & 97, HIGH HOLBORN. LONDON.—1898.

New Crested Cyclamen, "Pioneer."

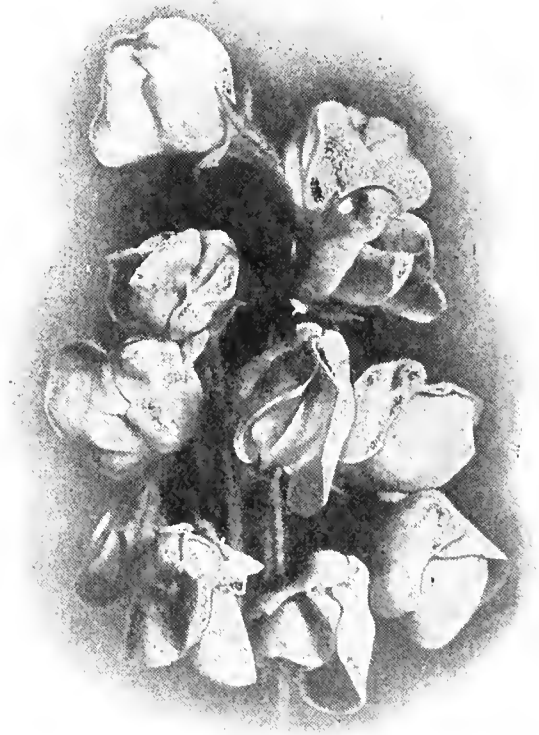

REDUCED IN SIZE.

Flowers of good substance, pure white, with a distinct crest or feather on each petal. This is evidently the precursor of a new race of Cyclamen, and may possibly result in the formation of coloured crests upon a white ground, or *vice versa*. We recommend this variety as a novelty of sterling merit.

No 1335. Price, in sealed packets, 2s. 6d. and 5s. each.

New Sweet Pea, "Red Riding Hood."

Photographed from Nature and Copyrighted by J. C. & Co.

This is a singular and unique departure from the usual form of the Sweet Pea. The standards instead of expanding are convoluted, and enclose the wings in the form of a hood. Colour rosy pink to bluish white. It is an early blooming variety, and is remarkable for profusion and continuity of bloom, and is also one of the most powerfully scented varieties, and will make a desirable addition to a mixed posy.

No. 1185. Price, in sealed packets, 1s. each.

CARTERS' NOVELTIES AND SPECIALITIES FOR 1898.

New Aster, "Purple Bijou."

Primrose, "Golden Cluster."

Photographed from Nature and Copyrighted by J. C. & Co.

REDUCED IN SIZE.

This is the neatest and dwarfiest of *Quilled Asters*, height 9 to 12 inches, profuse in blossom, colour crimson-purple, most excellent as a pot plant or in dwarf beds or clumps. It is much more effective in appearance than from description.

No. 1337. Price, in sealed packets, 1s. and 2s. 6d. each.

Photographed from Nature and Copyrighted by J. C. & Co.

This magnificent selection from our own unparalleled strain, forms beyond dispute one of the most delightful of spring bedding plants. As single plants or in clumps and masses most grandly effective, and for general delicate beauty, unsurpassed by any other spring flower.

No. 995. Price, in sealed packets 1s. and 2s. 6d. each.

Physalis Francheti, Chinese Lantern Plant.—This is a new variety from Japan of the old Winter Cherry *Physalis Alkekengi*. Grows from 1 to 2 feet high, erect, finely formed foliage which sets off the brilliant-coloured seed pods to great advantage. The pods are the most striking feature of the plant, about 2 inches in diameter, shining orange-red, enclosing an edible cherry-like fruit used as a preserve. This plant is peculiarly valuable for all sorts of decorative work.

No. 956. Price, in sealed packets, 1s. each.

Phlox nana compacta cœrulea.—A delightful new colour in this interesting and beautiful class of plants. A most profuse bloomer and continues in bloom for months. It is equally adapted with the other varieties for dwarf or miniature bedding or for pot work for conservatory.

No. 1338. Price, in sealed packets, 1s. each.

Primrose, "New Blue."—We are somewhat surprised that this extraordinary novelty has not met with a phenomenal reception as it is the realization of the hope of years. Perhaps the idea of a Blue Primrose appears incredible, but here is the fact, and all lovers of hardy plants should avail themselves of the opportunity of obtaining a really valuable acquisition.

No. 994. Price, in sealed packets, 1s. 6d. and 2s. 6d. each.

Single Dahlia, "New Perfection."—The varieties of single Dahlia have held for a long time a high position in popular esteem, and we think this new selection merits a warm welcome. The general form and habit of the flowers are similar to the older kinds, but there is a great development in the size of the blossoms, often exceeding 6 inches in diameter. The brilliant effect of these in masses can be conceived. For mixed borders in large gardens or as individual specimens they are much to be desired.

No. 1339. Price, in sealed packets, 1s. and 2s. 6d. each.

Heartsease (Pansy), "President Carnot."—This is one of the most strikingly distinct Pansies ever brought out. Colour, bright purple-blue, with a margin of pure white round each petal. It will undoubtedly prove a great success as a bedding variety either alone or mixed with Variegated Geranium, &c.

No. 623. Price, in sealed packets, 1s. and 2s. 6d. each.

"I was very pleased with the quality of your seeds last year, and I was successful in taking 14 first prizes and 2 second prizes at our Enfield Show."

Mr. H. GUYMER, Enfield.

"Your seeds give every satisfaction to the gardeners, ourselves, and visitors."

T. BENNETT GOLDREY, Esq., Goodnestone Park.

CARTERS' BOXES OF POPULAR FLOWER SEEDS

(FREE BY POST OR RAIL).

In various-sized packets to suit all Buyers, containing only the best varieties. The greater part may be successfully cultivated in Pots, forming charming groups for the Conservatory and Window.

CARTERS' ÆSTHETIC or DECORATIVE FLOWERS

FOR CUT BLOOMS.

Culture.—**HARDY ANNUALS.**—Sow in frames from March to April, and transplant when the plants are strong enough, but if earliness of bloom be not a desideratum, it is perhaps preferable to sow in the open borders, where they are intended to bloom, during April and May, in a top-dressed soil of loam, sand, and leaf mould, taking care to sow thinly and weed carefully in the earlier stages of growth.

„ **HALF-HARDY ANNUALS.**—Sow in gentle hot bed in March and April, and keep in warmth until the middle of May, or in favourable seasons they may be sown out of doors during the month of May. Sow thinly, and water freely if necessary.

„ **PERENNIALS.**—Sow in Spring on gentle heat, and prick off the seedlings until end of June; or sow in the open air on prepared beds of light soil from March to May, transplanting as occasion requires. Sow also from July to September for early Summer blooming the following year in prepared beds, covering with dry leaves or straw during the Winter.

„ **ÆSTHETICS.**—All flowers are beautiful to lovers of Nature; the term Æsthetic is here employed to indicate simplicity and elegance of form, with chasteness in colouring, and the undermentioned combine these qualities in an eminent degree. They are specially selected for their suitability for bouquets or vase decoration. As cut flowers are now indispensable to the perfect decoration of house interiors, it is essential to have a continuous supply, for which purpose we strongly recommend the utilisation of the kitchen garden and store beds, whence reserves can be drawn for the mixed borders, or cut from as occasion may require. A graceful effect is produced by the commingling of sprays of ornamental grasses with the cut flowers, for complete list of which see page 84.

Photographed from Nature and Copyrighted by J. C. & Co.

CALLIOPSIS GRANDIFLORA.

Culture.—Sow in Spring and plant out as soon as the seedlings are strong enough, or sow in the place where they are intended to flower, and thin out as may be necessary. If the seed pods are picked off as soon as they show, the plants will continue in bloom much longer. Sow also in September.

No.				Per packet.—s. d.
282	CALLIOPSIS GRANDIFLORA.	—Brilliant golden	1s. and 0 6

ÆSTHETIC FLOWERS.

No.				Per packet.—s. d.
1311	STAR FEVERFEW (<i>Perennial</i>).	—Great favourites, with a good variety of colour; well known and admired. Height, 1 ft.	2 6
1312	WHITE MARGUERITE (<i>Perennial</i>).	—This species is of an excellent dwarf habit, producing blossom in abundance. Height, 1½ ft.	1 0
1313	YELLOW MARGUERITE (<i>Perennial</i>).	—A strong compact growing species; rich colour, continuous bloomer. Height, 1½ ft.	1 0
1314	SILVER THISTLE (<i>Perennial</i>).	—This plant as a unique ornament to the mixed border is unsurpassed; a fine single specimen for a hall vase; bright metallic lustre. Height, 2½ ft.	1 0

No.				Per packet.—s. d.
-----	--	--	--	-------------------

1315	BLUE CORNFLOWER (<i>Annual</i>).	—This is an undeniable favourite as a cut flower; a profuse bloomer. There are other colours of this excellent annual, especially a mixture of good so-called double varieties, see No. 442, page 105; the blue is, however, the generally preferred. Height, 1½ ft.	1 0
------	---	---	-----	-----

1316	LEOPARD POPPY (<i>Annual</i>).	—A dwarf variety of neat habit, beautiful and attractive; colour deep crimson with a black spot at the base of each petal. The merits of this pretty flower are somewhat overshadowed by the Iceland Poppies, for which see page 95. Height, 6 inches	1 0
------	---	--	-----	-----

1317	GOLDEN SUNSET (<i>Perennial, flowering the first season</i>).	—This is a flower of surpassing merit, far and away the best of the Coreopsis tribe, blossoms of large size and in the greatest profusion; colour rich golden yellow, deepening in hue towards the centre; a brilliant adornment to the mixed border, and excellent cut flower. Height, 2 ft.	1 0
------	--	--	-----	-----

1318	CRIMSON SPRAY (<i>Perennial</i>).	—A flower belonging to the tribe of Saxifrages and of rare merit, creating quite a <i>furor</i> on the continent of Europe. It possesses the usual neat habit of its class, with more than the usual amount of blossom; colour bright crimson scarlet, the spray of bloom somewhat resembles that of a red Lily of the Valley; it will doubtless soon become universally popular. As a neat nosegay flower unsurpassed. Height, 1 ft.	2 6
------	--	--	-----	-----

1319	BLUE MARGUERITE (<i>Perennial</i>).	—A hardy flower, producing blossoms on long stalks; admirable for cutting. An excellent companion to the class of flowers known as Marguerites. Height, 1½ ft.	1 0
------	--	---	-----	-----

1320	BLOOD MARGUERITE (<i>Annual</i>).	—Fine, free-blooming plant, after the character of the favourite Single Dahlia, but slenderer in the petals and longer in the stalk; it is equally suitable as a cut flower for the mixed border. Can be recommended as a plant of great general utility. Height, 1½ ft.	1 0
------	--	---	-----	-----

1321	CAUCASIAN BEAUTY (<i>Perennial</i>).	—Suitable alike for the rockery or mixed border, and when well established is a free bloomer. It is a flower of peculiar form, colour delicate lavender blue; a cut flower of great merit. Height, 1½ ft.	1 0
------	---	--	-----	-----

1322	PENNANT PINK (<i>Perennial, flowering the first season</i>).	—An importation from Japan, in its true form producing long petals deeply lacinated; colours rich and beautifully varied; long and continuous bloomer. Excellent in groups, beds, or small clumps and a first-class flower for cutting; the tribe to which it belongs is too well known to need comment. Height, 1 ft.	1 0
------	---	---	-----	-----

No. 1323. COMPLETE COLLECTION OF ABOVE 12 (Nos. 1311 to 1322) ÆSTHETIC FLOWERS, 6s.

"I had intended to inform you that my Plume Asters were quite a success last year, and took first prize at the Hwall Show. Many of them were splendid blooms, one root especially was a beautiful pink colour."—Mr. C. BENNETT, Barnston.

"I have a splendid show of your Crimson Bedding Aster. It is a perfect show with me. From 12 to 20 blooms on each plant, each $3\frac{1}{2}$ to $4\frac{1}{2}$ inch diameter. I also have many blooms of your White Plume Aster 5 and $5\frac{1}{2}$ inches across, curled and crested beautiful, all grown in the open air."—Mr. B. PALMER, Abergavenny.

"We had a fine show of bloom from your seeds last year, particularly the Asters, which were greatly admired by lots of visitors to The Elms."

Mr. J. SMITH, The Gardens, The Elms, Claygate.

IMPORTANT FACT.—Some "sixty years since" the floral world was startled and delighted by the introduction into England for the first time of the **Sealed Packets of German Asters and Stocks** by our late Mr. James Carter. The original cultivator continued to grow for us alone until his decease a few years since, and our present supplies are grown expressly for us and rigidly selected

Our Annual Trials exceed 10,000 plants.

CARTERS' SELECT ILLUSTRATIONS OF CHOICE FLOWERS.

ANEMONE, CARTERS' ST. BRIGID.

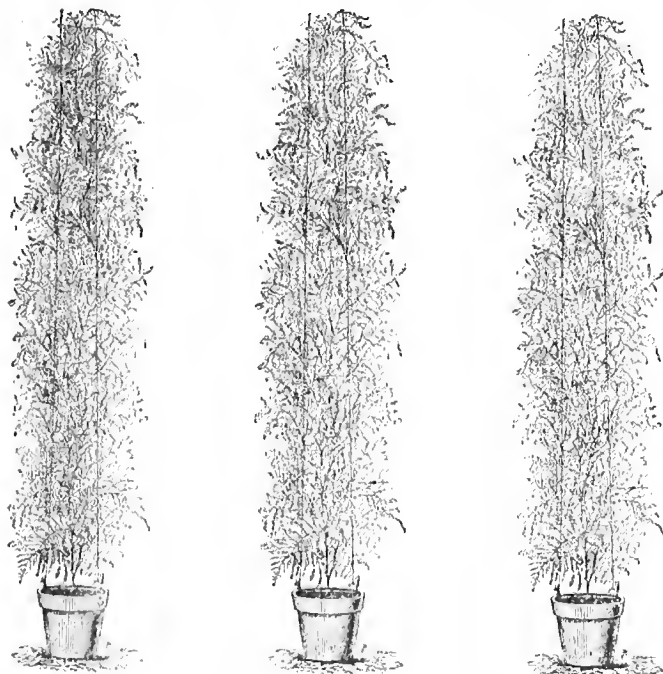

We were the first house to introduce these beautiful flowers. A new era in flower-growing has been inaugurated by the system recommended by Mr. Burbidge, F.L.S., and we feel satisfied that if our Customers who are accustomed to plant Anemone Bulbs will also sow this Seed, it will produce a variety of charming forms hitherto unknown.

No. 180.—In sealed packets, price 1s. 6d., 2s. 6d., and 5s. per packet.

For List of other Varieties of Anemone, see page 102.

"The bed of Anemones I have now in flower from last year's sowing of your seed is quite a mass of grand flowers, and much admired by all who have seen them."—Mr. E. MORRIS, The Gardens, Burrowmore Hall.

ASPARAGUS PLUMOSUS NANUS.

Splendid Half hardy Perennial for conservatory or for cutting for bouquets or button-holes. Universal favourite.

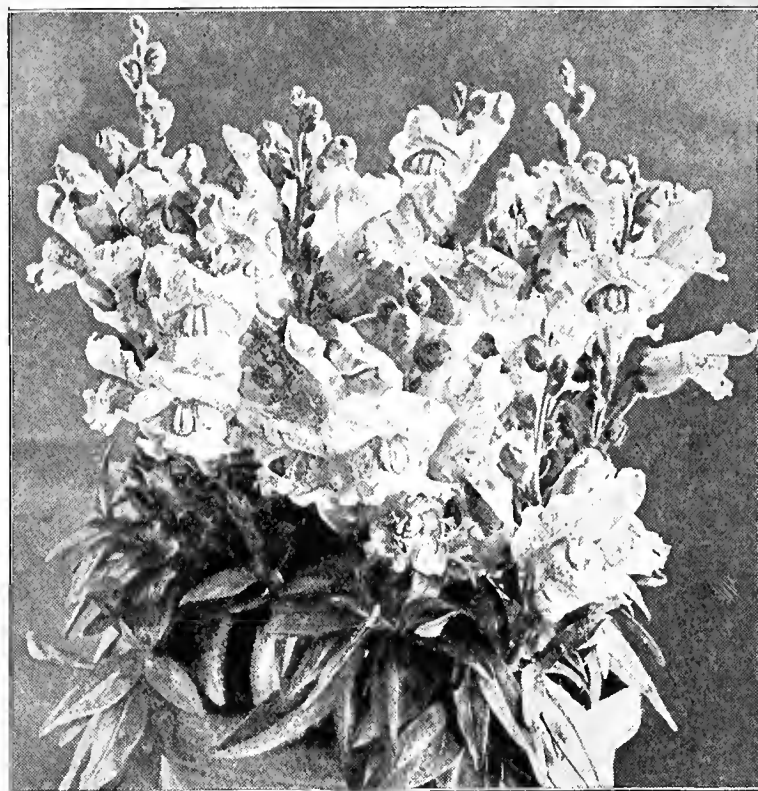

Culture.—Sow in spring in pots or pans on heat, prick off the seedlings when they have formed the second leaf, grow them on in heat till end of May, when they may be planted out.

No. 212 Asparagus plumosus nanus ... Per packet.—s. d.
1/6 & 2 6

"Great praise should be given to your New Star Antirrhinum which is doing remarkably well with me this Summer. Sown last week of February, I got them in bloom on June 20th, and writing now, July 6th, they are in one mass of splendid bloom and exquisite colours too numerous to mention, growing to the height of 6 to 10 in. and about 1 ft. in circumference, making fine burly plants. Every gardener who has to grow so many Annuals for bedding, this should take the lead, as they are of no trouble to raise or grow."
"Mr. YEO, Gardener to Dean Bunbury, Corbally."

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

CARTERS' SELECT ILLUSTRATIONS OF CHOICE FLOWER SEEDS.

BALSAM— CARTERS' "CHALLENGER" PRIZE.

Photographed from Nature and Copyrighted by J. C. & Co.

MUCH REDUCED IN SIZE.

CARTERS' "CHALLENGER" PRIZE BALSAM.

MATCHLESS IN FORM, SUBSTANCE, SIZE, AND COLOURS.

Culture.—Balsams may be sown from the beginning to the middle of April in pans or on a slight hot bed, in a light rich loam and vegetable compost, covering the seed about $\frac{1}{2}$ an inch, keeping the soil moist, but not wet. When the plants have formed the second pair of leaves they may be transplanted, four round the edge of a 6-inch pot, and gradually hardened off for transplanting out of doors; or they may be planted in a cold pit, 4 inches apart, as near the glass as possible, giving more air as the season advances until June, when they may be turned into the open borders, the warmest situations being the most suitable. If for pot culture, they must be divided and transplanted into single pots, once or twice into larger pots, picking off the flowers in the earlier stages of growth to give greater vigour to the plant, and watering freely in dry weather.

These Balsams are as double as Roses and as handsome as Camellias, and are not to be surpassed by any others, wherever they may be.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

BEGONIA— CARTERS' "CROWN JEWELS."

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' "CROWN JEWELS" SINGLE AND DOUBLE BEGONIAS.

Saved at our Nurseries from one of the finest groups in Europe, including only the newest and best forms, many of which are absolutely novel. This Seed cannot be obtained elsewhere.

No. 257. BEGONIA—CROWN JEWELS "DOUBLE."

Price, in sealed packets, 2s. 6d., 3s. 6d., and 5s. per packet.

No. 256. BEGONIA—CROWN JEWELS "SINGLE."

Price, in sealed packets, 1s. 6d., 2s. 6d., 3s. 6d., and 5s. per packet.

"From the Single Begonia seed supplied by Messrs. Carter, we had 120 splendid plants from a 1s. 6d. packet, all of which bloomed profusely, and not a small or puny flower among them, the colours being beautifully varied."

E. AUSTIN, Esq., New Cross Gate, S.E.

"My beds of Single Begonias were the admiration of all who saw them."

Mrs. HAMILTON, Coxtown, Ireland.

"I enclose a bloom from the Begonia seed I had from Carters'. I have 150 beautiful plants."—JAS. WOOD, Esq., Knockholt.

"From the small packet of seed of Carters' 'Crown Jewels' Begonia I have 195 plants, and the greater portion beat those for size in the coloured plate; they measure from 4 to 5 inches across, and of the most beautiful colours, astonishing all who saw them."—J. SIMS, Esq., Dorset.

"Carters' 'Crown Jewels' Begonias have been greatly admired by all who have seen them."—W. L. HUNTER, Esq., Lancashire.

"For two years you sent me a 5s. packet of Single Begonia seed, which I sowed in a large pan under a handlight, placed in a warm end of an unheated greenhouse. The seed was sown in July. I raised 120 plants, and have had both last and this year a grand show, all shades and colours."

H. A. HEDLEY, Esq., Sutton.

"The Carnation seeds turned out remarkably well, they bloomed most abundantly, and the doubles amongst them were fully 80 per cent., several being really good florists' flowers."—Rev. E. J. POPE, Dorset.

"Mrs. COLLINWOOD begs to say the seedlings raised from Carters' Carnation and Picotee seeds have turned out very rich in various colours, large and double."—Yorks.

Centaurea Margarita.

A GIANT WHITE SWEET SULTAN.

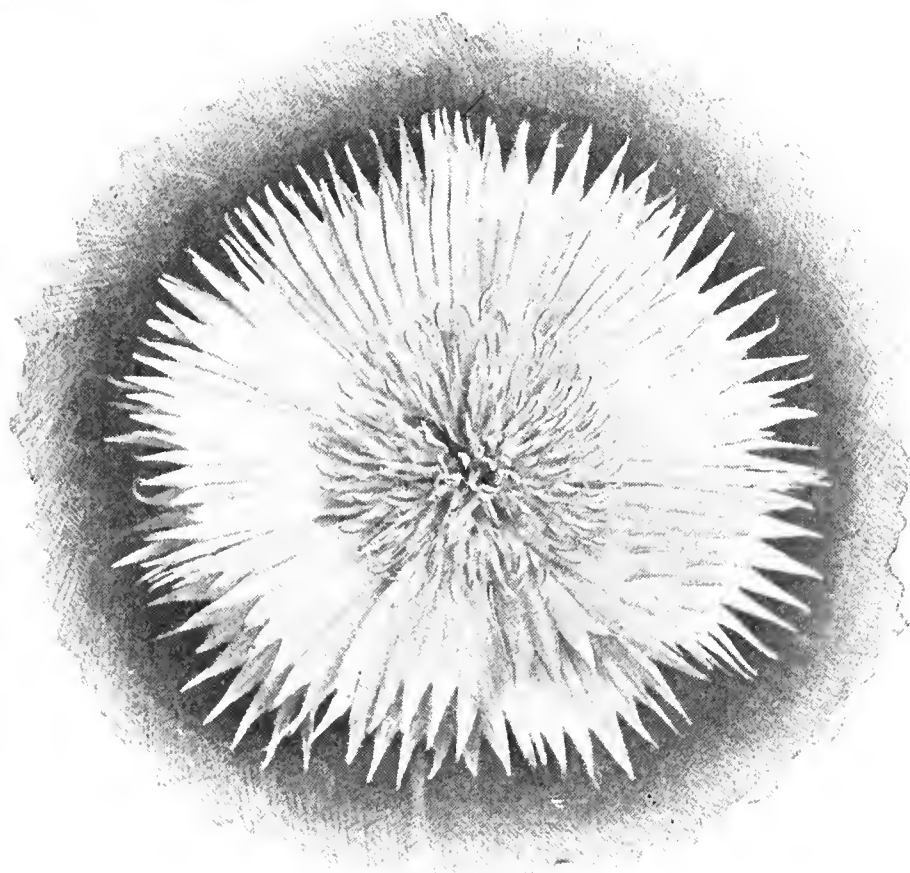

It has seldom fallen to our good fortune to recommend to public notice so exquisite an Annual as this *Centaurea*. The tribe is well known and meets with approbation wherever grown, either under the guise of the much-esteemed Cornflowers of various colours, the universally popular Sweet Sultans, or the beautiful silvery-foliaged kinds of our greenhouses or sub-tropical gardens, but the merits of this particular flower in its own line exceeds all. We speak more emphatically of the *Centaurea Margarita* as a cut flower. The blossoms are much larger than those of any other, and the very essence of white purity. It is most deliciously scented, with long flower stalks to facilitate cutting, and when cut will last in water for a fortnight. In this respect alone it exceeds any other Annual we can call to mind. We give this flower the highest possible recommendation.

No. 355. CENTAUREA MARGARITA.

In sealed packets, 1s. 6d. and 2s. 6d. each.

"MRS. SHEIL wishes me to tell Messrs. Carter what splendid Canterbury Bells she has now in flower from seed supplied by them. They have the most lovely shades of colour, and some of the plants are just in shape like a tree, and very large flowers. Everyone admires them."—Kingsdown.

"I have much pleasure in informing you that the Flower Seeds we had from you this Spring have succeeded most admirably. We had a perfect blaze of colour."—HAROLD SANDS, Esq., Craythorne.

Photographed from Nature and Copyrighted by J. C. & Co.
CENTAUREA MARGARITA.

Canary Creeper.

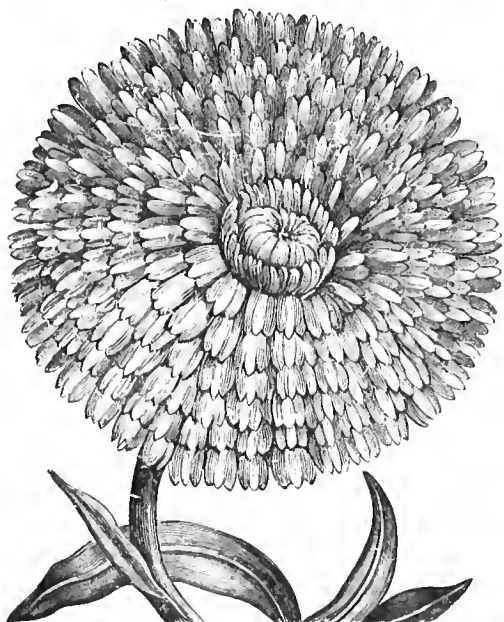

Photographed from Nature and Copyrighted by J. C. & Co.

One of the most graceful of hardy climbers, and deservedly a universal favourite.

No. 300 Canary Creeper (*Tropæolum peregrinum*)... Per packet—s. d. 0 6

Calendula, Carters' "Meteor."

HARDY ANNUAL.

Of all hardy Annuals this is one of the most effective and easily grown; the flowers are large and well shaped; colour yellow, with deep orange stripe on each petal; decidedly handsome.

Culture.—Sow in spring in the open ground, thin out to a distance from 9 to 12 inches.

No. 274 Price per packet, 6d. and 1s.

"Last year your Seeds were excellent, the flowers very large and good colours."
Mrs. CATON, Great Fakenham Rectory.

"The Flower Seeds I had from Messrs. Carter last year were the best in the neighbourhood."
Mrs. BLUETT, Newnham-on-Severn.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898

Carters' Prize Cyclamen Grandiflorum.

AWARDED THE HIGHEST DIPLOMA AND PRIZE MEDAL, CHICAGO EXHIBITION.

Photographed from Nature and Copyrighted by J. C. & Co.
No. 458. CYCLAMEN, CARTERS' WHITE SWAN.

COLEUS, CARTERS' NEWEST VARIETIES.

Photographed from Nature and Copyrighted by J. C. & Co.

Culture.—Sow in spring and summer in well-drained pots filled with peat, prick off into store pots, and in October pot off singly in a mixture of rich loam, leaf-mould, and sand. Keep the plants near the light, giving water moderately, and shift into larger pots and richer soil as the plants progress. Height, 2 feet.

No. 413. Price, in sealed packets, 1s. 6d. and 2s. 6d. per packet.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

Price, in sealed packets, 1s. 6d. and 2s. 6d. each.

No. 451. **CHARMING BRIDE.**—A superb white variety, with large handsome petals, pure in colour and firm in texture; compact habit; robust growth.

No. 452. **CRIMSON QUEEN.**—Beyond doubt the richest colour yet attained in Cyclamen; a bold well-formed flower; colour deep maroon-red.

No. 453. **DIXON HARTLAND.**—The best specimen yet produced of the Giant Cyclamen Persicum; colour pure white, with dark claret base.

No. 454. **DUKE OF CONNAUGHT.**—Handsome distinct flower of a deep cherry colour; blossoms of grand substance and form, and altogether superb.

No. 455. **PRINCESS IDA.**—Delicate fairy-like blossoms, charming; colour suffused blush; with dark rose base.

No. 456. **ROSY MORN.**—One of the finest in form, producing splendid trusses of bloom; clear satin-like petals; colour bright rose, with dark claret base.

No. 457. **SUNRAY.**—Most interesting variety, changing colour during growth, varying from dark to lavender rose, with dark rose; free bloomer.

No. 458. **WHITE SWAN.**—The most profuse blooming White Cyclamen in cultivation; grand flower, with extreme purity of colour.

No. 459. The Collection of above 8 varieties for 9s.

No. 450. Carters' Superb Mixture, per pkt., 1s. 6d. and 2s. 6d.

CYANUS MINOR (CORNFLOWER.)

Photographed from Nature and Copyrighted by J. C. & Co.

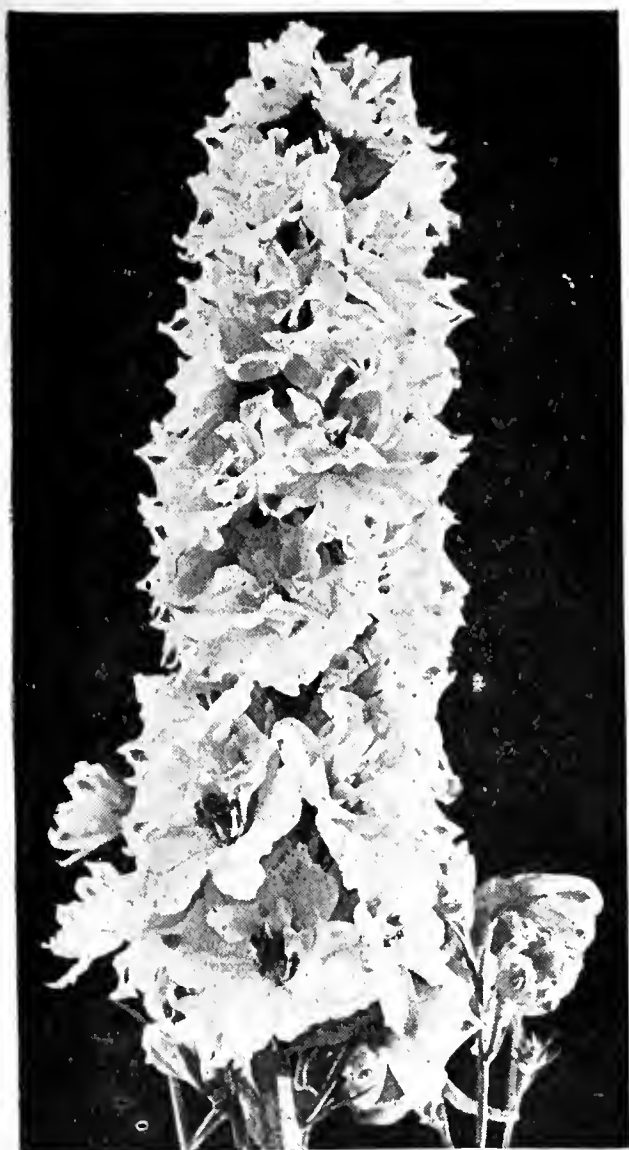

Nothing can be said in excess on behalf of these interesting and useful flowers, offering as they do a good example in hardiness of growth and profusion of blossom, and we cannot greatly err in saying that there is scarcely a cottage in England without some kind of Cornflower. The blue variety has become historical by being the favourite flower of the Emperor William I. of Germany.

CARTERS' SELECT ILLUSTRATIONS OF CHOICE FLOWERS.

Delphinium (Perennial) Larkspur.

Photographed from Nature and Copyrighted by J. C. & Co.

Culture.—If sown in frames early in the Spring some of them will bloom the first Season, but to ensure perfect success we would counsel a sowing in frames in the Summer and early Autumn, transplanting thence to protected store beds, and from thence in the Spring to the places where they are intended to remain; they may also be cultivated with success in pots of a good compost of loam, leaf mould, and a little peat. We recommend these sorts to any lover of perennials with the greatest confidence.

CARTERS' "CACTUS" DAHLIA.

Dahlia, Carters' Choice Selected. GRAND CROSS FERTILISED STRAIN.

Culture.—Sow in Spring in good soil in well-drained pans or pots, pick off singly in pots as the seedlings progress, harden off gradually, and plant out when night frosts are no longer to be feared. The Dahlia delights in a rich, deep, friable soil. The Double Dahlia (*Georgina variabilis fl. pl.*) was for half a century a leading florists' flower, and, indeed, no large garden is now complete without it. The perfect symmetry of form and variety of colour which have been attained will always preserve them from being neglected for any length of time. However, fashion changes, the old order gives way to the new, and the Single Varieties a few years since evoked a species of mania which has not yet subsided, and it must be admitted the graceful shape and brilliant colours of the Single kinds are deserving of the warmest admiration. Now, yet another kind heads the race, the so-called Cactus Dahlia, of which our illustration gives the type; these merit cultivation from their singularity of form, and have not yet reached their zenith. Our strain has been specially hybridised and fertilised with various species, and should produce new kind.

No.		Per packet.—s. d.
463	DAHLIA, CHOICE CACTUS VARIETIES ...	1s. 6d. & 2 6

Photographed from Nature and Copyrighted by J. C. & Co.

No. 492 DIANTHUS, EASTERN QUEEN, per packet 1s.

, 487 DIANTHUS.—All the best varieties mixed as in coloured Illustration on Wrapper, per packet 1s. 6d. and 2s. 6d. each.

Culture.—May be treated either as Annuals or Biennials. Sow in Spring on heat, prick off into prepared beds, and plant out in May. Sow also in April and May in the open ground, thinning out to a distance of eight or ten inches.

Dianthus Chinensis, or Indian Pink.—We are inclined to assert that there is no tribe of hardy flowers more generally known and admired than the "Pink" tribe. We consider the Heddeewigi section to be the finest addition to our annual flora for the last fifty years, and the varieties detailed below are the improved results from the original importation. The choice between Single and Double kinds we must leave to individual taste, both are grandly beautiful, and deserve to be grown everywhere.

No.	Price per packet—s. d.
490 DIANTHUS HEDDEWIGI, "CRIMSON BELLE."—Colour rich crimson; a grand flower. Height, 1 foot	1 0
492 DIANTHUS HEDDEWIGI, "EASTERN QUEEN."—Colour carmine rose, with delicate markings. Height, 1 foot	1 0
491 DIANTHUS DIADEMATUS FL. PL.—A double variety of an extraordinary beauty, edged and marked in a most brilliant manner; a gem. Height, 9 inches	1 0

The Princess of Wales was graciously pleased to call it "An exquisite display."

GAILLARDIA, CHOICE DOUBLE.

Photographed from Nature and Copyrighted by J. C. & Co.

This is one of the most superb perennials in cultivation, effective either in clumps or singly in the border or as a cut flower, the colours are varied, with crimson, violet, cerise, and gold, with brilliant tinted throats.

No. 557. Gaillardia, Choice Double, sealed packets 1s. and 2s. 6d.

"The Double Gaillardia Seeds that I had from you this year were much admired and proved very successful."—Mr. JOSSELYN, Farnham Priory.

GAILLARDIA, CHOICE SINGLE.

Photographed from Nature and Copyrighted by J. C. & Co.

The flowers are unique in their brilliant splendour, and are best treated as half-hardy Perennials, flowering the first season. If sown in the autumn, protect by a covering of straw or dry leaves in the store bed, transplanting in the spring where they are to bloom. Grand flowers of brilliant shades of gold and crimson.

No. 558. Gaillardia, Carters' Choice Hybrids, sealed packets, 1s. and 2s. 6d.

"The Double Gaillardia is a very handsome flower; this and the single too are worthy of a place in every garden."—Mr. BURALL, Hayle.

CARTERS' SELECT ILLUSTRATIONS OF CHOICE FLOWERS.

Carters' Newest and most Brilliant Godetias.

GODETIA—LADY SATIN ROSE.

First Class Certificate, Royal Horticultural Society.

No. 587. In sealed packets, price 1s. and 2s. 6d. per packet.

Culture.—May be sown in seed pans and transplanted to a good, light, rich soil, with plenty of room, when a splendid show may be expected; or may be sown thinly where intended to bloom. Good soil and plenty of fresh air and space to develop are necessary to complete success.

Godetias have sometimes been known as annual *Oenotheras*, and for many years were among the most prominent Californian Annuals of the last generation, but the care and culture that has been bestowed upon them have produced some most marvellous varieties, far exceeding in size of blossom and brilliance of colouring the older kinds, excellent though they were. The appended selection contains the most approved sorts of the present day. Perhaps there is no class of flower producing more abundant blossom. The habit of the species is excellent, and the glossy silky texture of the petals is worthy of close inspection. The glossy beauty of Godetia *Lady Satin Rose* and *White Pearl* is indeed remarkable. It is also to be noticed that the Godetia makes an excellent cut flower, a spike of half-opened buds continue to develop for a long time, if fresh supplies of water be given daily.

Carters' Prize Show and Fancy Hollyhock.

THE CULTIVATION OF THE HOLLYHOCK AS AN ANNUAL.

Now that the Hollyhock has taken a prominent position at most of our leading Flower Shows, we think a few hints on its cultivation will be useful to amateurs, especially as there appears to be a misapprehension as to the time it takes to produce bloom; many persons thinking that the operation takes two years, whereas flowers can be obtained in five months.

GENERAL DIRECTIONS.—Any one possessing an ordinary garden frame can raise the plants from seeds by preparing a slight hot-bed for bottom-heat in February or March. The seed should then be sown on the bed on good loamy soil.

When in rough leaf, the young plants should be pricked out 3 or 4 inches apart in a cool frame, and be transferred to their permanent places, in ground very highly manured, early in April.

If the weather be cold after planting out, pots should be placed over them at night, to be removed on the following morning, and repeated for three or four weeks if the nights are cold.

If these simple directions be attended to, the result will be found to well repay the trouble, fine spikes in the following August and September will be ensured, and the disease to which Hollyhocks have been considered so susceptible will be defied.

CARTERS' SELECT ILLUSTRATIONS OF CHOICE FLOWERS.
Carters' Superb Prize Heartsease or Pansy.

Photographed from Nature and Copyrighted by J. C. & Co.

Culture.—Sow in spring in light soil in pots, and place on bottom heat. When the seedlings are in the second leaf, prick off into store pots, and plant out when hardened off. Sow also from June till August without bottom heat, keep under glass during winter, and plant out in rich soil in spring. In growing Pansies shelter the plants from cutting and the midday sun, keep well drained, and sprinkle with lime water and wood ash to keep away slugs and snails. A little manure water during the blooming season does good, but not too much of it, or what is called root rot may result.

- No. 611. PANSY, CARTERS' "INTERNATIONAL" PRIZE** Magnificent blooms ... Price, in sealed packets, 1s. 6d. and 2s. 6d. per packet.
No. 626. PANSY, CARTERS' "TRIMARDEAU." Blotched varieties ... Price, in sealed packets, 1s. and 2s. 6d. per packet.
No. 613. PANSY, CARTERS' PRIZE SHOW. Mostly selfs; rich colours ... Price, in sealed packets, 1s. and 2s. 6d. per packet.

For complete List of Heartsease of all kinds, see Nos. 611 to 627, on pages 107 and 108.

"The Pansy Seed we had from you last year have produced splendid blooms this Spring. We are very pleased with them."—Mrs. M. PIERCE, Acton.

"I was pleased with the result obtained from your Pansy Seed. From half of one of your shilling packets I raised about 140 plants, and had a splendid show of bloom."—H. C. WYATT, Esq., Grayfield House.

CARTERS' SELECT ILLUSTRATIONS OF CHOICE FLOWERS.

Humulus Japonicus, Japanese Hop.

A splendid annual climber for rapidly covering any arbour, wall, or trellis-work. The foliage is large, dense, and deliciously green, palmate and deeply lobed.

Culture.—Sow in spring in light soil in pots, place them on a gentle heat, and prick off, leaving the young plants in the same temperature till May, when they may be used for covering trellis-work in the conservatory, or warm situations out of doors. Where convenient, to place the young seedlings near the light in a greenhouse during winter, a sowing may be made from June to August.

No. 658 Price, per packet, 1s. and 2s. 6d.

„ 659 New Variegated, 1s. „ 2s. 6d.

The Sea Holly (Eryngium Maritimum).

Photographed from Nature and Copyrighted by J. C. & Co.

A very pretty silvery-white perennial plant with prickly foliage, much resembling our Garden Hollies, it bears a pale blue flower, and is found growing on the coast of Belgium and various parts of our own English shores. It may be grown from seed which should be sown in seed pans in Winter and planted out in the Spring in a soil composed of a mixture (if possible) of sea sand, lime rubbish, and any light soil. It requires considerable moisture, but, at the same time, absolute drainage is necessary. One of the most valuable plants for cut-flower decoration, lasting a long while. Height in cultivation, 1 to 1½ feet.

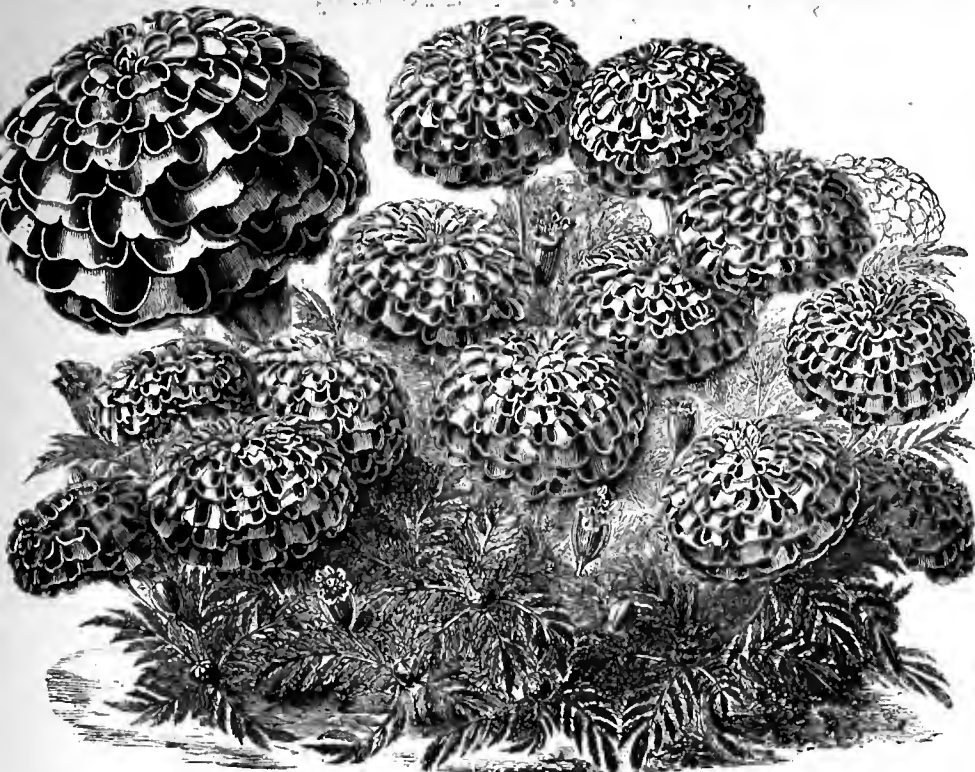

Price, in sealed packets, 1s. 6d. each.

No. 515 ERYNGIUM GIGANTEUM.—Stems, &c., ivory white; grand specimen.

No. 516. ERYNGIUM MARITIMUM.—Glorious blue foliage.

CARTER'S QUEEN'S PRIZE MIMULUS.

Culture.—Sow in spring in pots or pans on heat, prick off the seedlings when they have formed the second leaf, grow them on in heat to the end of May, when they may be planted out. Sow also in summer, and keep under glass during winter in store pots and pot off singly in February. They may also be sown under hand glass out of doors in April, prick off into pots, and plant out where required, or grow on in larger pots for the greenhouse or conservatory. Mix the seed with silver sand when sowing as it is very fine.

FLOWERS REDUCED
TO ONE-THIRD THE
NATURAL SIZE.

"CARTERS' JUBILEE QUEEN'S PRIZE MIMULUS.—An exceptionally fine type of these showy flowers, the individual blooms of immense size and superb form; the throat profusely spotted with crimson on a yellow ground; the lobes brilliant crimson, with golden-yellow margin."—*Gardeners' Magazine*.

GENERAL REMARKS.—*Mimulus* (*Nat. Ord. Scrophulariaceae*).—This has been long known as the *Monkey Flower* from the open gape and prominence of the lower lobes of the perianth. We are indebted to the North and South American continents for the addition of this handsome flower to our borders. It is usually treated as half-hardy, but in favourable situations it will do very well out of doors. To those who know only the original kind, the present magnificent specimens will come as a delightful surprise, the blossoms being of grand size and richly coloured, the ground colour being of various kinds of yellow, orange, cream, and almost white, beautifully blotched and spotted with deep maroon, crimson, and cerise. As a pot plant it is most enlivening in the conservatory, and imparts a vivid brightness to the general effect, and is exceeded in beauty by no other so easily grown flower. Many a grower of expensive Orchids might envy the brilliant appearance of the grandly simple Queen's Prize Mimulus.

- No. 824. **MIMULUS, QUEEN'S PRIZE.** Superb mixture.
Price, in sealed packets, 1s. and 2s. 6d. per packet.
- No. 826. **MIMULUS, CARTERS' JUBILEE.** Crimson, gold edged.
Price, in sealed packets, 1s. and 2s. 6d. per packet.
- No. 827. **MIMULUS, PRINCESS BEATRICE.** Cream, rose spot.
Price, in sealed packets, 1s. and 2s. 6d. per packet.
- No. 825. **MIMULUS, "GLORIOSA."** A beautiful novelty; jewelled tongue; very handsome.
Price, in sealed packets, 1s. and 2s. 6d. per packet.

"Garden," December 28th, 1895.

Mimulus, Queen's Prize.—"Nothing in the Mimulus line that I am acquainted with approaches this excellent strain, for the plants are remarkably dwarf and extremely free-flowering; in fact the seedlings commence blooming almost as soon as they are through the soil, and keep on flowering. The flowers are very beautiful, being varied in colour and distinctly spotted, reminding one more of spotted Gloxinias than anything else. For a damp spot I know nothing to compare with them. All who saw them here last summer were astonished and delighted."—J. R.

"Messrs. J. Carter & Co. exhibited a fine lot of Mimulus, especially one variety called Carters' Jubilee Queen's Prize. The plants were about five to six inches in height; the colour of the lobes was crimson-brown with gold edgings, with same colour in the throat, but lighter."—*Report of Royal Horticultural Society's Meeting in "Gardeners' Chronicle."*

French
Marigold,

Legion
of
Honour.

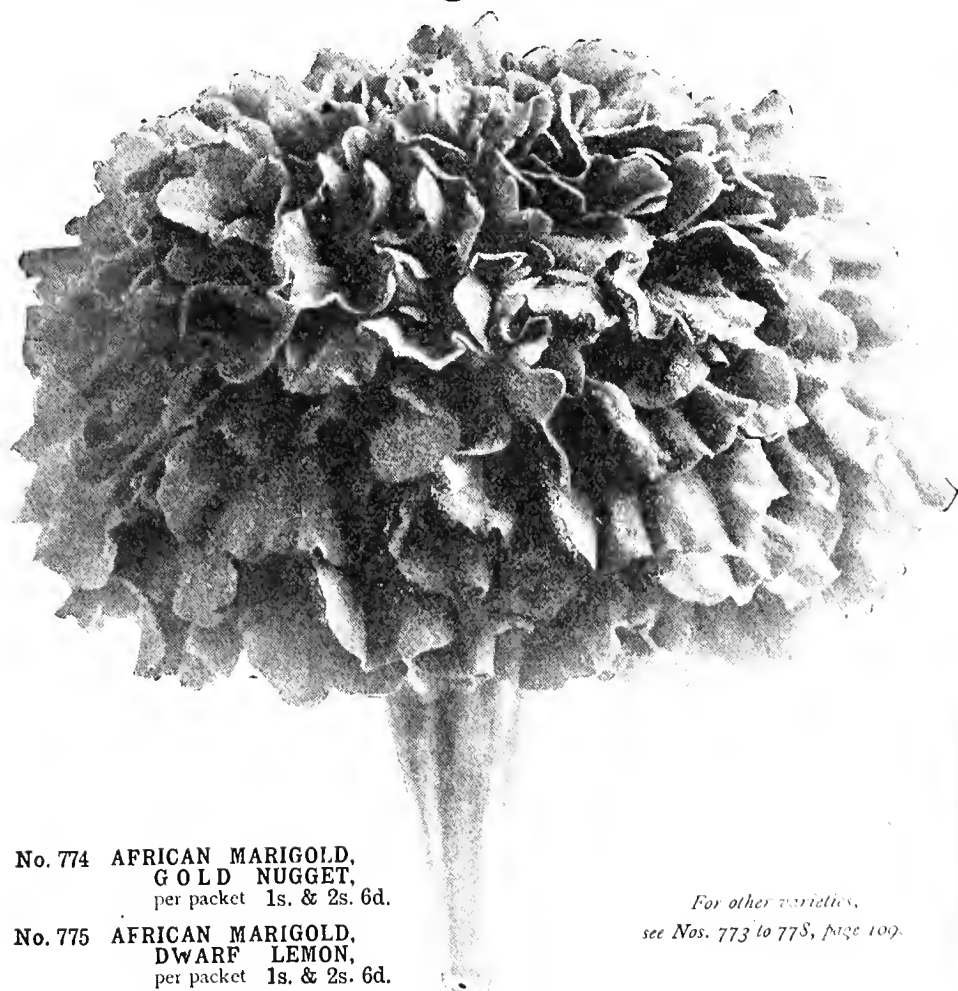

Photographed from Nature and Copyrighted by J. C. & Co.

This is a flower of rare beauty; colour rich gold, with a stripe of crimson maroon on each petal. It is a continuous bloomer, and its effect in the mixed border, whether planted singly or in clumps, is magnetically attractive. Habit dwarf and bushy, and covered with blossom. Height, about 8 inches. Its intrinsic merit will ensure it a great future.

No. 783. Price, in sealed packets, 1s. and 2s. 6d. each.

African Marigold, choice var.

No. 774 **AFRICAN MARIGOLD,
GOLD NUGGET,**
per packet 1s. & 2s. 6d.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

**Myosotis, Forget-me-Not,
choice var.**

The delicate beauty of the Forget me Nots is proverbial, and for rockwork, pots in conservatory, and general Spring bedding they are of great value. The under-mentioned are varieties of the highest class:—

No.		Per packet—s. d.
834	MYOSOTIS DISSITIFLORA , best bedding var.	1 0
838	„ RUPICOLA , lovely pot variety	1 0
837	„ PALUSTRIS , true legendary flower	0 6
841	„ VICTORIA , shading off to rose	1/- 2 6
545	FORGET-ME-NOT , ordinary garden variety	0 6

**Nicotiana Affinis, White
Sweet Tobacco.**

HALF-HARDY PERENNIAL.

This deliciously-scented flower is still in universal requisition for mixed borders. It is also an excellent pot plant for indoors and conservatories.

Sow in well-drained pots in light soil in Spring, prick off either in pots or in the open ground. Sow also in the open border from April till May; the Seed being very fine should only be partially covered.

No. 874. Price, per packet, 1s. and 2s. 6d.

Carters' Choice Types of Mignonette.

Photographed from Nature and Copyrighted by J. C. & Co.

Carters' "Perfection" Mignonette growing for seed at one of our Flower Gardens, St. Osyth, Essex.

No. 812. Carters' "Golden Gem" Mignonette, in sealed packets, 1s. and 2s. 6d. each.

No. 819. Carters' White Mignonette; this novel-coloured variety has fine long spikes of blossom. In sealed packets, price 1s. and 2s. 6d.

**Mignonette,
Carters' Crimson
Victoria.**

Robust, fragrant, free-growing variety, with fine crimson-tinted blossoms; highly cultivated; glabrous foliage

No. 810. In sealed packets, 1s. and 1s. 6d.

**Mignonette,
Carters' New Perfection.**

Culture.—Sow in the open ground in spring to flower from July till August, and in September and October to flower in June and July.

This is a most elegant profuse blooming kind, deliciously scented; good green foliage and splendid spikes of blossom; it is a first-class variety of superior merit.

No. 818. Price, in sealed packets, 1s. and 2s. 6d.

**Mignonette,
Hybrid Spiral.**

This variety is now so well known as hardly to need description; it is of the highest class, with fine long spikes of blossom.

No. 814. Sealed packets, 1s. and 1s. 6d.

Carters' Dwarf Nasturtions as Bedding Plants.

Culture.—Sow in March and April in open ground. A light sandy or gravelly soil is the best to produce blossom.

Photographed from Nature and Copyrighted by J. C. & Co.

CARTERS' DWARF NASTURTION, "EMPRESS OF INDIA," GROWING FOR SEED AT ONE OF OUR FLOWER GARDENS, ST. OSYTH, ESSEX.

These descriptions are taken from the report of some trials made at the Gardens of the Royal Horticultural Society a few years since.

No.		Price per pkt. s. d.	Price per oz. s. d.
849	Tom Thumb Crimson is neat in growth, but rather free; the leafage green, the flowers full bright crimson, one shade lighter than Theodore. To this was awarded three marks × × × - 3 1 0	3	1 0
853	Tom Thumb Scarlet. The original and freest blooming of the Tom Thumb varieties; bright orange scarlet flowers well thrown up above the foliage; very effective - 3 1 0	3	1 0
864	Tom Thumb Spotted King. A free grower, covering more ground than some of the varieties; flowers orange yellow with small crimson or maroon spots. Three marks × × × - 6 1 6	6	1 6
847	Tom Thumb Beauty. The growth is free, the leaves dark green, the flowers brilliant yellow, crimson flame, full of light and life, very distinct and showy. Three marks × × × - 3 1 0	3	1 0
855	Tom Thumb Yellow appears to be the freest in growth of any, and although a little less neat than some, its abundance of flowers compensates. The colour is clear rich gold. It is one of the best certainly, and well deserved the award of three marks × × × - 3 1 0	3	1 0
863	Scarlet King is of neat growth, with very neat dark leafage—in fact, a model habit of growth, with flowers of good form, of the fullest tone of pure scarlet. Three marks × × × - 6 1 6	6	1 6
850	Crystal Palace Gem has been largely employed as a bedder for many years past, but has all the look of a "new" thing even now, owing to its singular effectiveness. The growth is neat, the flowers light yellow with large spots. Three marks × × × - 3 1 6	3	1 6
858	Empress of India is the most perfect of all in growth and flowering; a quite remarkable variety. It forms a smallish compact plant with very dark blue-green leafage of the neatest imaginable character. The flowers are of the deepest scarlet-crimson, very rich and full of fire. Three marks × × × 1 0 2 0	1 0	2 0
862	Ruby King is of similar growth to the last named, and the flowers are of a fuller ruby colour, somewhat curious in the contrast of flower and leaf, but effective and distinct. Three marks × × × - 6 1 6	6	1 6
860	King Theodore is of rather loose habit; leafy, flowering freely, the colour deep maroon-crimson - 6 1 6	6	1 6
861	Ladybird is of neat habit, flowering freely, the colour orange-yellow with red spots - 6 1 6	6	1 6
859	Golden King is of free growth, but orderly; the leafage green, the flowers deep gold yellow. A truly fine variety, and distinct in colour - 6 1 6	6	1 6

The whole of the above beautiful Nasturtions originated at our Essex Seed Farms.

Carters' "Emperor and Empress" Prize Petunia.

SUPERB COLOURS. DELICIOUS SCENT. GRAND SIZE. ABUNDANT BLOSSOM.

Culture.—Half-hardy herbaceous Perennial. Sow in March in hot bed, prick off the seedlings, and transplant into the borders in May and June, or into larger pots for blooming in Conservatory or Greenhouse. Sow thinly in light compost of loam and sand, and let the seed be lightly covered. In the spring the heat of about 60 deg. is desirable, but the usual temperature of summer and autumn will suffice without artificial heat. The plants are best kept during winter in a cold dry pit, temperature not below 38 degs. The best soil for growing plants is a light, rich, sandy loam.

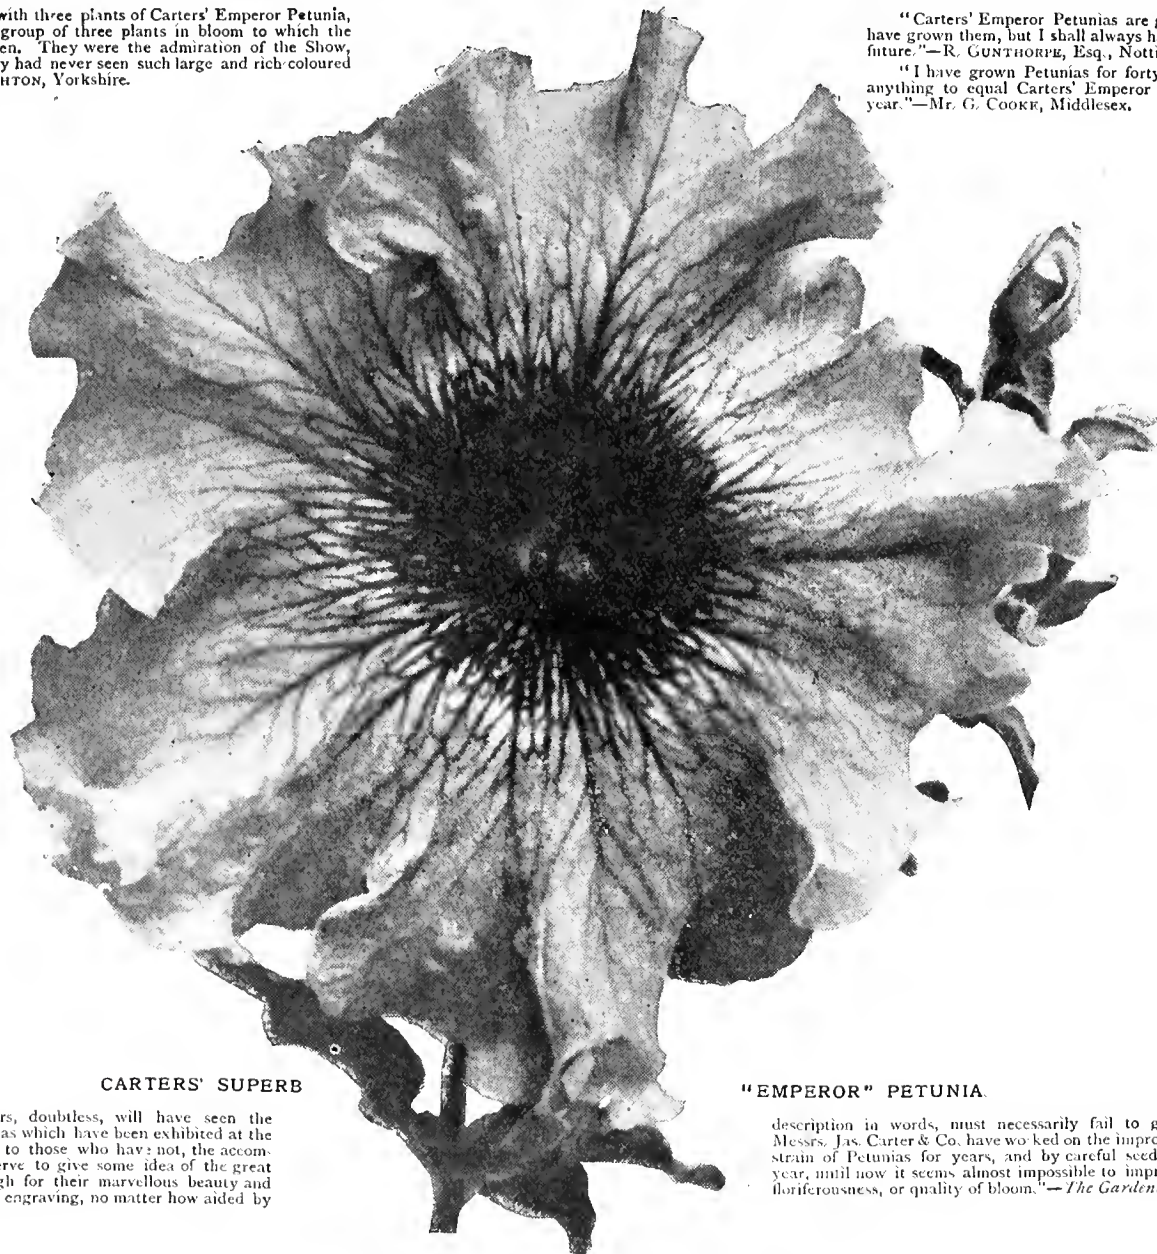

GENERAL REMARKS.—Perhaps there is no flower in which the beneficial results of careful cultivation and cross fertilisation are more evident than in the beautiful fragrant Petunia; the small flower of the *P. phanicea* has become transformed into the grand blossoms and brilliant colours of our **EMPRESS** and **EMPEROR** strain. We have tested every other so-called first-class variety, and, with few exceptions, have found none to equal them, and in no case any superior.

Please see special article on Petunias in "Gardeners' Chronicle."

"I took First Prize with three plants of Carters' Emperor Petunia, and had two more in my group of three plants in bloom to which the First Prize was also given. They were the admiration of the Show, everybody remarking they had never seen such large and rich coloured flowers."—Mr. R. CREIGHTON, Yorkshire.

"Carters' Emperor Petunias are grand. It is the first time I have grown them, but I shall always have them in any collection in future."—R. GUNTHORPE, Esq., Nottingham.

"I have grown Petunias for forty years, and have never seen anything to equal Carters' Emperor strain—they were grand last year."—Mr. G. COOKE, Middlesex.

CARTERS' SUPERB

"EMPEROR" PETUNIA

"Many of our readers, doubtless, will have seen the charming baskets of Petunias which have been exhibited at the summer flower shows, and to those who have not, the accompanying illustration will serve to give some idea of the great variety among them, though for their marvellous beauty and their gorgeous colours, the engraving, no matter how aided by

description in words, must necessarily fail to give an adequate notion. Messrs. Jas. Carter & Co. have worked on the improvement of the 'Emperor' strain of Petunias for years, and by careful seedling make it better every year, until now it seems almost impossible to improve on it either in habit, floriferousness, or quality of bloom."—*The Gardening World*.

Photographed from Nature and Copyrighted by J. C. & Co.

EVIDENCE OF EXCELLENCE.—"I have much pleasure in saying that I have some splendid flowers of your Emperor and Empress Petunias, some of them measuring 4½ to 5 inches across, and they are greatly admired by all who see them."—Mr. BYLES, The Gardens, The Chantry, Inglestone.

CARTERS' SELECT ILLUSTRATIONS OF CHOICE FLOWERS.

PHLOX DRUMMONDI GRANDIFLORA AND NANA COMPACTA.

Photographed from Nature and Copyrighted by J. C. & Co.

THE PHLOX N.O. POLEMONIACEÆ.—Most species of this beautiful flower are perennial, and their brilliant beauty and tall stately appearance in the herbaceous border is perhaps one of the most striking features of the late summer. We offer a superb mixture of these at page 112, No. 962, but the **Annual Species** is the one we wish now prominently to notice. Nothing can better prove its great beauty than the great number of times it has been figured in the Botanical periodicals, and it is indeed one of the most beautiful Annuals we have. It was first sent into this country from Texas in 1835 by Mr. Drummond, and has since achieved an immense popularity. Much attention has been paid to its development, and splendid new colours have been produced in the **Grandiflora** varieties, Nos. 942 to 945, page 111, whose brilliant charm cannot be too highly praised. The **Nana Compacta** varieties, Nos. 949 to 951, page 112, are equally fine in flower and of very dwarf habit. Height about six inches, and particularly suited to pot culture and miniature bedding.

Cultivation.—Sow in spring in pots, on slight bottom heat, and plant out when the seedlings are sufficiently strong. Sow also in favourable situations in April and May out of doors, and thin out to eight or ten inches apart.

No. 66. Phlox Drummondii, 12 select colours, small packet	s. d. 3 0	No. 945. Phlox Grandiflora, 6 superb colours, separate	s. d. 3 6

THE CARDINAL POPPY.

A grand flower, magnificently double; petals a glowing scarlet with a white base, riband-like, with delicate fringe; a more showy flower could not be desired. Annual.

No. 964. In sealed packets,
1s. and 1s. 6d.

Photographed from Nature and Copyrighted by J. C. & Co.

THE TULIP POPPY.

Equals in effect the *Vermilion Brilliant Tulip*; colour brilliant scarlet, a *mignon* variety.

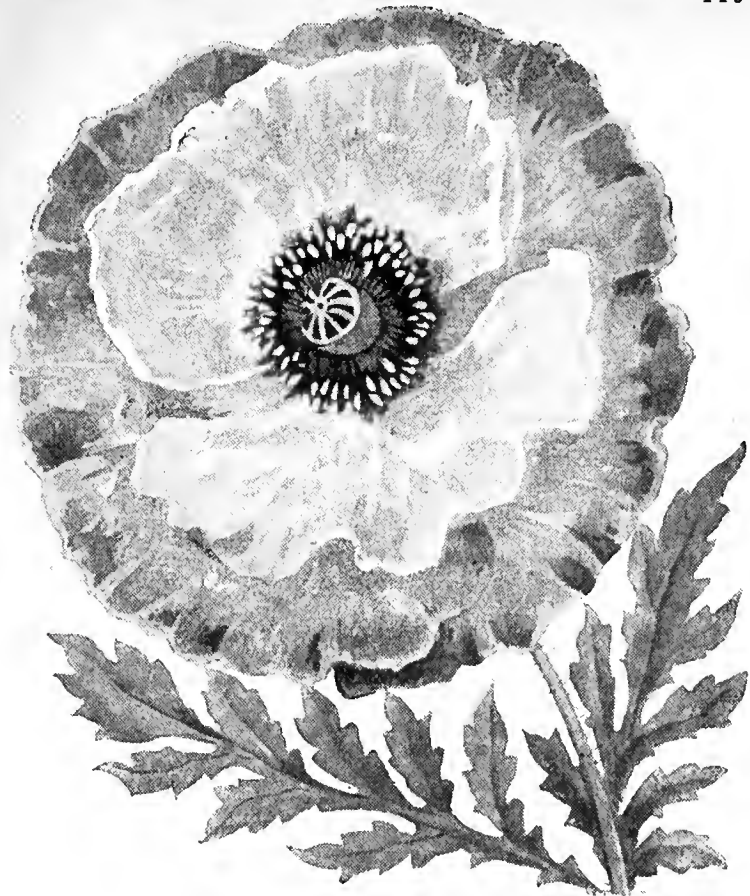

No. 984. In sealed packets,
1s. and 1s. 6d.

CARTERS' NEW PICOTEE POPPY.

This is a new and lovely race of Picotee Striped Poppies, and will prove a formidable rival, or rather an admirable adjunct, to the much-admired Shirley varieties. There is no doubt that we have here a valuable addition to our garden Flora. The colours are greatly varied, and the numerous shades of red, rose, maroon, &c., are luminous and fantastic; the blossoms vary from single to semi-double and double in endless variety, and their fairy-like beauty is faultless. We anticipate a grand future for the *Picotee Poppy* as it is a rare combination of elegance and beauty with brilliant colouring, and the lovers of *Papaveraceae* will do well to add this charming variety with all speed to their favourite culture.

No. 978. PICOTEE POPPY, choice mixture, in sealed packets, 1s. and 2s. 6d. each.

CARTERS' "SHIRLEY" POPPY (Silk or Ghost Poppy).

Photographed from Nature and Copyrighted by J. C. & Co.

This lovely garden Poppy has probably received its various names from its delicate texture and almost shadowy forms. The shades of colour are endless, and we again offer a strain of unusual beauty, as the stock has been rigidly selected by its original nominator, the Rev. W. WILKES, Secretary to the Royal Horticultural Society.

No. 983. CARTERS' "SHIRLEY" POPPY (Silk or Ghost Poppy),
in sealed packets, 1s. and 1s. 6d. each.

ICELAND (PERENNIAL) POPPIES.

Photographed from Nature and Copyrighted by J. C. & Co.

Price, in sealed packets, 1s. and 2s. 6d. each.

No. 971. ICELAND POPPY, golden.	No. 973. ICELAND POPPY, rose
No. 972. " orange.	No. 974. " " white.
No. 970. ICELAND POPPY, all colours mixed.	

No. 987. ANNUAL POPPIES, superb mixture of all the best sorts. In sealed packets, 1s. 6d. and 2s. 6d.

GIANT PÆONY-FLOWERED POPPY.

Photographed from Nature and Copyrighted by J. C. & Co.

GIANT PÆONY-FLOWERED POPPY.—This strain of superb Double Poppies has been selected with the greatest care, and none but the richest colours and best forms retained. They produce an imposing effect either singly or in groups.

No. 68. EIGHT SUPERB SELECTED COLOURS, separate ... 3s. 6d.

No. 980. GIANT PÆONY-POPPY, splendid mixture,
per packet, 1s. and 2s. 6d.

POPPY, "WHITE SWAN."

Photographed from Nature and Copyrighted by J. C. & Co.

The most beautiful White Double Poppy in existence.

No. 986. POPPY, "WHITE SWAN" ... packets, 1s. and 2s. 6d. each.

CALCEOLARIA.

See Coloured Illustration opposite.

See also "Gardeners' Chronicle," 11th September, 1897.

GROWING FOR SEED AT OUR NURSERIES.

Unsurpassed for size of bloom, brilliance and variety in colour, and handsome, dwarf, even habit, in fact the very perfection of scientific horticulture.

No. 269. CALCEOLARIA, CARTERS' VICTORIA COMPACT, Superb mixed. In sealed packets, 2s. 6d., 3s. 6d., and 5s. each.

No. 271. CALCEOLARIA, CARTERS' GOLDEN PRINCESS, Brilliant Yellow. In sealed packets, 2s. 6d., 3s. 6d., and 5s. each.

"I took First Prize with Herbaceous Calceolarias at our Show this year. Three weeks before the Show the plants were a perfect picture; they were three feet across and there were about 600 blooms on each plant."—Mr. BRAZIER, The Gardens, Phoenix House.

"The Calceolaria Seed you sent me last year produced some wonderful blooms, which were much admired."—G. N. JACOB, Esq., Springville, Dublin.

CINERARIA.

See Coloured Illustration opposite.

THE FINEST STRAIN EVER SUBMITTED TO PUBLIC NOTICE.

The Blossoms in Coloured Illustration are types of the class of flower that may be expected from our splendid strain, but it is impossible in a single illustration to give an adequate idea of their form and beauty. Our house has long been famed for its Cinerarias, and extra care has been taken (if possible) in the selection and fertilisation of the plants this Season. The colours consist of the most vivid self; beautiful bordered varieties, as in illustration, and edgings of all shades. Unequalled for profusion of bloom, size of flower, and general excellence.

No. 384. CARTERS' BRILLIANT PRIZE CINERARIA—Superb Mixture. In sealed packets, 2s. 6d., 3s. 6d., and 5s. each.

"I send you three blooms from a Cineraria raised from your Seeds. They measure $3\frac{1}{2}$ inches across, and the plant they were cut from has from 50 to 60 such blooms. We have other very fine Cinerarias of different colours, all raised from your seed."—Mrs. BUTLIN, Spalding.

"I had splendid plants from the Cineraria seed last year, and gorgeous colours."—Mrs. SHARPS, Kennetholme.

"I am glad to tell you my Cinerarias are especially good this year, and have been much admired."—Miss HARRIS, Exmouth

GLOXINIA.

See Coloured Illustration opposite.

WINNER OF THE CHAMPION PRIZES THROUGHOUT THE WORLD.

Carters' "Invincible" Strain has proved its superiority over all others, wherever exhibited, throughout the British Empire. It contains all the best self-colours, crimson, sapphire, purple, ruby, rose, cerise, blush, violet, white, &c., also the finest edged, tipped, ringed, and shaded varieties, together with the most beautiful spotted or marbled kinds, and it cannot be surpassed. We may remark that, although the Gloxinia especially delights in heat and moisture, it will preserve its bloom during the summer months when removed into the greenhouse, conservatory, or indoors generally.

No. 579. CARTERS' "INVINCIBLE" PRIZE GLOXINIA. In sealed packets, price 2s. 6d. and 5s. per packet.

PRIMULA.

See Coloured Illustration opposite.

GRAND FLOWERS. BRILLIANT COLOURS. PROFUSE BLOSSOM.

ALL CAREFULLY GROWN AT OUR OWN NURSERIES, AND OF THE HIGHEST POSSIBLE QUALITY.

Awarded the Highest Diploma and Prize Medal, Chicago Exhibition, 1893.

CARTERS' SELECTED NEW FRINGED SELECTED VARIETIES OF "SINGLE" PRIMULA, figured in Illustration opposite.

Price, in sealed packets, 2s. 6d., 3s. 6d., and 5s. each.

- No. 1013. CARTERS' SCARLET. The most brilliant Primula.
 1003. HOLBORN BLUE. The best blue Primula.
 1004. HOLBORN CARMINE. Rich colour, best of the carmines.
 1005. HOLBORN ELAINE. Delicate ivory white; splendid truss.
 1007. HOLBORN MAGENTA. Grand flower, splendid colour.

- No. 1008. PRIMULA, CARTERS' "PRINCESS MAY." Of rare and chaste beauty.
 1009. PRIMULA, HOLBORN QUEEN. Superb flower of the purest white.
 1011. PRIMULA, HOLBORN RUBY. Fine blossom, brilliant crimson rose.
 1014. PRIMULA, HOLBORN VENUS. Variegated blossom, a great acquisition.
 1015. PRIMULA, HOLBORN VERMILION. A glorious colour.

No. 1327. COMPLETE COLLECTION OF ABOVE, 10 CHOICE VARIETIES FOR 20s.

Nos. 1001 and 1002. SINGLE PRIMULA, HOLBORN PRIZE, MIXED. In sealed packets, 2s. 6d., 3s. 6d., and 5s. each.

SELECTED VARIETIES OF DOUBLE PRIMULA.

Price, in sealed packets, 2s. 6d., 3s. 6d., and 5s. each.

- No. 1016. PRIMULA, DOUBLE, AURORA. Apricot rose.
 1017. PRIMULA, DOUBLE, CARMINE EMPRESS. Rich colour.
 1018. PRIMULA, DOUBLE, LILAC QUEEN. Unique beauty.

- No. 1019. PRIMULA, DOUBLE, PRINCE OF WALES. Rose coloured.
 1020. PRIMULA, DOUBLE, PRINCESS OF WALES. Beautifully striped
 1021. PRIMULA, DOUBLE, SNOWFLAKE. Early flowering, white.

No. 1328. COMPLETE COLLECTION OF ABOVE, 6 CHOICE VARIETIES FOR 12s.

No. 1022. DOUBLE PRIMULA, CHOICE VARIETIES, MIXED. In sealed packets, 2s. 6d., 3s. 6d., and 5s. each.

For further List of choice Primulas, see page 112.

CARTERS "HOLBORN" PRIZE PRIMULAS

CARTERS "VICTORIA" PRIZE CALCEOLARIAS

CARTERS BRILLIANT PRIZE CHRYSANTHEMUMS

CARTERS INVINCIBLE PRIZE GLOXINIAS

Flowers produced in Two Months.

This is a pretty little plant, very interesting during the young stages of its growth; as it gets older the blossoms improve in quality from year to year. They are single, double, and semi-double, in about equal proportions, of the usual shades of rose colour.

Height, 15 to 18 inches.

A most excellent pot plant.

CULTURE.

Sow in a pot or pan from January to March, prick out when large enough into good, rich, loamy soil; one plant into a large sixty-sized pot. The seedlings grow so rapidly that flowers may be expected in from six to eight weeks.

In the early spring I got a packet of your Annual Rose. It has turned out splendid, I have 14 strong healthy plants just coming into flower.

Mrs. M. L., Tredennick.

No. 1055.—Carter's Annual Rose, 1/6 and 2/6 per packet.

From Provence, the Land of Roses.

No. 1166—Dwarf Sweet Pea—"White Cupid," 1/- and 1/6 per packet.

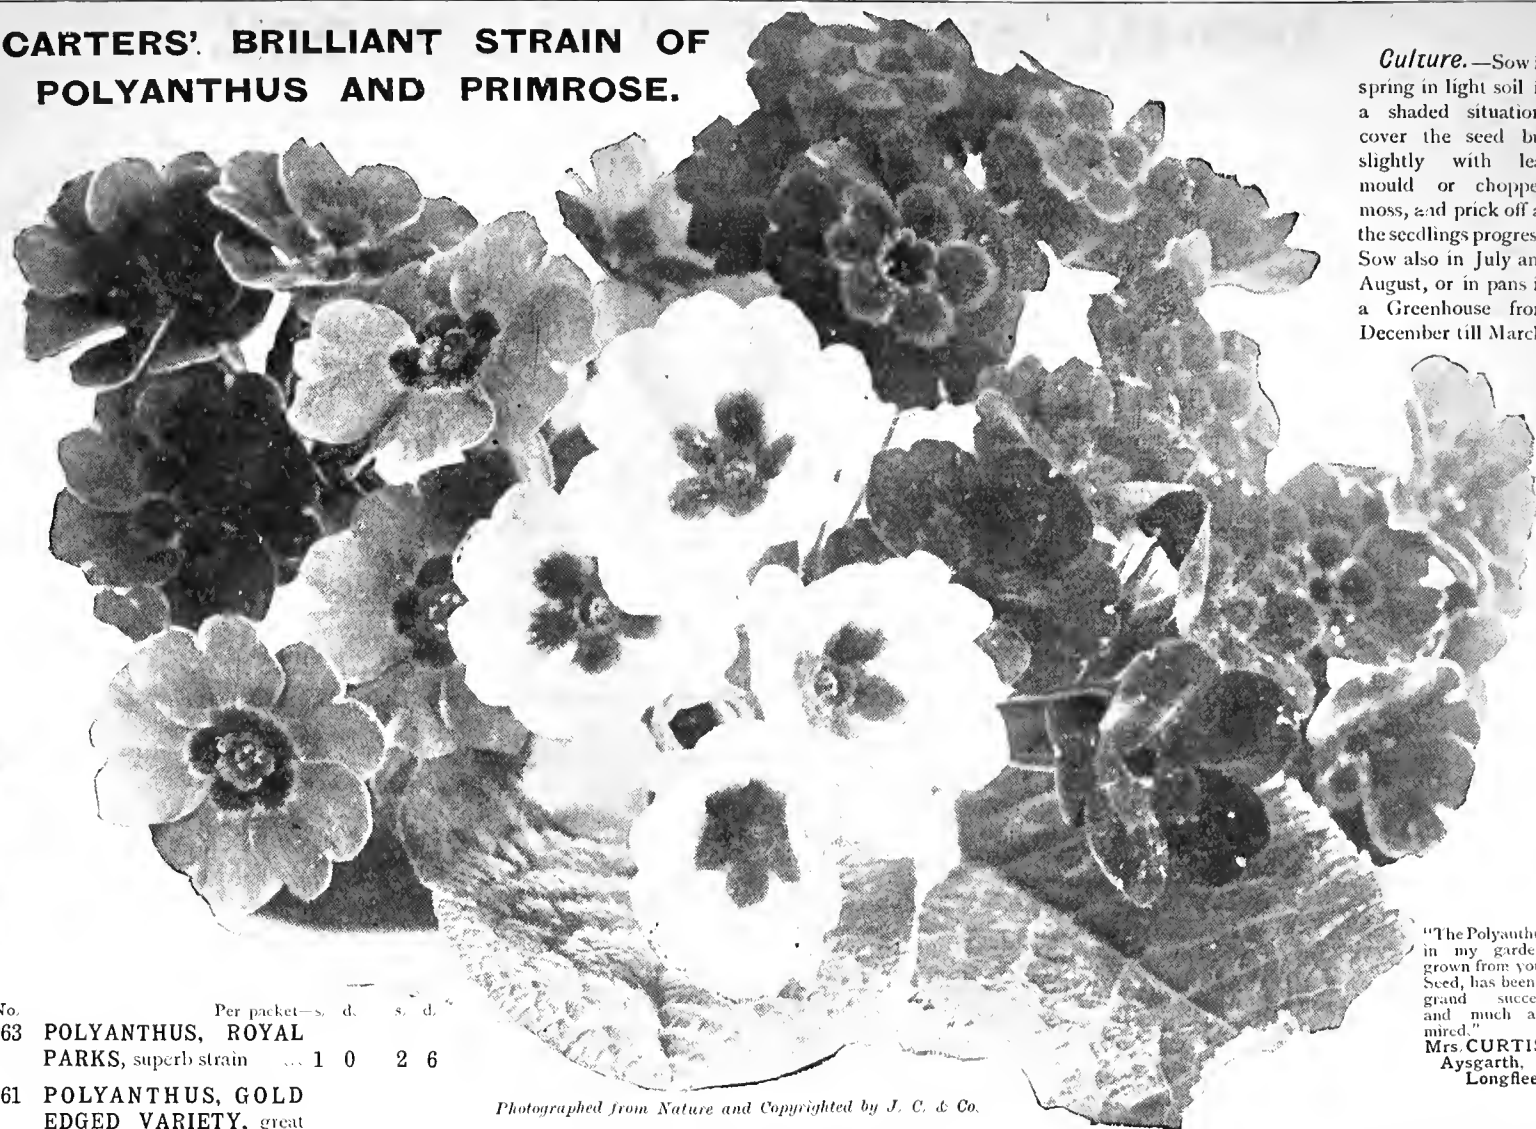

No. 1340—Dwarf Sweet Pea—"Pink Cupid," 1/- and 1/6 per packet.

Height about 3 inches. Diameter 15 inches.

Our Photograph shows the dwarf habit of the plant as being grown for seed at our Seed Farms, St. Osyth, Essex.

CARTERS' SELECT ILLUSTRATIONS OF CHOICE FLOWERS.

CARTERS' BRILLIANT STRAIN OF POLYANTHUS AND PRIMROSE.

Culture.—Sow in spring in light soil in a shaded situation, cover the seed but slightly with leaf mould or chopped moss, and prick off as the seedlings progress. Sow also in July and August, or in pans in a Greenhouse from December till March.

"The Polyanthus in my garden, grown from your Seed, has been a grand success and much admired."
Mrs. CURTIS,
Aysgarth,
Longfleet.

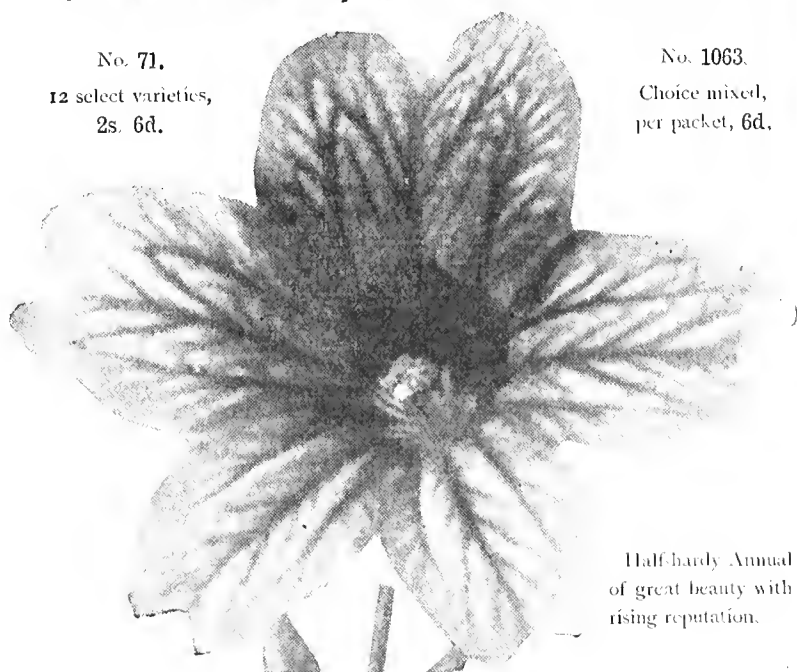

No.		Per packet—s. d.	s. d.

Photographed from Nature and Copyrighted by J. C. & Co.

POLYANTHUS (*Primula elatior Polyantha*). The superb strain we here offer of these lovely spring flowers cannot be obtained elsewhere. Large quantities have been grown in all the **Royal Parks, Hampton Court, &c.**, and the rapturous admiration their beauty has evoked from the visitors is a sufficient testimonial to their great merit. No. 960 **Polyanthus, Royal Parks**, consists mainly of golden and white varieties of all shades, and produce magnificent heads of blossom. Nos. 961 and 962 are brilliantly coloured in various shades of crimson, mauve, violet, and rose, and No. 995 the grandest of all for bedding. All these kinds should be cultivated by the lovers of spring gardening.

SALPIGLOSSIS, LARGE FLOWERED.

No. 71.
12 select varieties,
2s. 6d.

Half-hardy Annual
of great beauty with
rising reputation.

Photographed from Nature and Copyrighted by J. C. & Co.

No. 1063.
Choice mixed,
per packet, 6d.

SUNFLOWER, "STELLA," (NEW).

Photographed from Nature and Copyrighted by J. C. & Co.

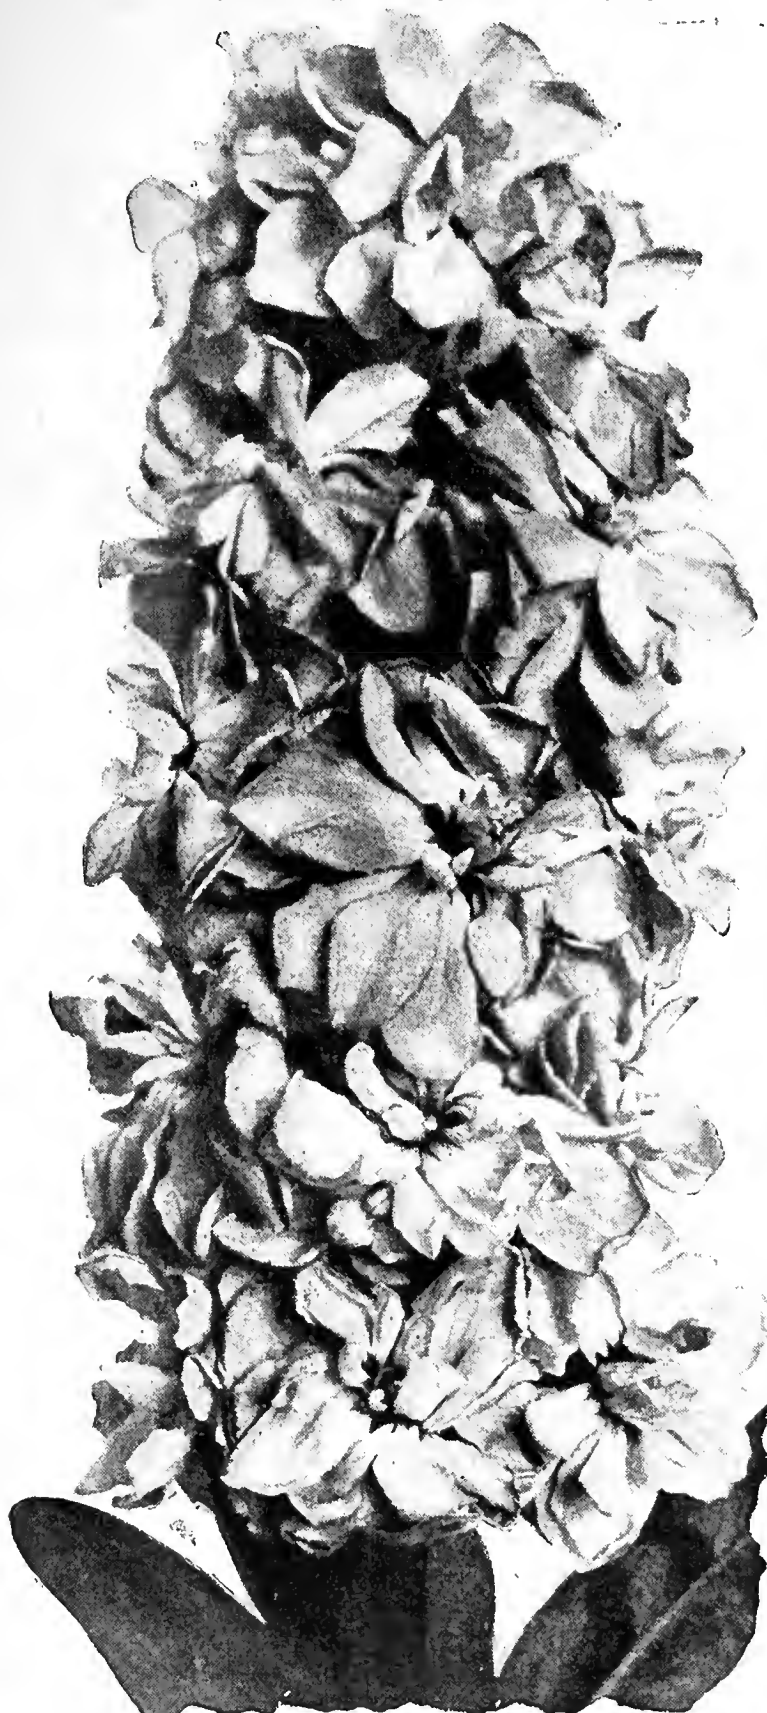

A great improvement upon the popular *Miniature* Sunflower. The flowers are more numerous, larger, and regularly formed; colour golden yellow, with black disc. The stalks are long and firm which makes it excellent for cutting for in-door decoration.

No. 1152. **SUNFLOWER "STELLA,"** per packet, 1s.

CARTERS' SUPERB ASSORTMENTS OF ANNUAL AND PERENNIAL STOCK.

Culture.—Sow early in March in pans near the glass, or in a frame filled with vegetable loam with one-sixth river sand, to within four inches of the lights, so that the young plants may be near the glass and not drawn up weakly; level the soil nicely, and slightly sprinkle with water, then scatter the seeds evenly about four to the square inch; another slight sprinkling, and then cover the seeds with about $\frac{1}{2}$ -inch of finely-sifted compost. Keep the lights closed and shaded from the sun for a few days, gradually giving the plants air until the end of April, when they can be transplanted into pots or groups in the open border; a mixture of good old lime rubbish is beneficial to the soil in which Stocks are planted out. Intermediate, East Lothian, Brompton, Imperial, and Queen Stock may be treated precisely as given above, with the exception of the time of sowing, which should be from July to September. Stocks may be transplanted several times in the earlier stages of their growth if dwarf, compact habit is required.

CARTERS' LARGE FLOWERED STOCK.

"Carters' Stocks have been faultless. I never before grew any so fine."
Mrs. PARRY, Hadham.

"Carters' Stocks are the best I ever had."—J. GREEN, Esq.

"I am pleased to tell you I have secured first prize for the best Stocks, the produce of your seed."—Mr. F. CASWELL, Wolverhampton.

"I had a few Ten-week Stock Plants given me last year from Carters' seed, and I took first prize at our show with them. They were very beautiful, dwarf, the flowers compact, and very fine."—Mrs. S. ASHLEY, Doynton.

NEW LARGE-FLOWERED SWEET PEAS.

99

GENERAL REMARKS.—*Lathyrus Odoratus*, or Sweet Pea, first reached the British Isles from its sunny home in the Mediterranean about two centuries since, but the modest bluish purple Vetch-like flower scarcely shadowed forth a promise of the foremost position it now occupies in the floral world. Were it now to be suddenly removed from our gardens many an "aching void" would be experienced; but we are glad to believe that it will continue to be a favourite flower, and delight generations yet unborn. It is remarkable for its delicious fragrance, elegant and graceful form, and general adaptability for decorative purposes—vases, tables, posies, &c. ;

it is, in fact, an indispensable flower. It is worthy of remark that the number of new varieties of all shades has reached portentous dimensions, so that it may be convenient to our customers to be informed which we consider to be the most distinct and desirable colours.

Culture.—There is diversity of opinion on this point, but the following advice can be relied on :—If required for early cutting, sow in pots, 4 or 5 in a pot, in the early autumn; protect during the winter in pits or frames, and transplant to flowering position, 1 foot apart, in early spring, February, &c. For ordinary use, sow in frames in March, and transplant to the open when 4 inches in height, or sow in the open ground where intended to bloom from March to May. A loamy soil is preferable to any other; sow *thinly*, and water freely during dry weather. Occasional application of liquid manure will deepen colour.

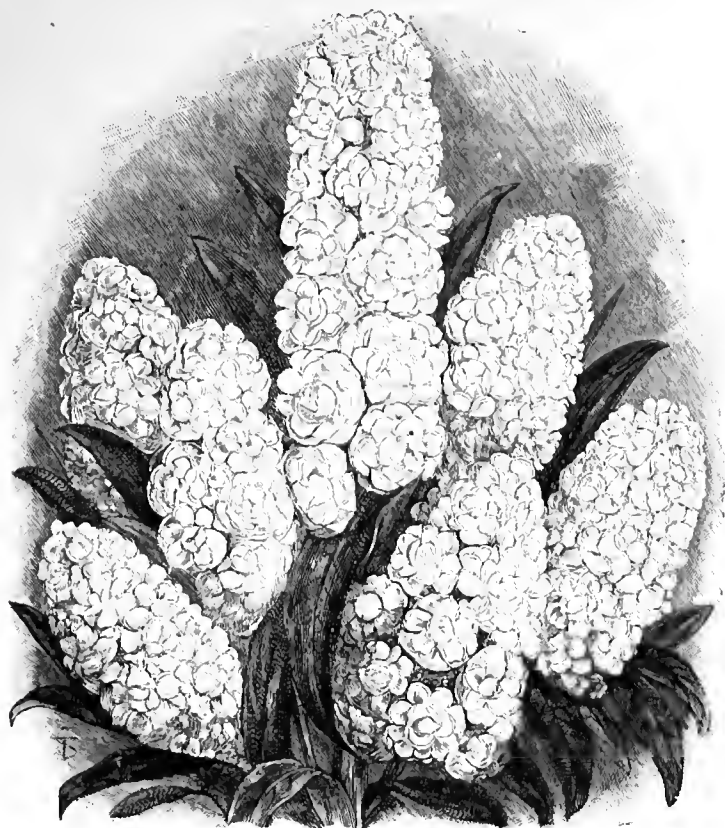

For general convenience we append below a list of **Eight proved varieties**, in our opinion the best selection for anyone desirous of growing some distinct sorts separately. A complete list of all kinds will be found in Nos. 1159 to 1192, page 114.

- Photographed from Nature and Copyrighted by J. C. & Co.*
- | No. | | In sealed packets—s. d. |
|------|---|-------------------------|
| 1163 | CAPTAIN OF THE BLUES. —Generally admitted to be the finest of the blue varieties; standard bright purple-blue | 1 0 |
| 1167 | DOROTHY TENNANT. —Unique, brilliant mauve, one of the most distinct; fine bold flower | 1 0 |
| 1172 | IGNEA. —Brilliantly attractive, with its crimson-scarlet standards and wings flushed with carmine; colour vivid and intense | 1 0 |
| 1177 | MONARCH. —The best of the dark bronzy-purple kinds; grand flower; most effective | 1 0 |
| 1180 | ORANGE PRINCE. —Distinct and beautiful; standards orange-salmon, rose wings; much admired | 1 0 |

- | No. | | In sealed packets—s. d. |
|------|---|-------------------------|
| 1182 | PRIMROSE. —The nearest approach yet made to the desired yellow sweet delicate primrose colour, darker in hue in its earlier stages; fine large blossom | 1 0 |
| 1183 | PRINCESS BEATRICE (the pink Sweet Pea of the Flower Market).—Carmine-rose, slightly splashed with tints of deeper pink colour; a delicate and distinct variety. | 1 0 |
| 1199 | WHITE EAGLE. —A bold, handsome, full white blossom. This has proved itself to be the best in size and abundance of blossom, and purity of colour | 1 0 |

No. 1329.—**THE ABOVE EIGHT SPLENDID AND DISTINCT VARIETIES (CARTERS' SELECTED)** for 5s.
No. 1158.—**CARTERS' SUPERB MIXTURE OF LARGE-FLOWERED SWEET PEAS, 50 VARIETIES, 1s. and 2s. 6d. per packet.**

White Winter Stock, Carters' "Avalanche."

THE FINEST WHITE STOCK IN CULTIVATION.

A cross between the ordinary Intermediate and East Lothian White.

No. 1136. In sealed packets, price 1s. and 2s. 6d.

Streptocarpus, New Hybrids.

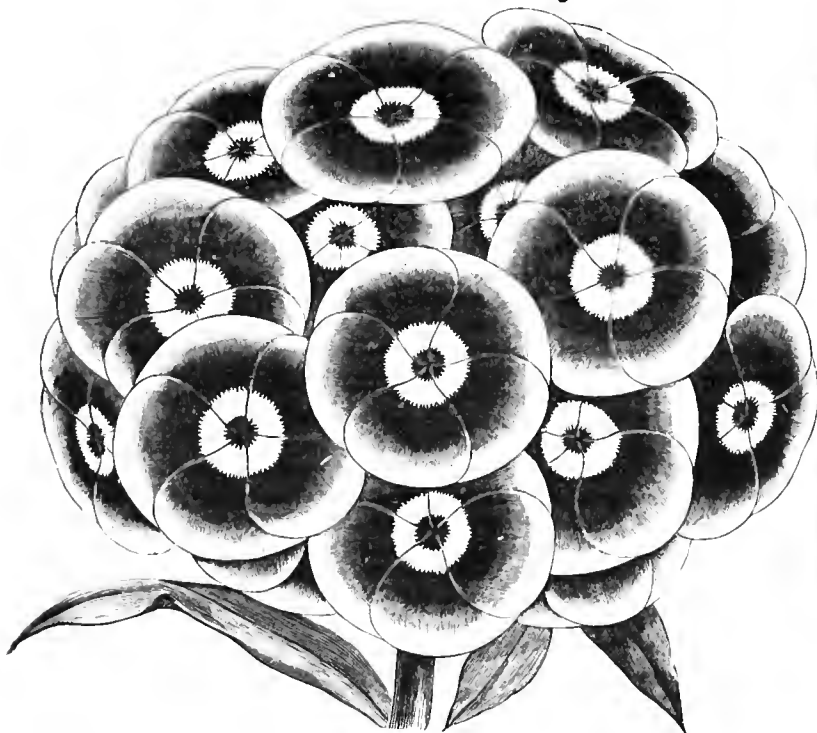

Photographed from Nature and Copyrighted by J. C. & Co.

Culture.—Sow from January to March in well-drained pots, let the soil be moderately damp, and press it gently to make it firm and smooth. Sow the seed thinly and evenly, and it need not be covered, or if covered, only very slightly with a little fine silver sand. See that the soil is not allowed to become dry, and be careful to shade from the sun, as when germinating a few minutes' sun may destroy the young seedlings. Prick off when ready.

No. 1145. In sealed packets, 1s. 6d. and 2s. 6d. per packet.

Sweet William, Carters' "Holborn Glory."

The illustration is no exaggeration, as we have measured many individual flowers in the crop on our Seed Farms, each of which more than covered a penny-piece. It is unapproached by any in cultivation for Show, Exhibition, or Staging purposes, and no collection of Biennials, Perennials, Border or Herbaceous plants should be without it.

No. 1201. In sealed packets, price 1s. 6d. and 2s. 6d. per packet.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

Verbena, new Mammoth.

HALF-HARDY PERENNIAL

Culture.—Sow in spring in pots or pans on heat, prick off the seedlings when they have formed the second leaf, grow them on in heat till end of May, when they may be planted out. Sow also in summer, and keep under glass during winter in store pots, and pot off singly in February.

No. 1246. In sealed packets, 1s. and 2s. 6d. per packet.

CARTERS' SELECT ILLUSTRATIONS OF CHOICE FLOWERS.

Zinnia indica, Choice Double.

Photographed from Nature and Copyrighted by J. C. & Co.

ZINNIA INDICA. Has been erroneously supposed a double variety of *Z. elegans* produced by culture, but we have never known a cultivator who has attained that result. We had the first seed from India many years ago, but reserved its distribution for some time in order to verify its character. The double Zinnia is a flower of marvellous beauty and utility, equal in form to the finest Aster, and superior to it in variety of colour. A bed of double Zinnias is worth remembering. Also grown in Greenhouse or Conservatory in pots, or in small groups or single specimens in mixed border; as a border flower it is in the front rank.

No. 76.	Double Zinnia, 6 distinct varieties, separate	...	s. d.
„ 77.	Zinnia, Pumila, fl. pl., 6 varieties, separate	...	2 6
„ 1301.	Double Zinnia, Choice Mixture, per packet	6d. and 1 0	

Zinnia elegans, Choice Single.

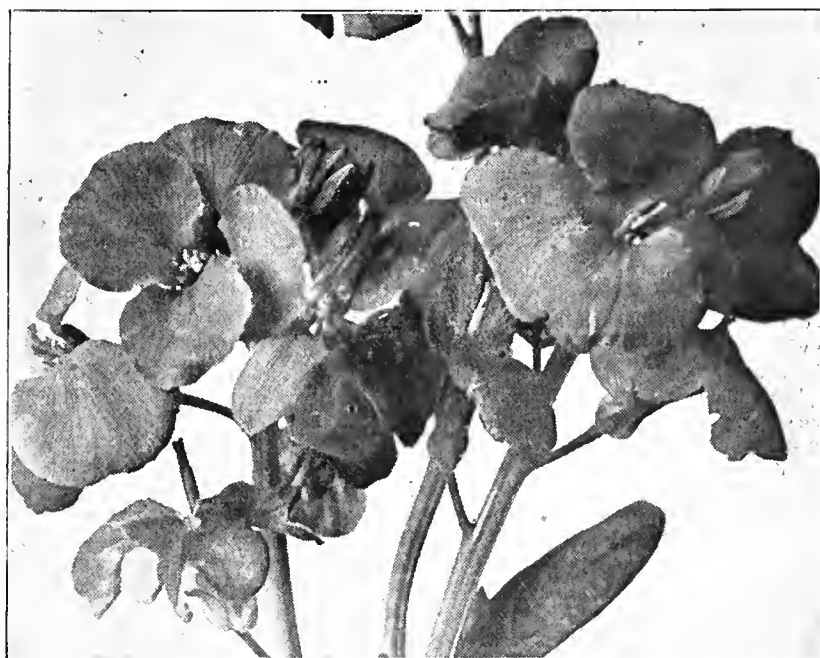

Photographed from Nature and Copyrighted by J. C. & Co.

ZINNIA ELEGANS. Fine-coloured varieties, which have been obtained by careful and skilful cultivation from the old Mexican variety. As a single composite the Zinnia stands unique for elegance of form and richness and variety of colour combined; for bedding purposes they are strikingly effective, and in mixed borders they present a great attraction; they may be also employed with effect in the decoration of Vases, etc., or in general ornamentation. The Zinnia also matches well with the Pyrethrum, Paris Daisy, Aster, etc.

No. 75.	Zinnia, elegans, Single, 8 varieties, separate	...	s. d.
„ 1296.	Zinnia, Single, Choice Mixture	per packet, 6d. and 1 0	2 0

Wallflower, Carters' Annual.

Photographed from Nature and Copyrighted by J. C. & Co.

This Annual Wallflower may be considered as a perpetual bloomer, as by occasional sowings, flowers may be had throughout the year.

CULTURE.—Sow in cold frame in February and March, transplant to beds as soon as ready in April or May into ordinary garden soil mixed with old lime rubbish, when it will continue in bloom from June to October.

No. 1278. Wallflower, Annual, in sealed packets, 1s. and 2s. 6d. each.

CARTERS', 237, 238, & 97, HIGH HOLBORN, LONDON.—1898.

Wallflower, Choice Double German.

The Wallflower (*Cheiranthus Cheiri*), as a shrubby perennial, has been long established in our gardens as a Spring favourite; its specific name, *Cheiri*, or the hand, was given to it from a custom of children and others carrying in their hand small bunches of its flowers as nosegays, or may be occasionally as votive offerings.

The garden variety is an introduction of about three centuries since from Mediterranean shores, but there is one species indigenous to Britain, which has from time immemorial been a source of rural delight in its natural embellishment of old walls, ruins, &c.

ALL OTHER KINDS OF LILIES CAN BE SUPPLIED.

Extended List on application.

New Gladiolus "Snow-White."

A new Autumn-flowering White Gladiolus of exceptional merit from America. The spike are large and full from top to bottom, flowers well formed, recurved, and beautifully crisped, the upper part pure white, lower petals with a faint line of purple. If the spikes are cut when opening, and allowed to develop in water in the dark, it is positively snow-white.

Fine Bulbs, per dozen 10s. 6d., each 1s.

Carters' Butterfly Gladiolus.

A really grand acquisition to this charming Autumn-flowering bulbous plant. Much larger in spike and individual flowers, and more vigorous and free-blooming, than any other Gladiolus. We introduce this with every confidence as a novelty of undoubted merit. A choice mixture.

Fine Bulbs, per 100, 35s.; per dozen, 5s.

For general assortment of Gladioli, see page 121.

A useful Article on the cultivation of the Gladioli will be found in Carters' Practical Gardener, post free 1s. 3d. (or 1s. enclosed with other Goods).

CARTERS' BULBS AGAIN EXCLUSIVELY USED IN ALL THE LONDON PARKS.

Carters' "Empress" Poppy Anemones.

The flowers are of immense size (measuring four inches in diameter) and great substance, invaluable for cutting and decorative purposes generally; and the very moderate price at which they are offered admits of their being extensively used for the decoration of the shrubbery border, where a constant and brilliant display can be produced. The following opinions will be read with interest:—

"'EMPRESS' ANEMONES.—We have received from Messrs. James Carter & Co. a bouquet of what they term their 'Giant Empress' Anemone. They are truly gigantic forms and brilliant varieties of Anemone coronaria, and are strikingly beautiful. Several of the flowers are four inches in diameter, borne on stalks nearly a foot long, and almost as thick as our penholder. The colours are varied and rich, ranging from white through the different shades of lavender to deep purple, and from pale red to glowing scarlet and velvety crimson. They are the finest Single Anemones we have ever seen, and such flowers as these before us would be an acquisition even to the garden of an Empress."—*Journal of Horticulture*.

J. ALBRIGHTON, Esq., Tamworth, writes:—"It gives me great pleasure to speak of the value of Carters' 'Cockade' Ranunculus and Poppy Anemone—they are really splendid."

Price per 1,000, 60s.; per 100, 6s. 6d.; per doz., 1s.

Double Sweet-Scented "Pearl" Tuberoses.

We have secured our stock of Roots from some large cultivators of the above exquisitely fragrant and favourite Flowering Plant for bouquets, button-holes, etc. The ROOTS are again UNUSUALLY FINE; indeed, the Sweet-scented Double Tuberose has seldom been offered on similarly favourable terms. The Tuberose will be found invaluable for bouquets, ladies' dresses, or as a coat flower. The perfume is exquisite, and the general appearance of the pure white double flower is most charming.

Extra large Flowering Bulbs, per 100, 21s.; per doz., 3s.

Carters' "Cockade" Ranunculus.

A splendid variety of colours and shades; immense double flowers, fitting in all respects to be cultivated by the side of the "Empress" Anemone, and equally superior with that variety to any other class of Ranunculus. The flowers are as double as the most perfect Rose, of immense size, and combine every possible shade of colour peculiar to this interesting and easily-cultivated flower. It is impossible to over-estimate their value to all lovers of the Ranunculus family.

E. MASON, Esq., Birmingham, writes:—"Carters' 'Cockade' Ranunculus have been simply splendid, and the admiration of all my friends."

Price of Roots per 1,000, 45s.; per 100, 5s. 6d.; per doz., 1s.

BE SUPPLIED AT ADVERTISED PRICES.

SEED FOODS—WHOLESOME AND PURE.

Sold by the principal Grocers, Stores, and Corn Merchants, or a Sample, with name and address of nearest Dealer, will be sent on application.

An experience extending over fifty years in the selection, improvement, and distribution of all that is choice in the Seeds of Vegetable products, has induced us to turn our attention, after the closest analytical investigation, to the remarkable feeding values that are attached to many of the Seeds we handle, when treated by special processes adapting them for human consumption. We furnish brief particulars of our **Seed Foods**, which are guaranteed to be the outcome of only choice and perfect harvestings, assisted to a high state of perfection by our own Patent Seed-cleaning Machinery. These Foods are highly nutritious and easy of digestion, and in their respective classes they will be found invigorating to the growing child, sustaining to the hard worker, nourishing to the invalid, and an agreeable addition generally to all meals.

CARTERS' BREAKFAST OATS

Are the finest British produce. Before being rolled they are thoroughly cleaned, and in the special patent process of manufacture each flake is twice partially cooked; this fixes the sweet flavour peculiar to Home-grown Oats, and renders them easy of digestion, constituting a most desirable food for growing children and invalids.

British Oats are more nutritious, and do not contain the large percentage of woody fibre which is found in Foreign Oats.

We have submitted our Breakfast Oats to an eminent County Analyst, who reports as follows:—

"I have examined Carters' Golden Wing Oats, and find that they constitute a **Well-balanced Food**; 1 lb. of these Oats may be taken as equivalent in food value to 1 lb. of Ordinary Butchers' Meat and 1½ lb. of Potatoes combined."

Full directions will be found on each Packet, and whether they are prepared as Porridge for breakfast, Milk Puddings for lunch, Scones for tea, or as Biscuits for dinner, each preparation will be found excellent.

Sold in 2-lb. sealed packets only. Price **6d.** (post free **11d.**)

CARTERS' BUTTER BEANS.

Thoroughly wholesome and nutritious, possessing a distinct delicate and melting flavour not found in the ordinary Haricot Beans. A delicious winter Vegetable for dinner and supper.

Sold in sealed packets only. Price **5d.** (post free **9d.**)

CARTERS' GREEN PEAS.

Furnish the table with the only dish obtainable during the winter months approaching in flavour the fresh garden peas.

Sold in sealed packets only. Price **4½d.** (post free **8½d.**)

CARTERS' FRENCH BEANS.

HARICOT VERT—A Parisian delicacy, specially recommended for addition to soups, hashes, &c.

Sold in sealed packets only. Price **7d.** (post free **11d.**)

SPECIALITIES FOR BIRDS.

CARTERS' BIRD SEEDS.

A mixture of sweet, bright machine-cleaned Seeds, specially selected for Canaries and smaller cage birds; nutritive and wholesome.

Sold in sealed packets only. Price **1d., 2d., 4d., 6d.** each.

Postage extra unless ordered with other goods.

CARTERS' PARROT FOOD.

A mixture of seeds selected and cleaned with equal care for Parrots, Cockatoos, and the larger seed-eating birds.

Sold in sealed packets only. Price **1½d., 3d., 6d.** each.

Postage extra unless ordered with other goods.

CARTERS' SPECIALITIES FOR BIRDS are sold by the principal Grocers, Corn Merchants, and Stores. Name and address of nearest Dealer will be sent on application.

TERMS OF BUSINESS.

Conditions of Guarantee of Quality.

We guarantee our Seeds according to the quality purchased to be of the highest average Standard of vitality of the season, and it is open to the purchaser to confirm this by submitting the samples to professional analysis at his own expense. We cannot, however, be in any way responsible for the produce of Seeds sold under this guarantee, or for errors of description; and it must therefore be clearly understood that our responsibility ceases upon the final acceptance of the Goods.

Orders.

ALL ORDERS SHOULD BE WRITTEN SEPARATELY FROM GENERAL LETTERS OR LETTERS OF ENQUIRY.

Please write your Name and Address in full, also nearest Railway Station or Shipping Port to which the Goods are to be forwarded.

All letters are opened under the direction of one of our principals, and the orders are given out for execution under personal supervision. Plant orders are sometimes delayed by severe or hot weather, and they at all times take longer to execute than Bulb or Seed orders, in consequence of the time required in lifting and packing, especially in the autumn after the long accumulation of orders.

New Customers.

We beg respectfully to state that on opening an account it is necessary for us to receive Cash with the order, or a reference to a Banker or some one known to our House.

Free Carriage of Goods.

(Except in cases where the cost of Carriage absorbs the profit on the transaction, when we reserve to ourselves the right to send unpaid.)

We deliver SEEDS, POTATOES, PLANTS, and BULBS, CARRIAGE PAID, to ANY RAILWAY STATION in ENGLAND and WALES, or to ANY PORT in IRELAND or SCOTLAND where practicable, also FREE by PARCELS POST to Purchaser's door where possible.

We occasionally hear of charges being made by the Railway Companies, notwithstanding that our address label bears the imprint in **RED** letters "Carriage Paid." In cases where a Charge for the Railway Carriage is made, notwithstanding that the Package is labelled "Carriage Paid," Purchasers should on no account pay the demand, but refer the Carriers to us. Charges for delivery from Stations (if any) must be borne by the consignee.

Glass and other Goods liable to breakage are sent out securely packed, but beyond that we cannot be responsible for damage in transit. Notice of damage should be at once made to, and compensation claimed from, the Carriers.

Cash Discount.

We allow 5 per cent. discount off the total amount of invoice on all goods paid for with order, or within fourteen days from the date of invoice (but at no later period), UNLESS OTHER TERMS ARE SPECIFIED OR ARRANGED.

Term of Credit.

OUR FULLEST TERM OF CREDIT IS THREE MONTHS FROM DATE OF INVOICE, AND WITHOUT DISCOUNT, and our books are made up quarterly—i.e., March 1st, June 1st, September 1st, and December 1st. Five per cent. interest will be charged upon overdue accounts.

Remittances.

Postal Orders, Post Office Orders, or Cheques on any Bank are acceptable, and should be drawn in favour of JAMES CARTER & CO., and crossed "London and Westminster Bank."

Empty Packages, Hampers, Boxes, Sacks, Bags, etc.

Are charged at cost price, and full price will be allowed on them when returned immediately, carriage paid and in good condition. These should be in every case marked "Empties from —;" a letter by post informing us of their despatch is also necessary. Booking charges must be prepaid, and a receipt should be taken, so that the value may be recovered if they are lost or mis-sent. Coin, other valuables, or important communications should on no account be enclosed with returned empties. On receipt of a post-card we will send labels.

Attention to Customers.

It is our earnest desire that all the requirements and directions of Customers be scrupulously attended to by our assistants, AND WE PRACTISE THE UTMOST PERSONAL SUPERVISION TO SEE THAT THEY ARE CARRIED OUT. We would, therefore, respectfully request that we be informed if at any time there is cause for dissatisfaction, that we may have it rectified at the earliest possible moment.

Change of Address.

Please notify to us any change of Permanent Address, in order that we may be able to forward our Catalogues with regularity. The favour of your kind recommendation of our House to those of your friends requiring Seeds for the Garden or Farm, or Plants and Flower Roots for the Garden or Conservatory, is respectfully solicited. We shall be pleased, at all times, to forward our Catalogues to any address we may be favoured with.

Gardeners & Stewards

We have at all times a number of experienced men on our Register, and shall be glad to hear from any customer requiring persons in either of these capacities.

Seeds for Cottagers, etc.

SEEDS FOR DISTRIBUTION TO COTTAGERS, FOR ALLOTMENTS, SOLDIERS' GARDENS, LOCAL HORTICULTURAL SOCIETIES, HOTEL-KEEPERS, etc., supplied at special terms.

PLEASE SIGN THE FORM ON FRONT PAGE AND RETURN TO

Halfpenny
Stamp
required.

Messrs. J. CARTER & CO.,

THE QUEEN'S SEEDSMEN,

237, 238, & 97, High Holborn,

LONDON, W.C.

EXTRACTS FROM TERMS OF BUSINESS. (See Catalogue, page 3 of Cover.)

Orders.—All Orders, except when this Order sheet is used, should be written separately from general letters or letters of enquiry. Please write your Name and Address in full, also nearest Railway Station, in case of necessity, to which the Goods are to be forwarded. All letters are opened under the direction of one of our Principals, and the orders are given out for execution under personal supervision. Plant orders are sometimes delayed by severe or hot weather, and they at all times take longer to execute than Bulb or Seed orders, in consequence of the time required in lifting and packing, especially in the autumn, after the long accumulation of orders.

Free Carriage of Goods (except in cases where the cost of carriage absorbs the value of the parcel, when we reserve to ourselves the right to send unpaid).—We deliver all Bulbs, Seeds, Potatoes, and Plants, Carriage Paid, to any Railway Station in England and Wales, or to any Port in Ireland or Scotland having direct communication with London, or Free by Parcel Post to Purchaser's door where possible. *We occasionally hear of charges being made by the Railway Companies, notwithstanding that our Address label bears the imprint in red letters, "Carriage Paid." In cases where a Charge for the Railway Carriage is made, notwithstanding that the Package is labelled "Carriage Paid," Purchasers should on no account pay the demand, but refer the Carriers to us. Charges for delivery from Stations must be paid by Purchaser.* Glass and other Goods liable to breakage are sent out securely packed, but beyond that we cannot be responsible for damage in transit. Notice of damage should be at once made to, and compensation claimed from, the Carriers.

Cash Discount.—We allow 5 per cent. discount off the total amount of invoice on all goods paid for with order, or within fourteen days from the date of invoice (unless other terms are specified or arranged), but at no later period.

Remittances.—Postal Orders, Post Office Orders, or Cheques on any Bank are acceptable, and should be drawn in favour of JAMES CARTER & Co., and all crossed "London and Westminster Bank."

Empty Packages, Hampers, Boxes, Sacks, Bags, etc., are charged at cost price, and full price will be allowed on them when returned immediately, carriage paid, and in good condition. These should be in every case marked "Empties from —"; a letter by post informing us of their dispatch is also necessary. Booking charges must be prepaid, and a receipt should be taken, so that the value may be recovered if they are lost or mis-sent. Coin, other valuables, or important communications, should on no account be enclosed with returned empties. On receipt of a post-card we will send labels.

New Customers.—We beg respectfully to state that on opening an account it is necessary for us to receive Cash with the order, or reference to a Banker, or some one known to our House.

Change of Address.—Please notify to us any change of Permanent Address, in order that we may be able to forward our Catalogues with regularity. The favour of your kind recommendation of our House to those of your friends requiring Seeds for the Garden or Farm, or Plants and Flower Roots for the Garden or Conservatory, is respectfully solicited. We shall be most pleased, at all times, to forward our Catalogues to any address we may be favoured with.

Seeds for Cottagers, etc.—Seeds for distribution to Cottagers, for Allotments, Soldiers' Gardens, local Co-operative and Horticultural Societies, Hotel Keepers, etc., supplied at special terms.

Conditions of Guarantee of Quality.—We guarantee our Seeds according to the quality purchased to be of the highest average standard of vitality of the season, and it is open to the purchaser to confirm this by submitting the samples to professional analysis at his own expense. We cannot, however, be in any way responsible for the produce of Seeds sold under this guarantee or for errors of description; and it must therefore be clearly understood that our responsibility ceases upon the final acceptance of the goods.
